CLARA TRISTIN

Assessment in Geographical Education: An International Perspective Heinemann Educational Books

This is an African retelling of Euripides: an unnervingly topical story of a people and a beloved city destroyed by the brutality of war. The play was first performed in Lagos in 2003 under the distinguished director Chuck Mike, and subsequently toured the UK.

"Ogbanje" Twins and Other Stories By: Keemholems Ojei Ejime and Onyishi were born identical, and quite brilliant, twins. Their birth process was witnessed by their helpless, impoverished father in their sitting room. The twins survived, but their mother died just a few minutes after giving birth to them. This tragedy could have been a mirror of their mother's nightmare a few nights before, in which she was in communication with her late father who laid a curse upon her. The pretty twins grew up motherless under the tutelage of their father, Chris, and a maid. Their excellent results in pure sciences in their final high school exams catapulted them into the limelight from obscurity. They secured double scholarships from the state and federal government to study Electronics/Computer Engineering and Medicine respectively, in Cambridge University, Massachusetts, USA. But, by the impulse of man's inhumanity to man, the influence of fate and what appeared like the "Ogbanje" spirit, wriggled out their ugly heads, and needed

God's urgent intervention. In this direction, the awkwardness of man's wickedness to man dimmed a somewhat bright light.

Ron Pickering is a highly experienced teacher with many years' experience of maintaining students' interest in biology. Known for his informative, motivating style and straightforward explanations he maintains the same high level of interest and accessibility in this new book. The content of Complete Biology has been drawn from an analysis of all syllabuses with added material to ensure a match for IGCSE. The content is sufficient to stretch your students aiming for the top grades without sacrificing ease of understanding. · Double-page spreads increase accessibility · Questions on every spread for students to check their understanding, and learning objectives at the beginning to quickly identify relevant pages · Plenty of examination style questions set at two levels · Provides an excellent foundation for students wishing to progress to A-Level Biology · Allows students to appreciate the everyday importance of Biology

Harvest of Corruption Simon and Schuster

An exploration of dreams as a spiritual source of healing and inner guidance for your health and well-being • 2018 Nautilus Silver Award • Shares stories--confirmed by pathology reports--from subjects in medical research projects whose dreams diagnosed illness and helped heal their lives •

Explores medical studies and ongoing research on the diagnostic power of precognitive dreams, including Dr. Burk's own medical research • Includes an introduction to dream journaling and interpretation techniques Your dreams can provide inner guidance filled with life-saving information. Since ancient Egypt and Greece, people have relied on the art of dreaming to diagnose illness and get answers to personal life challenges. Now, dreams are making a grand reappearance in the medical arena as recent scientific research and medical pathology reports validate the diagnostic abilities of precognitive dreams. Are we stepping back into the future as modern medical tests show dreams can be early warning signs of cancer and other diseases? Showcasing the important role of dreams and their power to detect and heal illness, Dr. Larry Burk and Kathleen O'Keefe-Kanavos share amazing research and true stories of physical and emotional healings triggered by dreams. The authors explore medical studies and ongoing research on the diagnostic power of precognitive dreams, including Dr. Burk's own research on dreams that come true and can be medically validated. They share detailed stories--all confirmed by pathology reports--from subjects in medical research projects whose dreams diagnosed illness and helped heal their lives, including Kathleen's own story as a three-time breast cancer survivor whose dreams diagnosed her cancer even when it was missed by her doctors. Alongside these stories of survival and faith, the authors also include an introduction to dream journaling and interpretation, allowing the reader to develop trust in their dreams as a spiritual source of healing and inner guidance.

Curbing Social Ills Through Effective Education Springer Nature

The study was led by six research questions, and six hypotheses were examined at a significance level of 0.05. The quasi-experimental design was used, notably the non-equivalent control group design for the pretest and posttest. 4,873 senior secondary school students in the Nnewi Education Zone of the state of Anambra make up the study's population. In the study, 2.73 percent of the population was used. A sample of 133 Nnewi Education Zone SS2 computer science students was used. The Computer Studies Department and one knowledgeable computer studies teacher from Nnewi. Kuder-Richardson Formula 20 was used to determine the instrument's reliability. The CSAT was used as a pretest and posttest to gather data. Three weeks following the post test, the retention test was given. The results demonstrated that a lesson followed by animated media education greatly improved students' computer science performance. When compared to the traditional approach, only tutorials considerably increased students' retention, however, this improvement was not significant when compared to animated media. The study concluded that tutorials are successful at raising students' achievement and retention. The use of animated material in the classroom has been shown to improve student achievement.

