 Author(s): Herbert Goldstein, Charles P. Poole, John L. Safko So, I
 have tried solving some of the problems of the Chapter 9 of
 Goldstein Classical mechanics.Goldstein- CHAPTER 9 [SOLUTIONS]
 - BragitOff.comClassical mechanics describes the motion of
 macroscopic objects, from projectiles to parts of machinery, and
 astronomical objects, such as spacecraft, planets, stars and
 galaxies.. If the present state of an object is known it is possible
 to predict by the laws of classical mechanics how it will move in
 the future (determinism) and how it has moved in the past
 (reversibility).Classical mechanics - WikipediaFor the Love of
