Business Partnership Essentials St. Martin's Press

A fun, interactive book for couples -- with questions and prompts that can inspire new insight, communication, a little self-deprecation, and plenty of laughter. Think you know what makes your partner tick? What makes them laugh uncontrollably? What their secret likes and dislikes are? The things that make them the happiest -- or most irritated? This fill-in journal -- designed for two -- features a mix of irreverent and serious questions that promote open communication and bonding, all with the fun of getting closer (even if you think you know everything about them already!) A little bit The Book of Questions, with a modern nod to the classic Newlywed Game, it's designed in a "flip" book format so couples can answer questions, predict what their partner will say, then share and compare. Even if you can't read your partner's mind, this is the next best thing!

A QUIZ BOOK FOR COUPLES Simon and Schuster

This book is a practical guide to using the science of attachment and relationships to find the right life partner. If you were brought up in the Western world, you've been trained on fairy tales of love and relationships that are misleading at best, and at worst have you making mistake after mistake in starting relationships with the wrong kinds of people who will waste your time and keep you from finding a loyal partner. Science has the answer! Or at least a guide to save you the time and effort of discovering for yourself how many wrong types of romantic partners there are. Reading this book will help you recognize the signs of some of the syndromes that prevent people from being good partners. We'll go through those syndromes and point out some of the signs. Those little red flags you sometimes notice when you are getting to know someone? Often they speak loud and clear once you understand the types, and you can decide immediately to run away or approach with caution those who show them. If you're young and just starting to look for a partner, good news-the world is swarming with well-adjusted, charming matches for you, if you know how to recognize them. The bad news: you are inexperienced and you may not recognize the right type of person when you date them. Many people expect to experience an

immediate sense of excitement, an overwhelming rush of attraction, and to fall in love rapidly and equally with someone who feels the same. This rarely happens, and when it does it usually ends badly! And expecting it will cause you to let go of people who are steady, loving, and attentive, if you had given them a chance. So once you've identified someone who makes you laugh, answers your messages, and is there for you when you want them, don't make the mistake of tossing them aside for the merely good-looking, sexy, or intriguing stranger. If you're older, bad news: while you were spending time and effort on relationships you were hoping would turn out better, or even happily nestled in a good relationship or two, most of the secure, reliable, sane people in your age group got paired off. They're married or happily enfamilied, and most of the people your age in the dating pool are tragically unable to form a good long-term relationship. You should always ask yourself, "why is this one still available?"-there may be a good answer (recently widowed or left a long-term relationship), or it may be that this person has just been extraordinarily unlucky in having over twenty short relationships in twenty years (to cite one case!) But it's far more likely you have met someone with a problematic attachment style. As you age past 40, the percentage of the dating pool that is able to form a secure, stable relationship drops to less than 30%[1]; and since it can take months of dating to understand why Mr. or Ms. SeemsNice is really the future ex-partner from Hell, being able to recognize the difficult types will help you recognize them faster and move on to the next. This book outlines the basics (which might be all you need), and points you toward more resources if you want to understand more about your problem partner. If you're wondering if the guy or girl you've been hanging out with might not be quite right, this is the place to match those little red flags you've noticed with known bad types. And by getting out fast, you can avoid emotional damage and wasted time, and get going on finding someone who's really right for you. Study all of the bad types and you'll detect them before even getting involved. Or you could be one of the few people who recognizes their own problems in one of these types. There are study materials and plans of action for you, too. If you've had lots of relationships and they all seem to go wrong, the common factor is you! Your task is to make yourself into a better partner - a goal that even the most evolved of us can always work toward.

An Interagency Threat Assessment Coordination Group (ITACG) Progress Report : Hearing Before the Subcommittee on Intelligence, Information Sharing, and Terrorism Risk Assessment of the Committee on Homeland Security, House of Representatives, One Hundred Tenth Congress, Second Session, March 13, 2008 Little, Brown Spark

"What the heck is my partner thinking?" is a common refrain in romantic relationships, and with good reason. Every person is wired for love differently, with different habits, needs, and reactions to conflict. The good news is that most people's minds work in predictable ways and respond well to security, attachment, and rituals, making it possible to actually neurologically prime the brain for greater love and fewer conflicts. *Wired for Love* is a complete insider's guide to understanding a partner's brain and promoting love and trust within a romantic relationship. Readers learn ten scientific principles they can use to avoid triggering fear and panic in their partners, manage their partners' emotional reactions when they do become upset, and recognize when the brain's threat response is hindering their ability to act in a loving way. By learning to use simple gestures and words, readers can learn to put out emotional fires and help their partners feel more safe and secure. The no-fault view of conflict in this book encourages readers to move past a "warring brain" mentality and toward a more cooperative "loving brain" understanding of the relationship. Based in the sound science of neurobiology, attachment theory, and emotion regulation research, this book is essential reading for couples and others interested in understanding the complex dynamics at work behind

love and trust in intimate relationships.
