Street Children and the Asphalt Life: Street children and the future direction Charlesbridge Publishing

This book deals with street children who live in the developing world, and homeless youth who are from the developed world. They are referred to as children in street situations (CSS) to show that the problem is both in the children and in the situation they face. The book examines several aspects of the children and their street situations, including the families of origin and the homes they leave, the children's social life, and mental health. Other aspects are the problems of published demographics, the construction of public opinion about these children and the, often violent, reactions from authorities. The book then discusses current research on children in street situations, as well as programs and policies. The book ends with recommendations about programs, policies and research.

Street children can be considered as one of the by-products of the urbanisation process in developing countries. These children are to struggle very hard for their survival on the streets in very highly competitive environments, otherwise they fall prey to the public or even to their own parents also. Their childhood is seized, they are abused and their labour is greatly exploited for the benefit of others. In this book an attempt has been made to

present a holistic profile of the street children of a growing urban city of Eastern India. Especially the prime thrust of the book concentrates on the aspects, like motive behind coming over to urban bases, educational and occupational profile of their parents and their family size, category and shelter of the street children, educational and occupational pattern of the street children, expenditure and savings, occupational hazards, use of earnings of these children by their parents, nourishment and addictive behaviour, health and hygiene, educational choice and future perspectives, attitudes of the public toward the street children etc. Apart from all these, the book also speaks about the pre and post-independence legislations on these children, UN s convention on rights of the child and National Plan of Action, State Plan of Action, welfare agencies working for the betterment of these children etc. Contents: Introduction, Profile of Bhubaneswar City, Family Milieu, Socio-Economic Profile of the Street Children, Struggle for Survival The Problems of Street Children, Legislation, Welfare Programmes and the Street Children, A Recipe for Development of Street Children, Summary and Conclusion.

Street outreach workers comb public places such as parks, vacant lots, and abandoned waterfronts to search for young people who are living out in public spaces, if not always in the public eye. Street Kids opens a window to the largely hidden world of street youth, drawing on their detailed and compelling narratives to give new insight into the experiences of youth homelessness and youth outreach. Kristina Gibson argues that the enforcement of quality of life ordinances in New York City has spurred hyper-mobility amongst the city's street youth population and has serious

implications for social work with homeless youth. Youth in motion have become socially invisible and marginalized from public spaces where social workers traditionally contact them, jeopardizing their access to the already limited opportunities to escape street life. The culmination of a multi-year ethnographic investigation into the lives of street outreach workers and ‘their kids’ on the streets of New York City, *Street Kids* illustrates the critical role that public space regulations and policing play in shaping the experience of youth homelessness and the effectiveness of street outreach.

This book provides new insights on the lives of children in street situations by providing analyses from a qualitative perspective on the sociology of childhood. It proposes some insightful perspectives on the current discussion about the rights of children in street situations. It includes a unique selection of texts, which were initially published in French, written by the authors of this volume, on the lives of children in street situations in Latin America and China, that are now available to an English readership. It challenges obstacles, linked to macrosocial issues such as inequalities, images of the child, the separation of public/private spheres, urban dynamics and structural adjustments, as well as to microsocial dimensions such as identity, motivation, and activities that are constitutive of street situations. The book discusses the situations experienced by children, highlighting children’s reflexivity and strategies as social factors, and shedding new light on the debate “agency within structure”.

A new, interactive approach to storytime, *The Whole Book Approach* was developed in conjunction with the Eric Carle Museum of Picture Book Art and expert author Megan Dowd Lambert's graduate work in children's literature at Simmons College, offering a practical guide for reshaping storytime and getting kids to think with their eyes. Traditional storytime often offers a passive experience for kids, but the Whole Book approach asks the youngest of readers to ponder all aspects of a picture book and to use their critical thinking skills. Using classic examples, Megan asks kids to think about why the trim size of Ludwig Bemelman's *Madeline* is so generous, or why the typeset in David Wiesner's Caldecott winner, *The Three Pigs*, appears to twist around the page, or why books like Chris Van Allsburg's *The Polar Express* and Eric Carle's *The Very Hungry Caterpillar* are printed landscape instead of portrait. The dynamic discussions that result from this shared reading style range from the profound to the hilarious and will inspire adults to make children's responses to text, art, and design an essential part of storytime.

Inspector Darko Dawson has seen many crimes, but this latest string of murders—in which all the young victims bear a chilling signature—is the most unsettling of his career. Are these heinous acts a form of ritual killing or the work of a lone, cold-blooded monster? With time running out, Dawson embarks on a harrowing journey through the city’s underbelly and confronts the brutal world of the urban poor, where street children are forced to fight for their very survival—and a cunning killer seems just out of reach.

A New York Times Notable Book An NPR Best Book of the Year For readers of *Behind the Beautiful Forevers* and *Nothing to Envy*, this is a breathtaking real-life story of four street children in contemporary Zambia whose lives are drawn together and forever altered by the mysterious murder of a fellow street child. Based on years of investigative reporting and unprecedented fieldwork, *Walking the Bowl* immerses readers in the daily lives of four unforgettable characters: Lusabilo, a determined waste picker; Kapula, a burned-out brothel worker; Moonga, a former rock crusher turned beggar; and Timo, an ambitious gang leader. These children navigate the violent and poverty-stricken underworld of Lusaka, one of Africa’s fastest growing cities. When the dead body of a ten-year-old boy is discovered under a heap of garbage in Lusaka’s largest landfill, a murder investigation quickly heats up due to the influence of the victim’s mother and her far-reaching political connections. The children’s lives become more closely intertwined as each child engages in a desperate bid for survival against forces they could never have imagined. Gripping and fast-paced, the book exposes the perilous aspects of street life through the eyes of the children who survive, endure and dream there, and what emerges is an ultimately hopeful story about human kindness and how one small good deed, passed on to others, can make a difference in the face of seemingly insurmountable odds.
