You think you have a winning strategy. But do you? Executives are bombarded with bestselling ideas and best practices for achieving competitive advantage, but many of these ideas and practices contradict each other. Should you aim to be big or fast? Should you create a blue ocean, be adaptive, play to win—or forget about a sustainable competitive advantage altogether? In a business environment that is changing faster and becoming more uncertain and complex almost by the day, it's never been more important—or more difficult—to choose the right approach to strategy. In this book, The Boston Consulting Group's Martin Reeves, Knut Haanæs, and Janmejaya Sinha offer a proven method to determine the strategy approach that is best for your company. They start by helping you assess your business environment—how unpredictable it is, how much power you have to change it, and how harsh it is—a critical component of getting strategy right. They show how existing strategy approaches sort into five categories—Be Big, Be Fast, Be First, Be the Orchestrator, or simply Be Viable—depending on the extent of predictability, malleability, and harshness. In-depth explanations of each of these approaches will provide critical insight to help you match your approach to strategy to your environment, determine when and how to execute each one, and avoid a potentially fatal mismatch. Addressing your most pressing strategic challenges, you'll be able to answer questions such as: • What replaces planning when the annual cycle is obsolete? • When can we—and when should we—shape the game to our advantage? • How do we simultaneously implement different strategic approaches for different business units? • How do we manage the inherent contradictions in formulating and executing different strategies across multiple businesses and geographies? Until now, no book brings it all together and offers a practical tool for understanding which strategic approach to apply. Get started today.

As established markets become less profitable, companies increasingly need to find ways to create and capture new markets. Despite much investment and commitment, most firms struggle to do this. What, exactly, is getting in their way? World-renowned professors W. Chan Kim and Renee Mauborgne, the authors of the best-selling book *Blue Ocean Strategy* have spent over a decade exploring that question. They have seen that the trouble lies in managers' mental models—ingrained assumptions and theories about the way the world works. Though these models may work perfectly well in mature markets, they undermine executives' attempts to discover uncontested new spaces

with ample potential (blue oceans) and keep companies firmly anchored in existing spaces where competition is bloody (red oceans). In this bound version of their bestselling Harvard Business Review classic article, they describe how to break free of these red ocean traps. To do that, managers need to: (1) Focus on attracting new customers, not pleasing current customers; (2) Worry less about segmentation and more about what different segments have in common; (3) Understand that market creation is not synonymous with either technological innovation or creative destruction; and (3) Stop focusing on premium versus low-cost strategies. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

The Idea Book Harvard Business Press

Chart a path to creating uncontested market space and winning the future. This collection of work by globally preeminent management thinkers W. Chan Kim and Renée Mauborgne brings together their perennial bestseller book *Blue Ocean Strategy* with their classic article “Blue Ocean Leadership.” *Blue Ocean Strategy*, the global phenomenon that has sold over 4 million copies and is recognized as one of the most iconic and impactful strategy books ever written, argues that cutthroat competition results in nothing but a bloody red ocean of rivals fighting over a shrinking profit pool. Based on a study of 150 strategic moves (spanning more than 100 years across 30 industries), Kim and Mauborgne argue that lasting success comes not from battling competitors but from creating “blue oceans”—untapped new market spaces ripe for growth. The book presents a systematic approach to making competition irrelevant and outlines principles and tools any organization can use to create and capture their own blue oceans. In the article “Blue Ocean Leadership,” the authors apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and realized talent and energy of employees. The authors offer a systematic method for uncovering, at every level of the organization, which leadership acts and activities will inspire employees to give it their all and a process for getting managers throughout the company to undertake these tasks.

Technological innovations, sociological and consumer trends, and growing internationalization are transforming the cultural and creative industries (CCIs). These changes present new challenges for CCIs that require original and inventive answers. Innovation in the Cultural and Creative Industries analyzes the powerful strategies put in place by CCI organizations such as Nintendo, the Lascaux Cave and Daft Punk. The case studies presented in this book cover video games, books, music, museums, fashion, film and architecture. Each chapter is organized around five key points: a theoretical framework that focuses on a specific concept, a description of the methodological mechanism mobilized, a presentation of the industry concerned, the analysis of the innovative strategy and a recap of the lessons and best practices demonstrated by the case.

"Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan's books."—The Washington Post Book World (front page review) In *Cosmos*, the late astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. "Takes readers far beyond *Cosmos* . . . Sagan sees humanity's future in the stars."—Chicago Tribune

Remark on Neutrosophy Perspective on Blue Ocean Shift HarperCollins

Ten years ago, world-renowned professors W. Chan Kim and Renee Mauborgne broke ground by introducing "blue ocean strategy," a new model for discovering uncontested markets that are ripe for growth. In this bound version of their bestselling Harvard Business Review classic article, they apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and the realized talent and energy of employees. Research indicates that this gulf is vast: According to Gallup, 70% of workers are disengaged from their jobs. If companies could find a way to convert them into engaged employees, the results could be transformative. The trouble is, managers lack a clear understanding of what changes they could make to bring out the best in everyone. In this article, Kim and Mauborgne offer a solution to that problem: a systematic approach to uncovering, at each level of the organization, which leadership acts and activities will inspire employees to give their all, and a process for getting managers throughout the company to start doing them. Blue ocean leadership works because the managers' "customers"—that is, the people managers oversee and report to—are involved in identifying what's effective and what isn't. Moreover, the approach doesn't require leaders to alter who they are, just to undertake a different set of tasks. And that kind of change is much easier to implement and track than changes to values and mind-sets. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world—and will have a direct impact on you today and for years to come.

Good Strategy/Bad Strategy clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In Good Strategy/Bad Strategy, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.” He introduces nine sources of power—ranging from using leverage to effectively focusing on growth—that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007-08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance, technology, history, and the brilliance and foibles of the human character, Good Strategy/Bad Strategy stems from Rumelt’s decades of digging beyond the superficial to address hard questions with honesty and integrity.

Learn how the most successful businesses are creating value and igniting smart growth in a fast-paced, competitive market. Most businesses today focus on competition and disruption instead of collaboration, participation, and engagement. They focus on transactions instead of interactions. They seek to optimize or extract value rather than share it. They build assets and thrive on enormous scale, huge distribution networks, and brand recognition. But then along comes a rival that doesn’t care much about your brand and your other assets, and it either rushes past you or mows you down. In *The Interaction Field*, management expert and professor Erich Joachimsthaler explains that the only way to thrive in this environment is through the Interaction Field model. Companies who embrace this model generate, facilitate, and benefit from data exchanges among multiple people and groups -- from customers and stakeholders, but also from those you wouldn’t expect to be in the mix, like suppliers, software developers, regulators, and even competitors. And everyone in the field works together to solve big, industry-wide, or complex and unpredictable societal problems. The future is going to be about creating value for everyone. Businesses that solve immediate challenges of people today and also the major social and economic challenges of the future are the ones that will survive and grow.

The phenomenon of uncertainty is not new; what is new is its intensity and potential to change industries and destroy companies. Business leaders can be on the defensive, or they can be on offense, prepared to lead decisively. The ability to deal with uncertainty is perhaps the paramount skill leaders must have to be successful in this era. Without it they risk becoming personally obsolete and driving their companies off a cliff. In *The Attacker's Advantage*, renowned business expert and bestselling author Ram Charan shows what skills are needed to be able to spot the disruption that is coming, and what actions are necessary to take advantage of these changes. While many leaders know how to cope with operational uncertainty—when, for example, revenue fluctuates—the same cannot be said for dealing with structural uncertainty that can alter the money-making patterns of a company, industry or entire economic sector. Charan demonstrates the huge upside offered by structural uncertainty and provides the concepts and tools—such as being able to spot the catalysts of disruption, building organizational preparedness, developing a financial understanding of the consequences—to take advantage of forces that are creating new customer needs, market

segments and ways to make money. Uncertainty is now ubiquitous. The sources of structural change are so varied and fast moving, and their convergence so unpredictable. Digitization and the integration of technologies through software and hardware has already impacted many businesses, but much more is to come. With his unparalleled ability to cut through complexity and provide workable solutions, Ram Charan provides his readers with the ability to anticipate and deal with the biggest threats facing their business.
