The essential guide by one of America's leading doctors to how digital technology enables all of us to take charge of our health A trip to the doctor is almost a guarantee of misery. You'll make an appointment months in advance. You'll probably wait for several hours until you hear "the doctor will see you now"-but only for fifteen minutes! Then you'll wait even longer for lab tests, the results of which you'll likely never see, unless they indicate further (and more invasive) tests, most of which will probably prove unnecessary (much like physicals themselves). And your bill will be astronomical. In *The Patient Will See You Now*, Eric Topol, one of the nation's top physicians, shows why medicine does not have to be that way. Instead, you could use your smartphone to get rapid test results from one drop of blood, monitor your vital signs both day and night, and use an

artificially intelligent algorithm to receive a diagnosis without having to see a doctor, all at a small fraction of the cost imposed by our modern healthcare system. The change is powered by what Topol calls medicine's "Gutenberg moment." Much as the printing press took learning out of the hands of a priestly class, the mobile internet is doing the same for medicine, giving us unprecedented control over our healthcare. With smartphones in hand, we are no longer beholden to an impersonal and paternalistic system in which "doctor knows best." Medicine has been digitized, Topol argues; now it will be democratized. Computers will replace physicians for many diagnostic tasks, citizen science will give rise to citizen medicine, and enormous data sets will give us new means to attack conditions that have long been incurable. Massive, open, online medicine, where diagnostics are done by Facebook-like comparisons of medical profiles, will enable real-time, real-world research on massive populations. There's no doubt the path forward will be complicated: the medical establishment will resist these changes, and digitized medicine inevitably raises serious issues surrounding privacy. Nevertheless, the result-better, cheaper, and more human health care-will be worth it. Provocative and engrossing, *The Patient Will See You Now* is essential reading for anyone who thinks they deserve better health care. That is, for all of us.

18th International Conference, FC 2014, Christ Church, Barbados, March 3-7, 2014, Revised Selected Papers Elsevier Health Sciences

The job interview is probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 100 questions and answers for job interview and as a BONUS web addresses to 220 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

EGOV-CeDEM-ePart 2018 represents the merge of the IFIP WG 8.5 Electronic Government (EGOV), the IFIP WG 8.5 IFIP Electronic Participation (ePart) and the Conference for E-Democracy and Open Government Conference (CeDEM). The EGOV-CeDEM-ePart proceedings bring together the essence of academic and practical knowledge on e-government, e-democracy and open government, and e-participation. The peer-reviewed ongoing research papers, project descriptions, reflections and viewpoints, workshop and panel proposals, posters, and the PhD colloquium papers found in these proceedings capture the newest developments, trends, tools and procedures, and demonstrate the

many ways that these impact society, the polity, and the economy.

Smart Development for Rural Areas Pearson Education

This Open Access book brings the experiences of automation as part of quotidian life into focus. It asks how, where and when automated technologies and systems are emerging in everyday life across different global regions? What are their likely impacts in the present and future? How do engineers, policy makers, industry stakeholders and designers envisage artificial intelligence (AI) and automated decision-making (ADM) as solutions to individual and societal problems? How do these future visions compare with the everyday realities, power relations and social inequalities in which AI and ADM are experienced? What do people know about automation and what are their experiences of engaging with 'actually existing' AI and ADM technologies? An international team of leading scholars bring together research developed across anthropology, sociology, media and communication studies and ethnology, which shows how by rehumanising automation, we can gain deeper understandings of its societal impacts.

Patient loyalty and its attributes are significant concerns for healthcare industries. Research has been done on this issue in numerous contexts but research in Malaysian healthcare industry is still scarce. This study investigated the relationship between service quality, hospital accreditation on customer satisfaction and customer loyalty. The research examined five factors of service quality: responsiveness, assurance, tangibility, empathy, reliability. This study utilized nonprobability convenient sampling from 20 private hospitals that promote medical tourism in Klang Valley, Malaysia. A total of 378 medical tourists participated in the survey. Statistical tests carried out include descriptive statistics, internal consistency, reliability and validity. Correlation analysis and PLS Structural Equation Modeling (SEM) was also conducted to determine the relationships of the variables. The main finding shows that there is a positive relationship between service quality and customer satisfaction, service quality and customer loyalty, hospital accreditation on customer satisfaction, and customer satisfaction on customer loyalty. However, hospital accreditation has no positive effect on patient loyalty. The findings of this study are useful to managers, board of directors and stakeholders of private hospitals to understand influential factors on patients' satisfaction and loyalty.

