The

Metamorphosi

s is a novella

by Franz

Kafka, first  
published in  
1915. It has  
been cited as  
one of the  
seminal works  
of fiction of  
the 20th  
century and is  
studied in  
colleges and  
universities

across the  
Western  
world. The  
story begins  
with a  
traveling  
salesman,  
Gregor  
Samsa,  
waking to find  
himself  
transformed

(metamorphosed) into a large, monstrous insect-like creature. The cause of Samsa's transformation is never revealed, and Kafka himself never gave an explanation. The rest of Kafka's novella deals with Gregor's attempts to adjust to his new condition as he deals with being burdensome to his parents and sister, who are repulsed by the horrible, verminous creature Gregor has become.

A critically acclaimed foundational text, *Translation in Systems* offers a comprehensive guide to the descriptive and systemic approaches which have shaped translation studies. Theo Hermans considers translation norms, equivalence, polysystems and social systems, covering a wide range of theorists in his discussion of the principles of translation studies. Reissued with a new foreword by Kathryn Batchelor, which updates the text for a new generation of readers, *Translation in Systems* endures partly on account of Hermans's vivid and articulate writing style. The book covers the fundamental problems of translation norms, equivalence, polysystems and social systems,

<p>encompassing not only the work of Levý, Holmes, Even-Zohar, Toury, Lefevere, Lambert, Bassnett, D'hulst and others, but also giving special attention to contributions derived from Pierre Bourdieu and Niklas Luhmann. Hermans explains how contemporary descriptive approaches came about, what the basic ideas were, how those ideas have evolved over time, and offers a</p>	<p>critique of these approaches. With practical questions of how to investigate translation (including problems of definition, description and assessment of readerships), this is essential reading for graduate students and researchers in translation studies and related areas. <i>The File on H. In the mid-1930s, two Irish Americans travel to the Albanian highlands with

an early model of a marvelous invention, the tape recorder. Their mission? To discover how Homer could have composed works as brilliant and as long as The Iliad and The Odyssey without ever putting pen to paper. The answer, they believe, can be found only in Albania, the last remaining habitat of the oral epic. But immediately upon their arrival, the scholars' seemingly arcane research

excites suspicion and puts them at the center of ethnic strife in the Balkans. Mistaken for foreign spies, they are placed under surveillance and are dogged by gossip and intrigue. It isn't until a fierce-eyed monk from the Serbian side of the mountains makes his appearance that the scholars glimpse the full political import of their search for the key to the Homeric question.

CLAUDE FRDRIC BASTIAT (1801-1850) was one of the most eloquent champions of the concept that property rights and individual freedoms flowed from natural law. Here, in this 1850 classic, a powerful refutation of Karl Marx's Communist Manifesto, published two years earlier, Bastiat discusses: . what is law? . why socialism constitutes legal plunder . the proper

function of the law . the law and morality . "the vicious circle of socialism" . the basis for stable government . and more.

woman enters this other world, becomes the empress of a society composed of various species of talking animals, and organizes an invasion back into her world complete with submarines towed by the "fish men" and the dropping of "fire stones" by the "bird men" to confound the enemies of her homeland, the Kingdom of Esfi.

HarperCollins Works of science fiction and fantasy increasingly explore gender issues, feature women as central characters, and are written by women

writers. This book examines women's contributions to science fiction and fantasy across a range of media and genres, such as fiction, nonfiction, film, television, art, comics, graphic novels, and music. The first volume offers survey essays on major topics, such as sexual identities, fandom, women's writing groups, and feminist spirituality; the second

provides alphabetically arranged entries on more specific subjects, such as Hindu mythology, Toni Morrison, magical realism, and Margaret Atwood. Entries are written by expert contributors and cite works for further reading, and the set closes with a selected, general bibliography. Students and general readers love science fiction and fantasy. And science fiction and

fantasy works increasingly explore gender issues, feature women as central characters, and are written by women writers. Older works demonstrate attitudes toward women in times past, while more recent works grapple with contemporary social issues. This book helps students use science fiction and fantasy to understand the contributions of women

writers, the representation of women in the media, and the experiences of women in society.

