This book, which comprises eight chapters, presents a comprehensive critical survey of the results and methods of laboratory experiments in economics. The first chapter provides an introduction to experimental economics as a whole, with the remaining chapters providing surveys by leading practitioners in areas of economics that have seen a concentration of experiments: public goods, coordination problems, bargaining, industrial organization, asset markets, auctions, and individual decision making. The work aims both to help specialists set an agenda for future research and to provide nonspecialists with a critical review of work completed to date. Its focus is on elucidating the role of experimental studies as a progressive research tool so that wherever possible, emphasis is on series of experiments that build on one another. The contributors to the volume--Colin Camerer, Charles A. Holt, John H. Kagel, John O. Ledyard, Jack Ochs, Alvin E. Roth, and Shyam Sunder--adopt a particular methodological point of view: the way to learn how to

design and conduct experiments is to consider how good experiments grow organically out of the issues and hypotheses they are designed to investigate.

Farming Systems Research Paper Series Legare Street Press
This book discusses the organizational processes and structural barriers to the diffusion and adoptions of innovations. In this chapter, we address the question of why innovations fail?; addresses the organizational learning strategies of adoption and diffusion of process innovation approaches; presents the theoretical framework of organizational learning and process innovations; covers the four typologies of innovations in detail and research questions relating to these four typologies; compares mechanistic and organic innovations, and organizational development (OD) and organizational transformation (OT) innovations; elaborates the organizational learning framework by incorporating the two stages in sociological theories of process innovations: adoption and diffusion.

Quarterly Journal of Business and Economics Springer Science & Business Media

The behaviour of market prices is a fascinating subject for researchers. Opinions vary substantially. from the view that

prices accurately and quickly reflect relevant information to the other extreme that prices are not rationally determined and are hence to some degree predictable. This diversity of belief about the efficiency of markets is reflected in these proceedings of the NATO Advanced Research Workshop on "A reappraisal of the efficiency of financial markets". The thirty-one workshop papers cover stock, currency and commodity markets. We are pleased to have contributions on markets in eleven NATO countries: Belgium, Canada, Denmark, France, Germany, Greece, Italy, the Netherlands, Portugal, the United Kingdom and the United States. The workshop papers thus provide a wide-ranging account of contemporary research into financial markets worldwide. The workshop was held at the Hotel do Mar, Sesimbra, Portugal from April 11th to April 15th, 1988. We record our gratitude to Jose Cabral for ensuring the smooth progress of the workshop. The generous financial assistance of NATO was supplemented by contributions from: The Chicago Board of Trade, Alianca Seguradora, Banco Comercial Portugues, Fundacao Luso-Americana Para O Desenvolvimento, Junta Nacional de Investigacao Cientifica e Tecnologica. We speak for all the workshop participants in expressing our thanks to all our sponsors. Rui M. Campos Guimaraes, University of Porto.

A New Science Springer

Corporations earn incomes and amass wealth. There are many books offering advice how to increase the profitability of corporations by achieving excellence in operations and choosing the correct strategic path. *Increasing Shareholder Value: Distribution Policy, A Corporate Finance Challenge* is concerned with how the corporation should reward its shareholders after the incomes are earned. Investment decisions, capital structure, and dividend policy must be coordinated so that the well being of the firm's stockholders is considered in the planning process. The corporate planners should realize that the individual investors are also making plans, and the corporation can assist this planning process by making its own financial plans and strategies well known.

Agricultural Land Redistribution and Land Administration in Sub-Saharan Africa: Case Studies of Recent Reforms focuses on "how" to undertake land reforms in Sub-Saharan Africa, but with relevant lessons for other developing countries. It provides details, with case studies, on how reforms were undertaken to address a pressing and controversial development challenge in Africa – land ownership inequality – and an intransigent development issue – inefficiency and corruption in land administration. An equally important contribution of the book is assessing reforms and highlighting valuable lessons for other countries contemplating reforms. The six case studies collectively cover two main areas of land governance: reforms in redistributing agricultural land and reforms in land administration. The first two case studies discuss reforms in redistributing agricultural land in Malawi and South Africa, part of the southern Africa region where land ownership inequalities rival those in Latin America. The remaining case studies, four in number, are focused on addressing corruption and inefficiency in land administration in a variety of contexts of governance including stable and post-conflict countries. The case studies cover:

- Decentralizing land administration with demonstrations from Uganda, Ethiopia, Tanzania, and Ghana;
- Developing post-conflict land administration systems with examples from Liberia and Rwanda;
- Re-engineering and computerizing land information systems with examples from Ghana and Uganda; and
- Improving management of government land through land inventories with examples drawn from Ghana and Uganda. The common elements between sometimes disparate experiences

provide lessons of relevance to African and other developing countries contemplating similar reforms. The rigorous analysis and yet down-to-earth lessons of experience are a reflection of the authors' deep global experience underpinned by personal participation in the reforms covered by the book. This volume will be of interest to a wide audience including land specialists and practitioners, African policy makers, experts and managers in the international development community, and the academia.

