"Choctaw Food tells the story of a group of people and the land. Through hundreds of generations living in the American Southeast, Choctaw ancestors wove the region's landscapes into their language, culture, and food. The foodway that they developed was local and productive. Its dishes were flavorful and healthy. Its food production activities brought the community together in a way that was sustainable on the land. Today, this foodway is one of the most threatened parts of our traditional culture. Yes, it contains

timeless insights that have the potential to improve quality of life in the 21st century. The pages of this book delve deep into Choctaw history to bring to light the type of practical knowledge needed to bring Indigenous Choctaw food back to the family dinner table. This story is uniquely Choctaw, and yet, it is connected with the heritage of everyone who has ancestors that lived closely with the land."--Page 4 of cover.

This is a new edition of Greg Louganis's 1995 #1 New York Times bestselling autobiography and Literary Guild Selection. It is the unflinchingly honest first-person account of a man breaking free of a lifetime of silence and isolation. Born to a young Samoan father and

Northern European mother, and adopted at nine months, Greg began diving at age nine, and at sixteen won a silver medal at the 1976 Montreal Olympics. But despite his astonishing athletic skill, Greg struggled with late-detected dyslexia, prejudice toward his dark skin coloring and anguish over his homosexuality, which he felt compelled to hide. Being in the spotlight intensified his difficulties with relationships and substance abuse. However, Louganis went on to win double gold medals at the 1984 and 1988 Olympics. His triumph at the 1988 Olympics came several months after he tested positive for HIV. This is the haunting, searingly candid story of the world's greatest diver. This new edition includes a new foreword.

Amazing news is spreading like wildfire across the Scottish countryside: the most famous of all Highland bachelors, police sergeant Hamish Macbeth, is planning to marry at last! Everyone in the village of Lochdubh adores Josie McSween, Hamish's newest constable and blushing bride-to-be. While locals think she is quite a catch, Hamish has a severe case of pre-nuptial jitters... after all, if it wasn't for the recent murder of a beautiful woman in a neighbouring village there wouldn't be a wedding in the first place. For it was a mysterious Valentine's Day card - delivered to the victim before her death - which initially drew Hamish and Josie together in the investigation. And now, as they work

side by side, they soon discover that the woman's list of admirers was endless - confirming Hamish's suspicion that love can be deaf, blind... and deadly!

Aliens are coming! A year after young engineering student Rip Cantrell discovered the first flying saucer buried deep in the sands of the Sahara, another saucer is brought up from the bottom of the Atlantic. The recovery is funded by a pharmaceutical executive who believes that the saucer holds the key to an anti-aging drug formula that space travelers would need to voyage between galaxies. But one of his technicians, Adam Solo, an alien marooned on Earth for a thousand years, steals the saucer, hoping to summon a starship to rescue him. Unfortunately, the stolen saucer has damaged communications gear. Solo goes to Rip Cantrell and his partner, ex-Air Force test pilot Charlotte "Charley"

Pine, and Rip's uncle Egg, for help in summoning a starship. Meanwhile, as a terrified world fearful of space invaders approaches meltdown, big pharma moguls and their thugs are hot on the trail of the foursome. In a world turned upside down, it may be the arriving aliens who offer limitless possibilities. Rip and Charley face an incredible decision: Do they dare leave the safety of earth to travel into the great wilderness of the universe? Full of UFO's, futuristic technology, edge-of-your-seat flying scenes and unforgettable characters, human and otherwise, Stephen Coonts' *Savage Planet* is classic storytelling at its best . . . and pure, unadulterated fun.

It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make

such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in *Setting the Standard for Project Based Learning* and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning

Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free videos

provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together. A copublication of ASCD and Buck Institute for Education (BIE).
