During the 1990s, as the Internet in general and e-mail in particular grew in popularity as a means of communication, a number of Cameroonians residing in various parts of the world established a vibrant and lively electronic forum for the discussion of various issues related to their native land. The forum, known as Camnet, demonstrated that Cameroonians living abroad could actively participate in the political, economic and social processes taking place at home. This ability to remain actively engaged in the development of one's nation through the Internet is what Endeley calls virtual activism. Camnet thus distinguished itself as the first and most influential breeding ground for Cameroonian virtual activism. Although Camnet appeared to be dominated by political discussions, it was a truly multi-dimensional forum. No topic was explicitly forbidden and on some occasions the participants conducted extensive debates on issues that had nothing to do with Cameroon or with politics. In this publication, however, the author has chosen to present only a representative sample of his own contributions from the late 1990s with a direct bearing on Cameroon's development. Some of the contributions are in French and in order to reflect the bilingual nature of the debates that took place on Camnet, these have not been translated into English. The informed reader will be struck by the issues which were being debated over 15 years ago as well as by the fact that some of the predictions the author made in the 1990s are a reality today.

My Revision Notes: City & Guilds Level 2 Technical Certificate in Electrical Installation (8202-20) Routledge

This popular guide focuses on common misconceptions in the application of the IET Wiring Regulations. It explains in clear language those parts of the regulations that most need simplifying, outlining the correct procedures to follow and those to avoid. Emphasis has been placed on areas where confusion and misinterpretation are common, such as earthing and bonding, circuit design and protection, and in particular the increased use of RCDs. With the coverage carefully matched to the syllabus of the City & Guilds Certificate in the Requirements for Electrical Installations (2382-12 and 2382-15) and containing sample exam questions and answers, this book is also an ideal revision guide.

This book examines women's activism in the early years of independent Indonesia when new attitudes to gender, nationalism, citizenship and democratization were forming. It questions the meaning of democratization for women and their relationship to national sovereignty within the new Indonesian state, and discusses women's organizations and their activities; women's social and economic roles; and the different cultural, regional and ethnic attitudes towards women, while showing the failure of political change to fully address women's gender interests and needs. The author argues that both the role of nationalism in defining gender identity and the role of gender in defining national identity need equal recognition.
