Obama during the wars in Iraq and Afghanistan. When Robert M. Gates received a call from the White House, he thought he'd long left Washington politics behind: After working for six presidents in both the CIA and the National Security Council, he was happily serving as president of Texas A&M University. The Stanford Task Force Report on Preventive Force, by Abraham D. Sofaer, offers a practical guide to identifying and considering the issues relevant to preventive uses of force. The report seeks to ensure that such uses of force, if undertaken, will advance national and international security and the purposes of the United Nations Charter. The report examines the legitimacy, dangers, and limitations of preventive force and concludes by encouraging states and decision makers to undertake a systematic appraisal of the merits of any threat or use of preventive force based, not only on legal standards, which have proved an ineffective guide, but also on standards related to legitimacy, such as the consistency of proposed actions with the U.N. Charter and established norms of conduct.

SQL Injection Attacks and Defense Cumberland House Publishing

It is estimated that every year 400,000 to 500,000 Americans use a firearm to defend themselves from violent attacks. Often lost in the statistics, however, is the dynamic of what happens when ordinary, law-abiding citizens are assaulted. What thoughts and feelings go through their minds as the events unfold? How do they react when suddenly thrust into life-or-death situations? The Best Defense is a collection of fascinating human interest stories of people who successfully used firearms to defend themselves and others against violent assaults. From Ohio, Florida, and Virginia to Missouri, Texas, Mississippi, and Montana, here is a dramatic portrait of what is at stake in the fight against crime at the level it occurs: victim vs. perpetrator. Here is living proof--thankfully living--that citizens do not have to be helpless in the face of crime and that

in many cases self-defense proves to be law-abiding citizens' only opportunity to save themselves and their loved ones.

Why and how America's defense strategy must change in light of China's power and ambition Elbridge A. Colby was the lead architect of the 2018 National Defense Strategy, the most significant revision of U.S. defense strategy in a generation.

Here he lays out how America's defense must change to address China's growing power and ambition. Based firmly in the realist tradition but deeply engaged in current policy, this book offers a clear framework for what America's goals in confronting China must be, how its military strategy must change, and how it must prioritize these goals over its lesser

interests. The most informed and in-depth reappraisal of America's defense strategy in decades, this book outlines a rigorous but practical approach, showing how the United States can prepare to win a war with China that we cannot afford to lose—precisely in order to deter that war from happening.