Static Asset-pricing Models Emerald Group Publishing

This book is a study of earnings management, aimed at scholars and professionals in accounting, finance, economics, and law. The authors address research questions including: Why are earnings so important that firms feel compelled to manipulate them? What set of circumstances will induce earnings management? How will the interaction among management, boards of directors, investors, employees, suppliers, customers and regulators affect earnings management? How to design empirical research addressing earnings management? What are the limitations and strengths of current empirical models?

International Management and Intercultural Communication Springer

This collection of articles in investment and portfolio management spans the thirty-five-year collaborative effort of two key figures in finance. Each of the nine sections begins with an overview that introduces the main contributions of the pieces and traces the development of the field. Each volume contains a foreword by Nobel laureate Harry Markowitz. Volume I presents the authors' groundbreaking work on estimating the inputs to portfolio optimization, including the analysis of alternative structures such as single and multi-index models in forecasting correlations; portfolio maximization under alternative specifications for return structures; the impact of CAPM and APT in the investment process; and taxes and portfolio composition. Volume II covers the authors' work on analysts' expectations; performance evaluation of managed portfolios, including commodity, stock, and bond portfolios; survivorship bias and performance persistence; debt markets; and immunization and efficiency.

A Collection of Case Studies; Volume 1 MIT Press

This book examines cost-of-capital models and their application in the context of managerial finance. This includes the use of hurdle rates in capital allocation decisions, as well as target returns in performance management. Besides a review of classical finance models such as the Capital Asset Pricing Model (CAPM), other contemporary models and techniques to determine the cost-of-capital of business units and private companies are discussed. Based on a mixed methods approach, current cost-of-capital practices and their determinants are empirically analyzed among German companies.

Cambridge University Press

This document contains the papers presented at the Consultation on Aquaculture for Sustainable Rural Development which was organized jointly by FAO and NACA and held in Chiang Rai, Thailand, from March 29-31, 1999 in order to develop the detailed structure of a regional program on aquaculture for sustainable rural development and to propose a strategy for its implementation. The consultation took an overview of the relevant information emerging from the presentations of country reports; lessons learned by specific projects; experiences of regional and international organizations and donor agencies; and findings of expert reviews. More sharply focused examination of critical issues and discussions on specific components of the draft program concept were followed through parallel working group discussions. The outputs of the working groups were further discussed during the concluding plenary. Finally, a detailed Program Framework on Aquaculture for Sustainable Rural Livelihood Development was conceived through consensus to serve as guiding principles for the formation of the program.-- Publisher's description.

Research Program in Finance Working Paper Series World Bank Publications

International Management and Intercultural Communication consists of cases of direct observation and personal involvement in a wide variety of communication challenges in international management settings; and discusses them in terms of management theories. The cases explore interactions across national cultures and regional boundaries, demonstrating both

traditional and unusual approaches to problems that sooner or later are likely to challenge all managers who operate internationally. The book is presented in two volumes. Volume 1 contains case studies concerning different aspects of international management and intercultural communication in business, marketing and politics. Volume 2 deals with cases of international management in social and educational settings.

Mergers and Acquisitions: Motivaton Othmar M. Lehner

The Ascent of Market Efficiency weaves together historical narrative and quantitative bibliometric data to detail the path financial economists took in order to form one of the central theories of financial economics—the influential efficient-market hypothesis—which states that the behavior of financial markets is unpredictable. As the notorious quip goes, a blindfolded monkey would do better than a group of experts in selecting a portfolio of securities, simply by throwing darts at the financial pages of a newspaper. How did such a hypothesis come to be so influential in the field of financial economics? How did financial economists turn a lack of evidence about systematic patterns in the behavior of financial markets into a foundational approach to the study of finance? Each chapter in Simone Polillo's fascinating meld of economics, science, and sociology focuses on these questions, as well as on collaborative academic networks, and on the values and affects that kept the networks together as they struggled to define what the new field of financial economics should be about. In doing so, he introduces a new dimension—data analysis—to our understanding of the ways knowledge advances. There are patterns in the ways knowledge is produced, and The Ascent of Market Efficiency helps us make sense of these patterns by providing a general framework that can be applied equally to other social and human sciences.

Case Studies of Recent Reforms Papers Presented at the FAO/NACA Consultation on Aquaculture for Sustainable Rural Development Chiang Rai, Thailand, 29-31 March 1999

Harvey details the first major clash between conservationists and developers after World War II, the successful fight to prevent the building of Echo Park Dam. The dam on the Green River was intended to create a recreational lake in northwest Colorado and generate hydroelectric power, but would have flooded picturesque Echo Park Valley and threatened Dinosaur National Monument, straddling the Utah-Colorado border near Wyoming.
