popular methodology
developed by world-
renowned authors
Christina Latham-Koenig
and Clive Oxenden:
language + motivation =
opportunity. With

grammar, vocabulary, and pronunciation practice in every lesson, students are equipped with a solid foundation for successful speaking. Plus - an array of digital resources provides even more choice and flexibility. Students can learn in the classroom or on the move with Online Practice. language assessment. The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the

equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the

field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor

Emeritus, Applied Linguistics Program, Iowa State University.

the need for a coherent account that: traces the origins and growth of the movement summarizes the research that has been conducted highlights the challenges faced by nonnative speaker teachers promotes NNS teachers' professional growth. No discussion of world Englishes or the spread of English internationally is now complete without reference to the NNS movement.
