 College Algebra provides a comprehensive exploration of  
 algebraic principles and meets scope and sequence requirements  
 for a typical introductory algebra course. The modular approach  
 and richness of content ensure that the book meets the needs of  
 a variety of courses. The text and images in this textbook are  
 grayscale.  
*Success with BEC - Preliminary - Workbook* MC/Summertown ELT  
 The perfect gift! A specially priced, beautifully designed  
 hardcover edition of *The Joy of the Gospel* with a foreword by  
 Robert Barron and an afterword by James Martin, SJ. "The joy of  
 the gospel fills the hearts and lives of all who encounter Jesus...  
 In this Exhortation I wish to encourage the Christian faithful to  
 embark upon a new chapter of evangelization marked by this joy,  
 while pointing out new paths for the Church's journey in years to  
 come." - Pope Francis This special edition of Pope Francis's  
 popular message of hope explores themes that are important for  
 believers in the 21st century. Examining the many obstacles to

faith and what can be done to overcome those hurdles, he  
 emphasizes the importance of service to God and all his creation.  
 Advocating for "the homeless, the addicted, refugees, indigenous  
 peoples, the elderly who are increasingly isolated and  
 abandoned," the Holy Father shows us how to respond to poverty  
 and current economic challenges that affect us locally and  
 globally. Ultimately, Pope Francis demonstrates how to develop a  
 more personal relationship with Jesus Christ, "to recognize the  
 traces of God's Spirit in events great and small." Profound in its  
 insight, yet warm and accessible in its tone, *The Joy of the Gospel*  
 is a call to action to live a life motivated by divine love and, in  
 turn, to experience heaven on earth. Includes a foreword by  
 Robert Barron, author of *Catholicism: A Journey to the Heart of*  
*the Faith* and James Martin, SJ, author of *Jesus: A Pilgrimage*

Business Start-up is a two-level course for beginners and false beginners who need English for their work. It takes low-level students up to the point where they can start preparing for the BEC Preliminary Examination (early B1 level) and provides a solid foundation for further learning. The Student's Books bring reality to even the most basic levels of language learning through the presentation of natural language in authentic contexts, a regular focus on real companies and products, and practice in the communication skills that professionals really need. Audio recordings for the rich listening material are available on separate CDs. The A5 size Workbooks come with a CD-ROM/Audio CD offering self-study grammar and vocabulary activities, as well as listening practice on the move. The Teacher's Books include full classroom notes, additional communicative practice activities and regular progress tests, plus an end of course/placement test.

This book is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge colleges as the basis for conditional offers. They are also used by Warwick University, and many other mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination. Advanced Problems in Mathematics is recommended as preparation for any undergraduate mathematics course, even for students who do not plan to take the Sixth Term Examination Paper. The questions analysed in this book are all based on recent STEP questions selected to address the syllabus for Papers I and II, which is the A-level core (i.e. C1 to C4) with a few additions. Each question is followed by a comment and a full solution. The comments direct the reader's attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently. This book is a must read for any student wishing to apply to scientific subjects at university level and for anybody interested in advanced mathematics.
