 Ringo Starr was the genuine working-class member of the Beatles. Born into poverty in a tiny house in Liverpool's Dingle area, deserted by his father, he suffered years of illness which seriously affected his schoolwork. Despite having all the odds against him, he became one of the most famous people on the planet. The Ringo Starr Encyclopedia completes the Virgin series on the individual Beatles and in the most comprehensive book about Ringo Starr ever written.

The Creative Industries and International Business Development in Africa

Routledge
 In response to both policy and conceptual debates, alternative narratives have begun to emerge about territorial governance and policymaking. As local and regional policy actors strive to respond

to the geographically uneven effects of the economic crises of the early twenty-first century, a crucial question emerges: what are the opportunities and challenges presented by alternative forms of territorially based governance and policy? The aim of this edited volume, therefore, is critically to explore the opportunities and challenges presented by different forms of territorial policy and governance. Drawing on conceptual debates and empirical research from the United Kingdom and other international contexts, the contributors engage with issues around the politics and governance of territorial development, economic development, planning and regeneration and the environment. Territorial Policy and Governance addresses the question of how alternative forms of territorial governance and policy can help to shape patterns of urban and regional development, highlighting the related opportunities, constraints and challenges that confront their operationalisation. This book will be essential reading for international audiences with an interest in territorial development, governance, politics, human geography and planning and regeneration.

 With faultless accuracy, this text is the most detailed and analytical account of law for those new to the subject. It provides commanding analysis of the English legal system, contract law, the law of torts, company law, and employment law, as well as covering relevant aspects of the law of agency and environmental law. Online chapters provide further discussion relating to the economic torts, corporate governance, the sale of goods, consumer credit, and the law relating to unfair and illegal commercial practices. All of this is discussed using relevant examples from the business environment, and the key legal cases to help develop a greater understanding of the interconnections between the law and corporate setting. The new learning features have been incorporated throughout, making this difficult subject more accessible. Key case, examples, and discussion boxes demonstrate the application of law and highlight core principles, while self-test questions allow students to assess their progress. Online Resource Centre The accompanying Online Resource Centre provides a wealth of resources for students to further develop their understanding and test their knowledge, including additional practice questions with answers, a flashcard glossary of key legal terms and updates to the law via Twitter. This new edition also includes a testbank of MCQs for lecturer use.

 Twins Ron and Reg Kray were without doubt the most powerful, violent and deadly gangsters that London has ever known. They ran protection rackets, clubs and casinos, as well as fraudulent 'long firms'. They blackmailed, intimidated and killed - for many years with impunity thanks to their powerful cronies in the Establishment. Working with all five main Mafia families in New York, they were expanding their business worldwide when they were imprisoned for murder in 1968. Featuring revealing new material, The Krays: A Violent Business is the story of their lives - and of the secrets and scandals the British government still doesn't want you to know about.

 Transformation programs are a common feature of global companies carrying out major strategic

change projects. These programs combine business and technical expertise to bring together management and information systems. Managers rate firms' transformation competencies relatively poorly, and the success rate of such endeavours is correspondingly low. Using a variety of case studies including: Allianz SE, Shell, SAP, Vodafone, and Mercedes-Benz, this book provides unprecedented insights into characteristics of current transformation programs and the potential that can be leveraged by applying a holistic transformation management approach.

Encyclopaedia of Propaganda Taylor & Francis

First published in 1973 *The Film Business* makes a factual survey of British films from their beginnings in 1896 to 1972. Ernest Betts offers character studies of men who have built the film industry and made it what it is. He examines the financial and political background and shows how, while intending to encourage film production, it has often had exactly the opposite effect and inhibited its free development. Betts also attacks the manner in which the American film industry has taken over the British film industry and points to the failure of successive governments to save it from repeated crises and losses. Through these fluctuations the author keeps a firm eye on the film itself and brings the judgement of film critics past and present to bear on British cinema, as it moves uncertainly and not without its triumphs into the 1970s. This is an interesting read for students and scholars of film studies, British film history and British cinema.

Eco-disasters such as coal-mining accidents, oil spills, and food-borne diseases appear regularly in the news, making them seem nearly commonplace. These ecological crises highlight the continual tensions between human needs and the environmental impact these needs produce. Contemporary documentaries and feature films explore environmental-human conflicts by depicting the consequences of our overconsumption and dependence on nonrenewable energy. *Film and Everyday Eco-disasters* examines changing perspectives toward everyday eco-disasters as reflected in the work of filmmakers from the silent era forward, with an emphasis on recent films such as *Dead Ahead*, an HBO dramatization of the Exxon Valdez disaster; *Total Recall*, a science fiction action film highlighting oxygen as a commodity; *The Devil Wears Prada*, a comment on the fashion industry; and *Food, Inc.*, a documentary interrogation of the food industry. The authors evaluate not only the success of these films as rhetorical arguments but also their rhetorical strategies. This interdisciplinary approach to film studies fuses cultural, economic, and literary critiques in articulating an approach to ecology that points to sustainable development as an alternative to resource exploitations and their associated everyday eco-disasters.

