at Pilot and Industrial Scales - BIOTECHThe scope of the Singapore Biosafety Guidelines for Research on GMOs covers experiments that involve the construction and/or propagation of all biological entities (cells, organisms, prions, viroids or viruses) which have been made by genetic manipulation and are of a novel genotype and which are unlikely to occur naturally or which could cause public health or environmental hazards.

THE SINGAPORE BIOSAFETY GUIDELINES FOR RESEARCH ON ...IBSC should allow genetic engineering activity on classified organisms only at places where such work should be performed as per guidelines. Provision of suitable safe storage facility of donor, vectors, recipients and other materials involved in experimental work should be made and may be subject to inspection on accountability.

INSTITUTIONAL BIOSAFETY - Banaras Hindu UniversityThe RCGM shall be the regulatory body for receiving and reviewing the applications to conduct confined field trials (such as event selection trials, Biosafety Research Level I trials (BRL-I), pollen flow studies or any other trial involving GE organisms) and recommend appropriate studies to be conducted for data generation for biosafety assessment as per clause 4, as per the decision of the Genetic Engineering Approval Committee (GEAC) for its authorization.
