*Race and Ethnic Relations: American and Global Perspectives* Pearson Higher Ed

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. This book covers introductory Microsoft Word, Excel, Access, and PowerPoint, with an additional Windows 10 chapter. Beyond point-and-click The goal of the Exploring series is to move students beyond the point-and-click, to understanding the why and how behind each skill. And because so much learning takes place outside of the

classroom, this series provides learning tools that students can access anywhere, anytime. Students go to college now with a different set of skills than they did years ago. With this in mind, the Exploring series seeks to move students beyond the basics of the software at a faster pace, without sacrificing coverage of the fundamental skills that everyone needs to know. Also available with MyITLab MyITLab® is an online homework, tutorial, and assessment program designed for Information Technology (IT) courses, which engages students and improves results. HTML5 Simulation exercises and Live-in-Application Grader

projects come with the convenience of auto-grading and instant feedback, helping students learn more quickly and effectively. Digital badges lets students showcase their Microsoft Office or Computer Concepts competencies, keeping them motivated and focused on their future careers. MyITLab builds the critical skills needed for college and career success. Note: You are purchasing a standalone product; MyITLab does not come packaged with this content. Students, if interested in purchasing this title with MyITLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information.

In today's fast-moving, mobile environment, the GO! with Office 2016 series focuses on the job skills needed to succeed in the workforce. With job-related projects that put Microsoft Office® into context, students learn the how and why at the moment they need to know, all in the appropriate Microsoft

procedural syntax. For Office 2016, the hallmark guided-practice to skill-mastery pathway is better than ever.

Students have many opportunities to work live in Microsoft office to apply the skills they've learned. In addition, instructional projects are now available as grader projects in MyITLab, so students can work live in Office while receiving auto-graded feedback. These high-fidelity simulations match the text and provide an effective pathway for learning, practicing, and assessing their abilities. After completing the instructional projects, students can apply their skills with a variety of progressively challenging projects

that require them to solve problems, think critically, and create on their own. New GO! Collaborate with Google projects allow students to apply their skills to a new environment that is already popular in many workplaces. Integrated Microsoft Office Specialist (MOS) objectives make GO! your one resource for learning Office, gaining critical productivity skills, and prepare for MOS certification. Also available with MyITLab MyITLab® is an online homework, tutorial, and assessment program designed for Information Technology (IT) courses, to engage students and improve results. Skills for Success with Microsoft O Pearson Reflecting the latest data and theoretical literature available, RACE AND ETHNIC RELATIONS: AMERICAN AND GLOBAL PERSPECTIVES, 10e tackles diversity issues from both the American and global perspective, offering an in-depth exploration

of today's globally diverse world. The text's expansive coverage of race and ethnic relations across the globe highlights major points of difference and similarity between the United States and a number of other societies, as well as includes a unique case study comparing four different countries. This unique comparative approach is vital with the increasing ethnic diversity in most contemporary societies as well as the prominence of ethnic conflicts in virtually all world regions. Current statistics, figures, maps, and citations provide up-to-the-minute insight. The Tenth Edition also includes an all-new chapter devoted to

Arab Americans. In addition, end-of-chapter critical-thinking questions encourage readers to think in a sociological mode and examine current issues using concepts presented in the text. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

This book presents Proceedings of the 2021 Intelligent

Systems Conference which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world. The conference attracted a total of 496 submissions from many academic pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double-blind peer-review process. Of the total submissions, 180 submissions have been selected to be included in these proceedings. As we witness exponential growth of computational intelligence in several directions and use of intelligent systems in

everyday applications, this book is an ideal resource for reporting latest innovations and future of AI. The chapters include theory and application on all aspects of artificial intelligence, from classical to intelligent scope. We hope that readers find the book interesting and valuable; it provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research. .

Word, Excel, Access, and PowerPoint, with additional sections on integrating those applications, as well as a Windows 8 workshop. Ideal for business courses. Real world problem solving for business and beyond. The Your Office series prepares students to use both technical and soft skills in the real world. Hands-on technical content is woven into realistic business scenarios and focuses on using Microsoft Office® as a decision-making tool. The series features a unique running business scenario that connects all of the cases together and exposes students to using Office to solve problems relating to business areas like finance and accounting, production

and operations, sales and marketing. Each chapter introduces a realistic business case for students to complete via hands-on steps that are easily identified in blue shaded boxes. Each blue box teaches a skill and comes complete with video and interactive support. Chapters are grouped into Business Units, which collectively illustrate a specific set of business concepts to achieve AACSB-related outcomes. Each Business Unit ends with a Capstone section, testing students' ability to apply concepts and skills beyond a single chapter.