National Assembly Debates Random House

School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research-informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning and the form of practical work that is strongly advocated is inquiry-based learning, which signals a definite paradigm shift from the traditional teacher-dominated to a learner-centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers and post-graduate students in the fields of science education and educational policy.

Perspectives on Education and Science Teaching Learning Express (NY)

This volume deals with the propagation of three-dimensional shock waves and their reflection from curved walls. It is divided into two parts. The first part presents a ray method. This is based on the expansion of fluid properties in power series at an arbitrary point on the shock front. Continuous fractions are used. Results for shock propagation in non-uniform fluids are given. The second part discusses the shock reflection from a concave body. The important shock-focusing problem is included. The work is supported by both numerical and experimental results. Many interesting features, such as formation of a jet, vortices and the appearance of disturbances on the shock front, are discussed. Besides shock waves in gases, the distinctive features of shock propagation through a weakly ionized plasma are considered.

CPCE Practice Questions are the simplest way to prepare for the CPCE test. Practice is an essential part of preparing for a test and improving a test taker's chance of success. The best way to practice taking a test is by going through lots of practice test questions. If someone has never taken a practice test, then they are unprepared for the types of questions and answer choices that they will encounter on the official test. There is a tremendous advantage to someone taking the test that is already familiar with the questions and answer choices. Another advantage of taking practice tests is that you can assess your performance and see if you need to study and practice more, or if you're already prepared enough to achieve success on your test day. If you do well on the practice test, then you know you're prepared. If you struggle on the practice test, then you know you may still have more work to do to get prepared. Taking lots of practice tests helps ensure that you are not surprised or disappointed on your test day. Our CPCE Practice Questions give you the opportunity to test your knowledge on a set of questions. You can know everything that is going to be covered on the test and it will not do you any good on test day if you have not had a chance to practice. Repetition is a key to success and using practice test questions allows you to reinforce your strengths and improve your weaknesses. Detailed answer explanations are also included for each question. It may sound obvious, but you have to know which questions you missed (and more importantly why you missed them) to be able to avoid making the same mistakes again when you take the real test. That's why our CPCE Practice Questions include answer keys with detailed answer explanations. These in-depth answer explanations will allow you to better understand any questions that were difficult for you or that you needed more help to understand.

Dreams That Can Save Your Life Doubleday

The role humans play in the field of information technology continues to hold relevance even with the industry's rapid growth. People contribute heavily to the physical, cognitive, and organizational domain of computing, yet there is a lack of exploration into this phenomenon. Humanoid aspects of technology require extensive research in order to avoid marginalization and insufficient data. The Handbook of Research on the Role of Human

Factors in IT Project Management is a collection of innovative research on the methods and applications of the task of human characteristics in the design and development of new technology. While highlighting topics including digitalization, risk management, and task analysis, this book is ideally designed for IT professionals, managers, support executives, project managers, managing directors, academicians, researchers, and students seeking current research on the dynamics of human influence in technological projects.

Tambari Dorrance Publishing

In recent years there has been increased attention paid to the importance of assessment in Geographical Education, the chosen subject for this book. Assessment is an important tool for collecting information about student learning and for providing timely data to inform key stakeholders including students, teachers, parents and policymakers. To be effective, assessment needs to be valid, reliable and fair. Validity is about ensuring that we assess what we claim we are assessing. Reliability is about measuring performance and understanding in a consistent way. Without validity and reliability, assessment is unlikely to provide equitable opportunities for students to demonstrate what they know and can do. As geography educators it is therefore important that we identify the core concepts and skills in geography that we want students to master. We need a clear understanding of what the progression of learning looks like for each concept and skill so we can develop fit for purpose assessments that track and improve student learning. While there is a substantial literature on evidence-based assessment in secondary school contexts, research exploring best-practice assessment in geography is rare. This is a concern given the distinctive nature of geography and the important role of assessment in the learning process. This scholarly collection seeks to address this issue by connecting research in educational assessment with the domain of geography. The chapters are written by leading researchers in Geographical Education from across the globe. These chapters provide examples of innovation through the collective voices of geography teacher educator scholars from across Australia, USA, South Korea, Germany, Switzerland and Singapore. What unifies the work in this book, is that each chapter focuses on a key feature of the discipline of geography, providing scholarly examples of evidence-based practices for assessing student's knowledge and skills.