Counterterrorism and Cybersecurity Disha Publications

From 9/11 to Charlie Hebdo along with Sony-pocalypse and DARPA's \$2 million Cyber Grand Challenge, this book examines counterterrorism and cyber security history, strategies and technologies from a thought-provoking approach that encompasses personal experiences, investigative journalism, historical and current events, ideas from thought leaders and the make-believe of Hollywood such as 24, Homeland and The Americans. President Barack Obama also said in his 2015 State of the Union address, "We are making sure our government integrates intelligence to combat cyber threats, just as we have done to combat terrorism. In this new edition, there are seven completely new chapters, including three new contributed chapters by healthcare chief information security officer Ray Balut and Jean C. Stanford, DEF CON speaker Philip Polstra and security engineer and Black Hat speaker Darren Manners, as well as new commentaries by communications expert Andy Marken and DEF CON speaker Emily Peed. The book offers practical advice for businesses, governments and individuals to better secure the world and protect cyberspace.

Learn network and data security by analyzing the Anthem breach and step-by-step how hackers gain entry, place hidden software, download information, and hide the evidence of their entry. Understand the tools, establishing persistent presence, use of sites as testbeds to determine successful variations of software that elude detection, and reaching out across trusted connections to the entire healthcare system of the nation. Examine the components of technology being diverted, starting with application code and how to protect it with isolation approaches. Dissect forms of infections including viruses, worms, bots, and Trojans; and encryption with RSA algorithm as the working example.

Health Information for International Travel Jones & Bartlett Learning

This book introduces readers to the current status of smart learning in China by providing extensive and accurate data from different contexts of smart learning. In particular, it investigates smart learning in smart cities, which extends the concept of smart learning to cover both formal and informal learning, and to support life-long learning. With digital technologies and the Internet becoming increasingly integrated into learning, the demand for smart learning has grown steadily,

especially in smart city scenarios. As the need for life-long learning is on the rise, smart learning environments in cities should be equipped to meet people's demands. Smart learning/education is also one of the key applications of smart cities. Though the book's content mainly focuses on the educational technology field, research in cities and industries is also included. This book offers a valuable resource for graduate students in educational technology, smart learning environment and smart city researchers, cooperative university managers, and all others who are interested in smart learning industries.

Each Mock Test contains 150 Passage based newly designed questions. The solution to each and every question has been provided.

YD/T 1700-2007: Translated English of Chinese Standard. (YDT 1700-2007, YD/T1700-2007, YDT1700-2007) Basic Books

This thought-provoking book questions the framework of the Horizon 2020 strategy and the policies of smart development. It aims to answer the following question: Is there any possibility for a policy of smart development and smart specialization in rural and peri-urban areas? Based on detailed analytical studies, empirical and econometric methods, as well as various European case studies, several conclusions are drawn. Smart development policies are well adapted to the developed or intermediate regions containing at the same time rural and urban areas, but do not really function for the more rural or more peripheral regions. The development policies of rural areas must be adapted to their particular characteristics, to the structure of their economies (agriculture, small firms), as well as in their diversity (distant regions, intermediate regions, rural areas near the urban areas). It appears interesting to exploit natural and cultural amenities, to develop the multifunctional character of the agriculture, to promote territorial innovation under all its forms, to favor the synergies between the various uses of land and space, and to develop the knowledge on the ecological, socioeconomic processes, as well as on the mechanisms of territorial governance. These results are very important because they question the validity of the H2020 policy and the smart development and smart specialization policies and their applicability to the whole European area, and not only for the most urban and rich areas. It will be valuable reading for students, researchers and policy-makers in regional development, rural studies, spatial planning and economic geography.

A Guide for Faculty Springer

The two-volume set LNICST 169 and 170 constitutes the thoroughly refereed post-conference proceedings of the Second International Internet of Things Summit, IoT 360° 2015, held in Rome, Italy, in October 2015. The IoT 360° is an event bringing a 360 degree perspective on IoT-related projects in important sectors such as mobility, security, healthcare and urban spaces. The conference also aims to coach involved people on the whole path between research to innovation and the way through to commercialization in the IoT domain. This volume contains 62 revised full papers at the following four conferences: The International Conference on Safety and Security in Internet of Things, SaSelIoT, the International Conference on Smart Objects and Technologies for Social Good, GOODTECHS, the International Conference on Cloud, Networking for IoT systems, CN4IoT, and the International Conference on IoT Technologies for HealthCare, HealthyIoT.
