Museum Dramatists Play Service, Inc. Today, it is nearly impossible to talk about the best basketball players in America without acknowledging the accomplishments of incredibly talented black athletes like Magic Johnson, Michael Jordan, and Kobe Bryant. A little more than a century ago, however, the game was completely dominated by white players playing on segregated courts and teams. In *Breaking Barriers: A History of Integration in Professional Basketball*, Douglas Stark details the major moments that led to the sport opening its doors to black players. He charts the progress of integration from Bucky Lew—the first

black professional basketball player in 1902—to the modern game played by athletes like Stephen Curry and LeBron James. Although Stark focuses on the official integration of basketball in the late 1940s, the story does not end there. Over the past 60-plus years, black athletes have continued to change the game of basketball in terms of style, social progress, and marketability. Spanning the early 1900s to the present day, no other book features such a comprehensive examination of the key events and figures that led to the integration of professional basketball. In *Breaking Barriers*, these crucial steps in the history of the sport are placed within the larger context of American history, making this book an essential addition to the literature on sports and race in America.

At a bus stop in a run-down New Jersey town, Darja, a Polish immigrant cleaning lady, is done talking about feelings; it's time to talk money. Over the course of 20 years, and three relationships, Darja negotiates for her future with men who can offer her love or security, but never both. Award-winning playwright Martyna Majok's *IRONBOUND* is a darkly funny, heartbreaking portrait of a woman for whom love is a luxury—and a liability—as she fights to survive in America. *MotorBoating* Morgan James Publishing Important American periodical dating back to 1850. *Bureau of Ships Journal* Artisan Books Since the demise of the Soviet Union, and, to a greater degree, after the collapse of apartheid in South Africa, interest in the transition from mass atrocity has swelled, but produced few systematic philosophical

discussions of the notion of reconciliation until this work.

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

When Friedman moved to New York City, he missed the dogs that had surrounded him growing up. He began photographing dogs on the street, and posting them on his blog, The Dogist. Whether because of the look in a dog's eyes, its innate beauty, or even the clothes its owner has dressed it in, every portrait in this book tells a story and explores the dog's distinct character and spirit.

Breaking Barriers

China's maritime "gray zone" operations represent a new challenge for the U.S. Navy and the sea services of our allies,

partners, and friends in maritime East Asia. There, Beijing is waging what some Chinese sources term a "war without gunsmoke." Already winning in important areas, China could gain far more if left unchecked. One of China's greatest advantages thus far has been foreign difficulty in understanding the situation, let alone determining an effective response. With contributions from some of the world's leading subject matter experts, this volume aims to close that gap by explaining the forces and doctrines driving China's paranaival expansion, operating in the "gray zone" between war and peace. The book covers China's major maritime forces beyond core gray-hulled Navy units, with particular focus on China's second and third sea forces: the "white-hulled" Coast Guard and "blue-hulled" Maritime Militia. Increasingly, these paranaival forces, and the "gray zone" in which they typically operate, are on the frontlines of China's seaward expansion.

The inside stories of the Apollo program and the lives of astronauts, as told to the author by the men themselves—with a forward by astronaut Charlie Duke.

Between 1969 and 1972, twelve people walked on the surface of the Moon. Twelve others flew over its majestic surface. They

were the sons of ordinary individuals. But they believed anything was possible—and they proved it to the entire world.

Fascinated by these men—heroes such as Alan Shepard, Neil Armstrong, Buzz Aldrin, and many others—airline pilot Lukas Viglietti personally recorded their testimonies, becoming a close friend and confidant to many of them in the process. Now he shares his exclusive and unprecedented insight into their adventures and the Apollo program overall in *Apollo Confidential*.
