'One of only two novels I've ever loved whose main characters are not human' BARBARA KINGSOLVER For fans of The Essex Serpent and The Mermaid and Mrs Hancock. 'By far my favourite book of of the year' Guardian

Travelling in Search of the Past Boydell & Brewer

A highly rigorous, yet original and entertaining book that explores the connection between food and science. Why has science forcefully entered the kitchen from a certain moment in history? Why do scientists often use images and metaphors drawn from gastronomy? What is the common thread that connects scientific experiments to mouth-watering recipes? What has futurist cooking got in common with molecular gastronomy? Experiments with coffee, controversies over beer and chocolate recipes guarded as if they were secret patents are the ingredients of this original, surprising account of the intersections between gastronomy and research, between laboratories and kitchens.

Why should you start a spiritual journey? Why does a human being, at some point in his life, realize that science, religion and academic philosophies cannot give him the answers he seeks? Scientific knowledge reveals its inability to provide real answers to the great mysteries of birth and death. Different spiritual traditions have given us the keys and the methods to find these answers: the hermetic-alchemical tradition, the tradition of Shamanism and the Indian yogic tradition (Raja Yoga, Kriya yoga and Advaita Vedanta), and the Tibetan Buddhism tradition. All the exercises proposed, although belonging to different traditions and schools, are linked to the same modalities and objectives, in a unique and coherent path. Spiritual Tradition is One, although it has taken on different forms over the ages and in different geographical places. The researcher, who has become a disciple, will find the most hidden secrets not only of humanity but of the entire universe in the depths of his being. Behind the scenes of ordinary existence, there is the ineffable unknown, and during his journey of knowledge, the disciple will receive sudden and unexpected revelations of this mystery, of a force that governs all that exists, and which constitutes all beings, as luminous source of regenerating energy. As he proceeds along this path, he will understand how to get in touch with this force, drawing on it and using it in his consciousness. The spiritual path is like the science, in which the fundamental data is experience, as well as experimentation as a test bench. You will choose the path and practices most suitable for you, building your own personal way. Going forward with this research, you will gradually discover that your true being has a supersensitive nature and origin, and that in your depths lives something precious that can give you real harmony, security, inner firmness against the many obstacles of existence. You will then find out, that all the external masters are there to show you that the true master is within you.

2017 Jordan Schnitzer Book Award in Jewish Literature and Linguistics Honorable Mention, 2016 Baron Book Prize presented by AAJR A monster tour of the Golem narrative across various cultural and historical landscapes In the 1910s and 1920s, a "golem cult" swept across Europe and the U.S., later surfacing in Israel. Why did this story of a powerful clay monster molded and animated by a rabbi to protect his community become so popular and pervasive? The golem has appeared in a remarkable range of popular media: from the Yiddish theater to American comic books, from German silent film to Quentin Tarantino movies. This book showcases how the golem was remolded, throughout the war-torn twentieth century, as a muscular protector, injured combatant, and even murderous avenger. This evolution of the golem narrative is made comprehensible by, and also helps us to better understand, one of the defining aspects of the last one hundred years: mass warfare and its ancillary technologies. In the twentieth century the golem became a figure of war. It

represented the chaos of warfare, the automation of war technologies, and the devastation wrought upon soldiers' bodies and psyches. *Golem: Modern Wars and Their Monsters* draws on some of the most popular and significant renditions of this story in order to unravel the paradoxical coincidence of wartime destruction and the fantasy of artificial creation. Due to its aggressive and rebellious sides, the golem became a means for reflection about how technological progress has altered human lives, as well as an avenue for experimentation with the media and art forms capable of expressing the monstrosity of war. Harry Collins and Trevor Pinch liken science to the Golem, a creature from Jewish mythology, powerful yet potentially dangerous, a gentle, helpful creature that may yet run amok at any moment. Through a series of intriguing case studies the authors debunk the traditional view that science is the straightforward result of competent theorisation, observation and experimentation. The very well-received first edition generated much debate, reflected in a substantial new Afterword in this second edition, which seeks to place the book in what have become known as 'the science wars'.

Humanity at Risk compares diverse approaches to the theme of global threats using the tools of philosophy, critical theory, and political thought alongside more practical, socio-political observations. By defining the idea of "global risk" more specifically, Editors Innerarity and Solana, and their contributors, believe we can understand how these risks should be evaluated, predicted, and managed within the framework of democratic societies. The goal of this book is to highlight more precisely the necessity, in the face of new global risks, for new governance at a national, European, and global level.

In the news on various media it often happens to hear of characters assimilated to "sorcerer's apprentices", as they are responsible for consequences that are almost always detrimental and of which they unintentionally lose control. Characters like these have always existed: the essay tries to identify some in the most varied areas, to tell the circumstances in which these apprentices handle their "magic formula", whether it really is a chemical formula, or a theory, of a book, a weapon, a drug, a material, the crowd or even sexuality, sometimes making unexpected discoveries. In the end, the author tries to outline the recurrent features of sorcerer's apprentices, perhaps to be able to recognize them, if they wander among us, learn to stay away from them or try to prevent them from harming themselves and especially others.

Praga, anno 1580 dell'era cristiana. L'imperatore si reca al cospetto del rabbino, implorando pietà. Soltanto poche ore prima i soldati erano entrati nel ghetto con l'ordine di sterminio. Ma qualcosa di

orribile e accaduto. I soldati non hanno avuto scampo contro un'arma che non ha eguali sulla faccia della Terra, un'arma di cui il rabbino e il riluttante Controllatore. Quasi cinque secoli dopo, la stessa inarrestabile arma viene usata contro gli invasori nazisti. Notte dopo notte, una catena di eventi tragici e misteriosi, inspiegabili e terribili, uccide i soldati. Qual è il denominatore comune dei misteri che avvolgono Praga?

