For decades fruit growers have sprayed their trees with toxic chemicals in an attempt to control a range of insect and fungal pests. Yet it is possible to grow apples responsibly, by applying the intuitive knowledge of our great-grandparents with the fruits of modern scientific research and innovation. Since *The Apple Grower* first appeared in 1998, orchardist Michael Phillips has continued his research with apples, which have been called "organic's final frontier." In this new edition of his widely acclaimed work, Phillips delves even deeper into the mysteries of growing good fruit with minimal inputs. Some of the cutting-edge topics he explores include: The use of kaolin clay as an effective strategy against curculio and borers, as well as its limitations

Creating a diverse, healthy orchard ecosystem through understory management of plants, nutrients, and beneficial microorganisms How to make a small apple business viable by focusing on heritage and regional varieties, value-added products, and the "community orchard" model The author's personal voice and clear-eyed advice have already made *The Apple Grower* a classic among small-scale growers and home orchardists. Charles Ewen and John Hann chronicle the discovery and excavation of the only known campsite of Hernando de Soto's ten-state odyssey during the sixteenth century. Located in downtown Tallahassee in sight of the state capitol, the site was rescued at the last minute from developers - a story almost as compelling as that of de Soto's expedition. The book has three parts: historical

background, archaeological excavations at the site, and a retranslation of the sixteenth-century narratives relating to the winter encampment. A prologue and epilogue fit the work into the wider context of the Contact Period. Of particular interest is the authors' discussion of the discovery, excavation, and preservation of the site. Showing how luck and timing are crucial factors in some important discoveries, they describe the interaction of archaeologists with private developers, state and city government, and the public and the media. Although it contains information that will be useful to scholars, the book is written in a popular style that makes it accessible to general readers.

Since the early 1980s, a prominent and consistent conclusion drawn from research on China's defense-industrial complex has been that China's defense-production capabilities are rife with weaknesses and limitations. This study argues for an alternative approach: From the vantage point of 2005, it is time to shift the focus of current research to the gradual improvements in and the future potential of China's defense-industrial complex. The study found that China's defense sectors are designing and producing a wide range of increasingly advanced weapons that, in the short term, are relevant to a possible conflict over Taiwan but also to

China's long-term military presence in Asia. Part of a larger RAND Project AIR FORCE study on Chinese military modernization, this study examines the current and future capabilities of China's defense industry. The goals of this study are to 1.

Warned by a Hong Kong fortune-teller not to risk flying for a whole year, Tiziano Terzani — a vastly experienced Asia correspondent — took what he called “the first step into an unknown world. . . . It turned out to be one of the most extraordinary years I have ever spent: I was marked for death, and instead I was reborn.” Traveling by foot, boat, bus, car, and train, he visited Burma, Thailand, Laos, Cambodia, Vietnam, China, Mongolia, Japan, Indonesia, Singapore, and Malaysia. Geography expanded under his feet. He consulted soothsayers, sorcerers, and shamans and received much advice — some wise, some otherwise — about his future. With time to think, he learned to understand, respect, and fear for older ways of life and beliefs now threatened by the crasser forms of Western modernity. He rediscovered a place he had been reporting on for decades. And it reinvigorated him. The result is an immensely engaging, insightful, and idiosyncratic journey, filled with unexpected delights and strange encounters. A bestseller and major prizewinner in Italy, *A Fortune-Teller Told Me* is a powerful warning against the new missionaries of materialism. *The Electronic Silent Spring* Chelsea Green Publishing
 “A masterful depiction of the party today. . . . McGregor illuminates the most important of the contradictions and paradoxes. . . . An entertaining and insightful portrait of China’s secretive rulers.” —The Economist “Few outsiders have any realistic sense of the innards, motives, rivalries, and fears of the Chinese Communist leadership. But we all know much more than before, thanks to Richard McGregor’s illuminating and richly-textured look at the people in charge of China’s political machinery. . . . Invaluable.” — James Fallows, National Correspondent for The Atlantic In this provocative and illuminating account, Financial Times reporter Richard McGregor offers a captivating portrait of China’s Communist Party, its grip

on power and control over China, and its future. China’s political and economic growth in the past three decades has been one of astonishing, epochal dimensions. The most remarkable part of this transformation, however, has been left largely untold—the central role of the Chinese Communist Party. McGregor delves deeply into China’s inner sanctum for the first time, showing how the Communist Party controls the government, courts, media, and military and keeps all corruption accusations against its members in-house. The Party’s decisions have a global impact, yet the CCP remains a deeply secretive body, hostile to the law and unaccountable to anyone or anything other than its own internal tribunals. It is the world’s only geopolitical rival of the United States, and is primed to think the worst of the West.
