Animal Farm Hachette UK

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn

characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations, including serious immersion programs abroad, high-intensity

programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

Handbook of Research in Second Language Teaching and Learning Routledge

Volume III of the Handbook of Research in Second Language Teaching and Learning, like Volumes I and II, is a comprehensive, state-of-the-art overview of current research into social contexts of second language (L2)/foreign language (FL) teaching and learning; language policy; curriculum; types of instruction; incremental language skills such as listening, speaking, reading, writing, vocabulary, and grammar; international communication; pragmatics; assessment and testing. It differs from earlier volumes in its main purpose—to provide a more in-depth discussion and detailed focus on the development of the essential language skills required for any type of communication: speaking, listening, reading, vocabulary, grammar, and writing. Volume III preserves continuity with previous volumes in its coverage of all

the classical areas of research in L2/FL teaching and learning and applied linguistics, but rather than offering a historical review of disciplinary traditions, it explores innovations and new directions of research, acknowledges the enormous complexity of teaching and learning the essential language abilities, and offers a diversity of perspectives. Chapter authors are all leading authorities in their disciplinary areas. What's new in Volume III? Updates the prominent areas of research, including the sub-disciplines addressed in Volumes I and II, and represents the disciplinary mainstays. Considers and discusses perspectives held by different schools of thought on the what, the how, and the why of teaching foundational language skills, including theories, pedagogical principles, and their implementation in practice. Captures new and ongoing developments and trends in the key areas of L2/FL teaching and learning, and innovative research topics that have gained substantial recognition in current publications, including the role of corpora, technology, and digital literacy in L2/FL teaching and learning. Examines new trends in language pedagogy and research, such as an increased societal emphasis on teaching academic language for schooling, somewhat contradictory definitions of literacy, and the growing needs for instruction in intercultural communication.

The Routledge Handbook of Teaching English to Young Learners

From leading scholar and applied linguist Paul Nation, this book describes and explains the 20 most effective and efficient language teaching techniques and why they work. Backed by decades of research and expertise, Nation examines the principles of learning connected to these techniques, as well as

the factors affecting their choice and usage. These techniques are organized around the four skills of listening, speaking, reading, and writing. For each skill, there is an opportunity for learning through meaning-focused use, an opportunity for learning through deliberate study, and a window for fluency development through working with easy material. Each technique is described and analyzed to demonstrate its learning goals and the principles of learning in use. In demonstrating key techniques and methods for language learning, this book is particularly useful for pre-service teachers and students in applied linguistics, TESOL, and language teaching. Each chapter also has a substantial list of research topics for projects or theses.

Korean Reader for Chinese Characters will help students of Korean master basic Chinese characters that are frequently encountered in everyday situations. More than five hundred characters are targeted in exercises that aid in the efficient study of the forms, meanings, and sounds of individual characters and their compounds. Although the primary goal of the Reader is recognition of basic Chinese characters, students are encouraged to learn to write them properly by inclusion of a section on stroke

order. The Reader is also designed to reinforce skills in reading and writing in Korean while studying Chinese characters. Forty lessons are preceded by an introductory chapter on the principles of Chinese character formation and reading and writing characters and followed by appendices on stroke order, English translations of the main reading text of each lesson, and an index of characters. The lessons are organized into seven parts: new characters, reading text, glossary, notes, new words in characters, more words in characters, and exercises. After every fifth lesson, there is a section reviewing all the characters introduced in the preceding five lessons.

Short Stories in Spanish for Beginners Aadarsh

This volume brings an international perspective to language skills – an area of importance to both theorists and practitioners in all contexts of language teaching and learning. The twenty-seven chapters included here are arranged into six sections devoted to fundamental background issues, spoken interaction, perception of speech sounds and production skills, reading contexts and purposes, writing challenges for advanced learners, and technology and language skills. Explored themes range from the conceptualization of language as skill and the development of L2 skills in communicative and intercultural approaches, through challenges in teaching specific skills and their components, to the consideration of the possibilities and limitations of the use of modern technology in assisting students in skill acquisition. The volume's contributors point to the multiaspectuality of the process of developing language skills with reference to different age groups, diverse educational and social contexts, as well as instructional activities focusing on isolated and integrated skills.

The book also includes original empirical studies concerning learning, teaching, and testing numerous aspects of language skills in L2 attainment. The book will be of interest to researchers, classroom teachers, and specialists in language education, philology and applied linguistics, as well as to graduate students involved in the study of language skills acquisition and instruction.

"In this book we offer the informed and reflective practitioner as the ideal agent for mediating between the practice and theory of language teaching. Some of the contributors might be labelled teachers, some materials developers, some applied linguists, some teacher trainers and some publishers, but all of them share four things in common: they have all had experience as teachers of a second or foreign language, they have all contributed to the development of second language materials, they have all well informed about developments in linguistic and psycholinguistic theory and they all have respect for the teacher as the person with the power to decide what actually happens in the classroom." --From the Introduction>