Blessings Xlibris Corporation

"Chukwuebuka Ibeh's writing has a certain delicacy to it, so wonderfully observant, and so beautiful." —Chimamanda Ngozi Adichie, author of *Americanah* Moonlight meets Purple Hibiscus in this searing debut of self-acceptance, sexual awakening, and first love set in a Nigeria on the verge of criminalizing same-sex relationships Obiefuna has always been the black sheep of his family—sensitive where his father, Anozie, is pragmatic, a dancer where his brother, Ekene, is a natural athlete. But when Obiefuna's father witnesses an intimate moment between his teenage son and another boy, his deepest fears are confirmed, and Obiefuna is banished to boarding school. As he navigates his new school's strict hierarchy and unpredictable violence, Obiefuna both finds and hides who he truly is. Back home, his mother, Uzoamaka, must contend with the absence of her beloved son, her husband's cryptic reasons for sending him away, and the hard truths that they've all been hiding from. As Nigeria teeters on the brink of criminalizing same-sex relationships, Obiefuna's identity becomes more dangerous than ever before, and the life he wants drifts further out of reach. Set in post-military Nigeria and culminating in the Same Sex Marriage Prohibition Act of 2013, Blessings is an elegant and exquisitely moving story that asks how to live freely in a country that forbids one's truest self, and what it takes for love to flourish despite it all.

"Ogbanje" Twins and Other Stories Simon and Schuster

#1 NEW YORK TIMES BESTSELLER • David Brooks challenges us to rebalance the scales between the focus on external success—"résumé virtues"—and our core principles. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE ECONOMIST With the wisdom, humor, curiosity, and sharp insights that have brought millions of readers to his New York Times column and his previous bestsellers, David Brooks has consistently illuminated our daily lives in surprising and original ways. In *The Social Animal*, he explored the neuroscience of human connection and how we can flourish together. Now, in *The Road to Character*, he focuses on the deeper values that should inform our lives. Looking to some of the world's greatest thinkers and inspiring leaders, Brooks explores how, through internal struggle and a sense of their own limitations, they have built a strong inner character. Labor activist Frances Perkins understood the need to suppress parts of herself so that she could be an instrument in a larger cause. Dwight Eisenhower organized his life not around impulsive self-expression but considered self-restraint. Dorothy Day, a devout Catholic convert and champion of the poor, learned as a young woman the vocabulary of simplicity and surrender. Civil rights pioneers A. Philip Randolph and Bayard Rustin learned reticence and the logic of self-discipline, the need to distrust oneself even while waging a noble crusade. Blending psychology, politics, spirituality, and confessional, *The Road to Character* provides an opportunity for us to rethink our priorities, and strive to build rich inner lives marked by humility and moral depth. "Joy," David Brooks writes, "is a byproduct experienced by people who are aiming for something else. But it comes." Praise for *The Road to Character* "A hyper-readable, lucid, often richly detailed human story."—The New York Times Book Review "This profound and eloquent book is written with moral urgency and philosophical elegance."—Andrew Solomon, author of *Far from the Tree* and *The Noonday Demon* "A powerful, haunting book that works its way beneath your skin."—The Guardian "Original and eye-opening . . . Brooks is a normative version of Malcolm Gladwell, culling from a wide array of scientists and thinkers to weave an idea bigger than the sum of its parts."—USA Today

Crossing the Bar World Scientific

This text emerges out of the need to share information and knowledge on the research and practices of using multimedia in various educational settings. It discusses issues relating to planning, designing and development of interactive multimedia, offering research data.

Research and Development in Nigeria IGI Global

WAEC in Review is a practical intervention strategy in transforming the weakening educational system of Liberia where academic excellence is unceasingly diminishing. LIPACE Pilot Study Guide is not only a landmark achievement in the educational history of Liberia but a remarkable strive towards the proper preparation of Liberian students for future diets of the WAEC exam. As a member of the National Committee of the West African

Examinations Council and a Stakeholder in the Liberian Education System, I wish to recommend the use of this study guide to adequately prepare each and every Liberian student for future examinations thereby setting the stage for an easy transition to the emerging West African Senior Secondary Examinations (WASSCE). I am explicitly confident that you will definitely find your journey through this guide very rewarding as you prepare to sit the next WAEC Exam.—David S. Massaquoi, Sr., director of Education, The Salvation Army-Liberia Command Education Secretariat Our students sit the exam in constant fear of proctors and supervisors. They know nothing about the exam and its structure and this fear lead to them failing massively. We need to build the confidence level of our students and help them to study hard and understand the roles of proctors and

supervisors to stop the intimidation during the exam. Thanks to LIPACE and the "Turning the Tide" project, we have helped our students achieved an amazing achievement for the first time in the history of Gbarpolu County where all senior students successfully passed the exam.—Lartey Bemah, principal of Bopolu Public School (2012-2013), Gbarpolu County, Liberia
