Enduring Success addresses a key question in business today: How can companies succeed over time? To learn the source of enduring greatness, author Christian Stadler directed a team of eight researchers in a six-year study of some of Europe's oldest and most stellar companies, targeting nine that have survived for more than 100 years and have significantly outperformed the market over the past fifty years. Readers may wonder, "Why European companies?" Yet, Europe is the ideal place to seek the key to long-term success; half of the Fortune Global 500 companies that are 100 years old or older can be found in Europe, as can 72 of the 100 oldest family businesses in the world. Fifteen years after Collins and Porras' Built to Last, this new book incorporates fresh insights from management science and provides the first non-US perspective on long-range success. Through Stadler's study, a counterintuitive story emerges: the greatest companies adapt to a constantly changing environment by being intelligently conservative. Enduring Success provides a

coherent framework, grounded in five principles and practical concepts, for business leaders who are prepared to learn from the history of some of the world's greatest institutions. View the author's YouTube channel for more discussion of the book.

Innovative as it is, the blockchain technology is getting more and more attention and an increasing number of applications have emerged. This book elaborates on both the design thinking ideas and technical details in blockchain and smart contracts to help readers delve into the conceptual framework and understand why blockchain is designed as such and how it makes the current system decentralised yet effective. Having this understanding lays the ground for further analysis of blockchain-based solutions and innovative fintech applications. Topics covered in this book include blockchain structure, blockchain ecosystem, design thinking for blockchain, smart contract, fintech and financial services, solution-based problem solving, fintech valuation, and current issues faced such as privacy protection and solution selection, with the aid of real-life examples and hands-on exercises. Blockchain and Smart Contracts serves as a valuable guide for researchers and practitioners who have interests in the blockchain, smart contract, fintech innovation and

applications, design thinking, and technical details. This book is particularly written for anyone who has no technical background and is searching for an initiation into the deep end of blockchain.

Those with business, finance and economic interests will find this interesting and easy to digest.

Environment and Health in Sub-Saharan Africa: Managing an Emerging Crisis Old Pond Publishing

The glossary presented here is not intended as a final or complete compilation. It does, however, provide a fairly comprehensive list of the generally accepted terminology of glaciology, arctic geology, and arctic operations. It has been prepared with the special needs of the submariner in mind, and is derived in part from two glossaries published by the Scott Polar Research Institute.

Build it Yourself, with Help from RECOIL! There's supreme satisfaction in do-it-yourself firearms projects, and here, in the first book of its kind, the editors from RECOIL Magazine have compiled some of the best information ever published on everything from completing a gun based on an 80 percent lower to building your own suppressor and just about every other type of DIY project you can imagine. Whether you're a seasoned gunsmith or weekend tinkerer, you'll find something here that you can use. Inside this detailed volume: - Explore the world of gun builds, kits and

modifications. - Learn how the experts maintain their firearms - Get a primer on making knives and other striking implements - The real science behind constructing homebuilt suppressors Bonus info on gun storage, building a rifle range, constructing target stands on a budget and much more is guaranteed to inspire your inner firearms genius. If you're planning your next firearms project, don't just do it yourself, do it with RECOIL!

This illustrated work covers the stories of five British engineering companies that produced successful ranges of agricultural, earthmoving or construction machinery. County, Doe, Chaseside, Muir-Hill, Matbro and Bray all made extensive use of the Ford tractor skid unit as a basis for their machines and they pioneered the development of the four-wheel drive agricultural tractor in Britain. Stuart Gibbard gives details of all the main models and machines of these manufacturers. He chronicles the fortunes of the firms from the beginning of the 20th century to the present day and discusses many of the personalities involved.

For those who develop or use knowledge-based agricultural systems, Plant and Stone start with the basic principles of rule-based expert systems, and then explain how these systems can be applied to the rule-based diagnosis of plant crop diseases, the linking of simulation models to expert systems to determine optimum planting dates, designing and testing pest management strategies using a hybrid simulation and rule-based irrigation scheduling, and model-based reasoning systems to diagnose plant stress. An Invaluable Reference for Members of the Drilling Industry, from Owner-Operators to Large Contractors, and Anyone Interested In Drilling Developed by one of the world's leading authorities on drilling technology, the fifth edition of [The Drilling Manual](#) draws on industry expertise to provide the latest drilling methods, safety, risk management, and management practices, and protocols. Utilizing state-of-the-art technology and techniques, this edition thoroughly updates the fourth edition and introduces entirely new topics. It includes new coverage on occupational health and safety, adds new sections on coal seam gas, sonic and coil tube drilling, sonic drilling, Dutch cone probing, in hole water or mud hammer drilling, pile top drilling, types of grouting, and improved sections on drilling equipment and maintenance. New sections on drilling applications

include underground blast hole drilling, coal seam gas drilling (including well control), trenchless technology and geothermal drilling. It contains heavily illustrated chapters that clearly convey the material. This manual incorporates forward-thinking technology and details good industry practice for the following sectors of the drilling industry: Blast Hole Environmental Foundation/Construction Geotechnical Geothermal Mineral Exploration Mineral Production and Development Oil and Gas: On-shore Seismic Trenchless Technology Water Well The Drilling Manual, Fifth Edition provides you with the most thorough information about the "what," "how," and "why" of drilling. An ideal resource for drilling personnel, hydrologists, environmental engineers, and scientists interested in subsurface conditions, it covers drilling machinery, methods, applications, management, safety, geology, and other related issues.

[Insights and Innovations in Structural Engineering, Mechanics and Computation](#) comprises 360 papers that were presented at the Sixth International Conference on Structural Engineering, Mechanics and Computation (SEMC 2016, Cape Town, South Africa, 5-7 September 2016). The papers reflect the broad scope of the SEMC conferences, and cover a wide range of engineering structures (buildings, bridges, towers, roofs, foundations, offshore structures, tunnels, dams, vessels, vehicles and machinery) and engineering materials (steel, aluminium, concrete, masonry, timber, glass, polymers, composites, laminates, smart materials).

[Insights and Innovations in Structural Engineering, Mechanics and Computation](#) Springer Science & Business Media

Describes the technology used in Mesopotamia to improve agriculture, construction, transportation, writing, and mathematics.

Allied Publishers

This book is the second edited compilation of selected, refereed papers submitted to ERTEP 2007.

The book is organized into 10 chapters along four of the key themes that were discussed at the conference: Environmental Health Management; Mining and Environment; Environmental Monitoring and Policy Development; and Sustainability and Social Responsibility. It is hoped that the contents of the book will provide an insight into some of the environmental and health management challenges confronting the developing world and the steps being taken to address them. The first three chapters under the Environmental Health and Management theme discusses issues related to food security and related environmental distress in sub-Saharan Africa. Chapter 1 argues that pervasive poverty and low agricultural productivity are important factors in understanding food insecurity in the region, and broader global processes are examined. This chapter maintains that while poverty undermines individual and household access to sufficient food through market purchase, land inequalities, corruption, structural adjustment programs, civil conflict, HIV/AIDS and the role of the World Trade Organization Agreement on Agriculture are decisive. The authors argue that achieving food security in sub-Saharan Africa requires policies and actions that are integrated with efforts to reduce poverty, enhance livelihoods and incomes and increase agricultural output, while also paying attention to underlying structural factors that bear on agriculture in the region.