This work, by the greatest living authority on medieval palaeography, offers the most comprehensive and up-to-date account in any language of the history of Latin script. It also contains a detailed account of the

role of the book in cultural history from antiquity to the Renaissance, which outlines the history of book illumination. Designed as a textbook, it contains a full and updated bibliography. Because the volume sets the development of Latin script in its cultural context, it also provides an unrivalled introduction to the nature of medieval Latin culture. It will be used extensively in the teaching

of latin palaeography, and is unlikely to be superseded.

Michael

Pupin's was a genuinely American story, the lifelong journey of a boy from rural Serbia, from a town so tiny it appeared on no maps, who became one of the greatest scientists of the early 20th century, changing the lives of people the world over with his technological innovations-he

invented the therapeutic X-ray and made telephone communications practical and inexpensive- and helping to invent the modern world we know today. First published in 1922, Pupin's autobiography won the Pulitzer Prize in 1924, but Pupin's insightful and incisive words are their own greatest recommendation. American physicist and writer

 From Ismail Kadare, winner of the inaugural Man Booker International Prize - a novelist in the class of

Coetzee, Pamuk, Márquez, and Rushdie - the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured

banners,  
hastily  
constructed  
minarets, and  
tens of  
thousands of  
men fill the  
plain below.  
From this  
moment on,  
the world is  
waiting to  
hear that the  
fortress has  
fallen. The  
Siege tells the  
enthraling  
story of the  
weeks and  
months that  
follow - of the  
exhilaration  
and despair of  
the battlefield,  
the constantly  
shifting  
strategies of  
war, and  
those whose  
lives are held  
in the balance,  
from the

Pasha himself  
to the  
artillerymen,  
astrologer,  
blind poet,  
and harem of  
women who  
accompany  
him. "Believe  
me," the  
general said.  
"I've taken  
part in many  
sieges but  
this," he  
waved  
towards the  
castle walls,  
"is where the  
most fearful  
carnage of our  
times will take  
place. And you  
surely know  
as well as I do  
that great  
massacres  
always give  
birth to great  
books. You  
really do have  
an opportunity

to write a  
thundering  
chronicle  
redolent with  
pitch and  
blood, and it  
will be utterly  
different from  
the graceful  
whines  
composed at  
the fireside by  
squealers who  
never went to  
war."  
Brilliantly  
vivid, as  
insightful as it  
is compelling,  
The Siege is  
an  
unforgettable  
account of the  
clash of two  
great  
civilisations,  
and a portrait  
of war that will  
resonate  
across the  
centuries.

Cosimo, Inc. The author examines the indigenous diatonic and chromatic modes used in Albanian urban music and classifies them under traditional headings and as part of a newly established grouping, here termed south-western Balkan modes. The core of the work is the analysis of Albanian urban lyric songs, seen as an artistic version of the traditional Albanian urban songs.

From the moment Lucy met her husband's mother, she knew she wasn't the wife Diana had envisioned for her perfect son. Exquisitely polite,

friendly, and always generous, Diana nonetheless kept Lucy at arm's length despite her desperate attempts to win her over. And as a pillar in the community, an advocate for female refugees, and a woman happily married for decades, no one had a bad word to say about Diana...except Lucy. That was five years ago. Now, Diana is dead, a suicide note found near her body claiming

that she longer wanted to live because of the cancer wreaking havoc inside her body. But the autopsy finds no cancer. It does find traces of poison, and evidence of suffocation. Who could possibly want Diana dead? Why was her will changed at the eleventh hour to disinherit both of her children, and their spouses? And what does it mean that Lucy isn't exactly sad she's gone? Fractured

relationships and deep family secrets grow more compelling with every page in this twisty, captivating new novel from Sally Hepworth.
