The Feminine in Islam Usborne Books

"Crafting a Modern World examines a missing chapter in the history of mid-century modernism: the story of husband and wife design team Antonin and Noemi Raymond. This is the first comprehensive book in English on the duo that creatively transformed design from 1917 to 1966." -BOOK JACKET.

J.S. Bach: Two Part Inventions for Two Mandolins Routledge

The primary focus here is on log-linear models for contingency tables, but in this second edition, greater emphasis has been placed on logistic regression. The book explores topics such as logistic discrimination and generalised linear models, and builds upon the relationships between these

basic models for continuous data and the analogous log-linear and logistic regression models for discrete data. It also carefully examines the differences in model interpretations and evaluations that occur due to the discrete nature of the data. Sample commands are given for analyses in SAS, BMFP, and GLIM, while numerous data sets from fields as diverse as engineering, education, sociology, and medicine are used to illustrate procedures and provide exercises. Throughout the book, the treatment is designed for students with prior knowledge of analysis of variance and regression.

An internationally acclaimed scholar, who has dedicated more than fifty years of her life to understanding the Islamic world.Annemarie Schimmel examines a much-misunderstood feature of Islam: the role of women. Schimmel is critical of those--especially Western feminists--who take Islam to task without taking the time to comprehend the cultures, language, and traditions of the many societies in which Islam is the majority religion.Shattering stereotypes, Schimmel reconstructs an important but little-known chapter of Islamic spirituality. With copius examples, she shows the clear equality of women and men in the conception of the Prophet Muhammad, the Quran, the feminine language of the mystical tradition, and the role of holy mothers and unmarried women as manifestations of God.This work is studded with luminous texts from Arabic, Turkish, Persian, and particularly Indo-Muslim cultures, which reveal how physical love can give expression to the highest forms of mysticism.