This book highlights the linkages between politics and governance and the arts. The essays in the volume show how visual and performative arts have challenged those in power — or conversely patronised by them — been used for propaganda, stir up national fervour and found themselves at the receiving end of political censure. They focus on the tension and symbiosis between the politician and the artist foregrounding how they have always tried to influence, challenge, and, in some cases, undermine one another. This volume will serve as an indispensable source for researchers and academics in political science, the humanities and performing arts.

The Film Business Routledge

Despite the disappearance of an integrated British film industry - where British studios made British films which were distributed by British distributors and shown in British-owned cinemas to British audiences - Britain still has the best film talents in the world, a fact assured by Steven Spielberg, George Lucas and other leading Hollywood film makers. How can those talents be employed in a British film industry? Can those talents be employed in a British film industry? Need those talents be employed in a British film industry, when Hollywood gobbles so many of them up, nominates them for Oscars and awards them Oscars? Do we really need a British film industry anyhow? This report sets out to answer these questions.

This is the first report from the House of Lords Select Committee on Communications of the 2009-10 session (HLP 37-I, ISBN 9780108459290) and examines "The British film and television industries - decline or opportunity?". The report looks at how these industries have developed, the challenges they are currently facing and what practical help might be provided to enable them to develop

further. The film and television industries make an important contribution to the British economy. They contribute to national income and employment, and make a net contribution to exports, which has the capacity to grow. Despite the competition from abroad, particularly the US, UK-produced content on film and television has a strong international reputation and makes a major contribution to the entertainment and education of British audiences. The publication is divided into 6 chapters and looks in detail at the following areas: Chapter 1: The British film industry; Chapter 2: A better future for British films; Chapter 3: British television; Chapter 4: Promoting British television; Chapter 5: Skills and training. With Chapter 6 setting out recommendations, including, in respect of television: that the Government should urge public service broadcasters to revive their investment in training; encourage the expansion of online video on demand; promote greater production of UK TV content by a tax credit or through the use of the proceeds of spectrum sale and sharing part of the BBC licence fee; expand the role played by BBC Worldwide in distributing UK content overseas. Recommendations in respect of film, include: new legislation specifically targeted at making the recording of a film in a cinema by camcorder a criminal offence; provide more support to smaller films and allowing British films to be partly shot abroad without suffering a financial penalty; encourage more private investment in film production. Presiding over the "golden era" of the British Film Industry from the mid to late 1940s, J. Arthur Rank financed movies such as *Oliver Twist*, *The Red Shoes*, *Brief Encounter*, *Caesar and Cleopatra* and *Black Narcissus*. Never before, and never since, has the industry risen to such heights. J. Arthur Rank charts every aspect of the robust film culture that Rank helped to create. Having started out with relatively little knowledge of the cinema, Rank's sponsorship was to bring about astounding progress within the industry, and by establishing an organization comparable in size to any of the major Hollywood studios, Rank briefly managed to reconcile and consolidate the competing demands of "art" and "business" - an achievement very much absent from today's diminished and fragmented film industry. Macnab goes on to explain the eventual collapse of the Rank experiment amidst the economic and political maelstrom of post-war Britain, highlighting the problems still facing the industry today. By meshing archival research with interviews with Rank's contemporaries and members of his family, this definitive study firmly restores Rank to his rightful place at the hub of British film history.

Employment Law for HR and Business Students Routledge

Over 39 chapters *The Routledge Companion to British Cinema History* offers a comprehensive and revisionist overview of British cinema as, on the one hand, a commercial entertainment industry and, on the other, a series of institutions centred on economics, funding and relations to government. Whereas most histories of British cinema focus on directors, stars, genres and themes, this Companion explores the forces enabling and constraining the films' production, distribution, exhibition, and reception contexts from the late nineteenth century to the present day. The contributors provide a wealth of empirical and archive-based scholarship that draws on insider perspectives of key film institutions and illuminates aspects of British film culture that have been neglected or marginalized, such as the watch committee system, the Eady Levy, the rise of the multiplex and film festivals. It also places emphasis on areas where scholarship has either been especially productive and influential, such as in early and silent cinema, or promoted new approaches, such as audience and memory studies.
