Certo's Supervision:
Concepts and Skill-
Building 8e prepares
students to be supervisors
in a challenging modern
workplace. It is based on
the premise that
organizational variables
including diversity in the
workforce, computer and
communication
technology, and the
design of organization
structures are constantly
changing. Overall, this
text focuses on discussing
important supervision
concepts and providing
fundamental skills
necessary for applying
these concepts. Students
will learn the critical role
of a supervisor in an
organization and the
abilities needed to be
successful.

The Seventh Edition
of Canadian Organizational
Behaviour is truly a "new
and improved" McShane:
new trim size, fresh new
design, new co-author,
reorganized table of
contents, improved
examples, and even
enhanced readability. The
McShane brand is known
for its cutting edge
research and scholarship,
recognized for its "for
Canadians, by Canadians"
approach to content, and
respected for its firm
anchoring of Canadian
material within a global
context. No other OB book
offers the kind of
comprehensive coverage
in such an accessible,
readable format.
Canadian Organizational
Behaviour continues to
lead the way as the most
innovative OB text on the
market. McShane was the
first OB textbook to
include topics such as
workplace emotions,
appreciative inquiry,
social identity theory,
future search events,
virtual teams,
workaholism, and
emotional intelligence.
The innovation continues
in the seventh edition

with new and expanded coverage of topics such as employee engagement, resilience, four-drive theory, blogs and wikis, psychological harassment, learning orientation, Schwartz's values model, and separating socioemotional from constructive conflict. The pedagogical features have been completely overhauled to speak to new and emerging topics in OB worldwide, including the opening vignettes, the photo essays in each chapter, and many of the end-of-chapter exercises and end-of-part cases.

Functions and Applications 11 McGraw-Hill Ryerson

A resource written specifically for the University/College Functions and Applications (MCF3M) course. Functions and Applications is designed

for students who plan to pursue technology-related programs in college or prepare students for some university programs.

The outstanding illustrations and a balanced combination of line art and photographs make this lab manual an invaluable tool for teaching the undergraduate student of one- or two-semester

anatomy and physiology. Using the cat as the primary specimen, this manual contains 47 exercises that provide a comprehensive overview of the human body and present the core elements of the subject matter.