This book is, quite frankly, a catalogue—a catalogue to document an exhibit at The Jewish Museum. It is also a presentation of recent scholarship on the golem including an in-depth examination of the golem in Jewish mysticism. Isaac Bashevis Singer has written the Introduction and there are essays by Moshe Idel, Elfi Ledig, and Emily Bilski. An extensive bibliography of primary and secondary sources on all aspects of its golem is also included.

This book proposes a philosophy of care in a global age. It discusses the distinguishing and opposing pathologies produced by globalization: unlimited individualism or self-obsession, manifested as (Promethean) omnipotence and (narcissistic) indifference, and endogamous communitarianism or an 'us'-obsession that results in conflict and violence. The polarization between a lack and an excess of pathos is reflected in the distorted forms taken on by fear. The book advocates a metamorphosis of fear, which may restore in the subject an awareness of vulnerability and become the precondition for moral action. Such awareness and the recognition of the condition of contamination caused by the other's unavoidable presence teach us to fear for rather than be afraid of. Fear for the world means care of the world, and care, understood as concern and solicitude, is a new notion of responsibility, in which the stress is shifted to a relational subject capable of responding to and taking care of the other. From a global perspective, the proposed vision of care also compels us to explore a new paradigm of justice.

The ever-increasing integration of technology and the human body is attracting attention from religious, business, and political leaders around the world, and the topic promises to be a significant social issue in the 21st century. In *Mediating the Human Body: Technology, Communication, and Fashion*, editors Leopoldina Fortunati, James E. Katz, and Raimonda Riccini bring together a thoughtful group of leading international scholars and analysts to explore the effects of new technologies on human beings. They focus specifically on the intersection of new communication technologies and the body, and offer novel insights based on recent theoretical progress and current research on new interpersonal technology. Through literary analysis, historical comparisons, analytical reports, and speculative interpretations, the contributors to this volume seek to understand the experience of the body as it is mediated among competing forces and intellectual domains. Arising from *The Human Body Between Technologies, Communication and Fashion* symposium held in Milan, Italy, contributions cover a wide array of topics and offer varied

perspectives on how communication technologies are assimilated into people's lives, bodies, and homes, and thus become part of individuals' self-images and social relationships. From this multidisciplinary, multi-national base, the volume illuminates the sense and dimension of this interpenetration between body and technology. In its broad scope, the topics range from the wellsprings of consciousness to the use of technology as a fashion statement. Bringing together scholarship from a variety of disciplines, including communication, medicine, technology, and human-computer interaction, this distinctive anthology will provide new insights to scholars and advanced students exploring body-technology intersections and the attendant implications. *Mediating the Human Body* offers a unique contribution to future discussions, and will be relevant to continuing study and research in communication and technology, human-computer interaction, gender studies, social psychology, and design.

Una mattina, Jacob Lev, detective della polizia di Los Angeles, si sveglia stordito e confuso. Nei suoi ricordi della notte precedente solo qualche frammento sconnesso: un bar, un bicchiere, una bella donna... Non riesce a ricordare cosa sia successo nelle ore successive. Ma questo è solo un piccolo mistero in confronto a ciò che, ben presto, si troverà ad affrontare. Assegnato di recente alla squadra Progetti speciali, di cui per primo ignorava l'esistenza, Lev giunge su una scena del crimine in una casa sulle colline di Hollywood. Lo spettacolo che si trova di fronte è tanto insolito quanto agghiacciante. Non c'è alcun cadavere, solo una testa sul pavimento e la parola "giustizia" scritta in ebraico sul muro. Da Los Angeles fino alla vecchia Europa, ha inizio un'indagine sulle tracce del leggendario Golem di Praga. Un'odissea investigativa che stravolge tutte le verità in cui Lev ha sempre creduto, e dopo la quale la sua stessa visione del mondo cambierà per sempre...

Are the literary works of Polish Jews one unified literature in three languages: Yiddish, Hebrew and Polish, or is the literal corpus of each of these languages a separated literary and cultural phenomenon? Twenty-seven scholars from Europe, the United States, and Israel explore different aspects of the multilingual literature of Eastern European Jews, with a particular focus on the trilingual literature of Polish Jews until World War II. The work of the great Yiddish and Hebrew writer Isaac Leib Peretz (1852-1915) represents the center of the book, though it does not concentrate solely on Peretz's work, but, rather, discusses the oeuvre of other unique authors in the cultural space of Jews in Central and Eastern Europe generally, and in Poland particularly. The book looks at this issue from three aspects, namely the literal, cultural, and historical, and also examines the dialogue of Polish Jewish literature with other languages and cultures.

The legend of the Golem dates back to the 1500s when the Jews of Prague were being viciously persecuted. Their spiritual leader, Rabbi Loew, also known as The Maharal of Prague, created a formidable creature out of clay whose mission it was to protect the Jews of the city. This beautiful picture book with its lyrical text and evocative illustrations, retells the story of the Golem through the eyes of a young boy, Frantz. Despite warnings to never enter the attic in the synagogue, Frantz climbs up. There, he is transported back to the time when the Golem was created, and eventually destroyed. A blend of mysticism, the supernatural, and even romance makes this a haunting picture book for children ages 8 to 12.
