important  
movements,  
architects,  
and  
architectural

theories  
*Theory and Design in the First Machine Age* by Reyner Banham  
Van Gorcum Limited  
Highly regarded in architecture for inspiring the Chicago School and the Prairie School, Louis Sullivan was an unwilling instigator of the method of facade composition--later influenced by Frank Lloyd Wright, William Gray Purcell, and George G. Elmslie--that came to be known as

Sullivan-esque. Decorative enhancements with botanical and animal themes, Sullivan's distinctive ornamentation mitigated the hard geometries of the buildings he designed, coinciding with his "form follows function" aesthetic. Masterfully framed by the author's photographs of Sullivan-esque buildings in Chicago and throughout the Midwest, Ronald E. Schmitt's in-depth

exploration of the Sullivan-esque tells the story of its evolution from Sullivan's intellectual and aesthetic foundations to its place as a form of commercial vernacular. The book also includes an inventory of Sullivan-esque buildings.  
**A Guidebook for His Students to this Field of Art** Farrar, Straus and Giroux 1960, following as it did the last CIAM meeting, signalled a turning point for the Modern

Movement. From then on, architecture was influenced by seminal texts by Aldo Rossi and Robert Venturi, and gave rise to the first revisionary movement following Modernism. Bringing together leading experts in the field, this book provides a comprehensive, critical overview of the developments in architecture from 1960 to 2010. It consists of two parts: the first section

providing a presentation of major movements in architecture after 1960, and the second, a geographic survey that covers a wide range of territories around the world. This book not only reflects the different perspectives of its various authors, but also charts a middle course between the 'aesthetic' histories that examine architecture solely in terms of its formal aspects, and the more

'ideological' histories that subject it to a critique that often skirts the discussion of its formal aspects. Space in Architecture University of Texas Press Modern Architecture in Latin America: Art, Technology, and Utopia is an introductory text on the issues, polemics, and works that represent the complex processes of political, economic, and cultural modernization in the

twentieth century. The number and types of projects varied greatly from country to country, but, as a whole, the region produced a significant body of architecture that has never before been presented in a single volume in any language. Modern Architecture in Latin America is the first comprehensive history of this important production. Designed as a survey and focused on

key examples/paradigms arranged chronologically from 1903 to 2003, this volume covers a myriad of countries; historical, social, and political conditions; and projects/developments that range from small houses to urban plans to architectural movements. The book is structured so that it can be read in a variety of ways—as a historically developed narrative of

modern architecture in Latin America, as a country-specific chronology, or as a treatment of traditions centered on issues of art, technology, or utopia. This structure allows readers to see the development of multiple and parallel branches/historical strands of architecture and, at times, their interconnections across countries. The authors provide a critical evaluation of the movements

presented in relationship to their overall goals and architectural transformations. *Modern Architecture in Latin America* Prentice Hall In 1896, Otto Wagner's "Modern Architecture" shocked the European architectural community with its impassioned plea for an end to eclecticism and for a "modern" style suited to contemporary needs and ideals, utilizing the nascent

constructional technologies and materials. Through the combined forces of his polemical, pedagogical, and professional efforts, this determined, newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s - along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago - as one of the leaders of the revolution

soon to be identified as the "Modern Movement." Wagner's historic manifesto is now presented in a new English translation - the first in almost ninety years - based on the expanded 1902 text and noting emendations made to the 1896, 1898, and 1914 editions. In his introduction, Dr. Harry Mallgrave examines Wagner's tract against the backdrop of nineteenth-century

theory, critically exploring the affinities of Wagner's revolutionary élan with the German eclectic debate of the 1840s, the materialistic tendencies of the 1870s and 1880s, and the emerging cultural ideology of modernity. Modern Architecture is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era, but also perspicaciously and cogently

shaped the issues and the course of its development; it defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century. Routledge A classic account which, when written in 1977, was the first to define post-modernism in architecture, an event which led to subsequent adoption of the term in

many other fields. It is the story of the failure of modern architecture to communicate with its users and the attempt of post-modernists to overcome this failure with a richer, more widely shared language-- post-modern classicism. This edition (5th in 1987) brings the account, and the great illustrations, up to date. 101/4x121/2". Annotation copyrighted by Book News, Inc., Portland, OR

<p><u>Cuban</u> <u>Modernism</u> Chronicle Books Architecture and Modern Literature explores the representation and interpretation of architectural space in modern literature from the early nineteenth century to the present, with the aim of showing how literary production and architectural construction are related as cultural forms in the historical context of</p>	<p>modernity. In addressing this subject, it also examines the larger questions of the relation between literature and architecture and the extent to which these two arts define one another in the social and philosophical contexts of modernity. Architecture and Modern Literature will serve as a foundational introduction to the emerging interdisciplinar y study of architecture and literature. David Spurr addresses a</p>	<p>broad range of material, including literary, critical, and philosophical works in English, French, and German, and proposes a new historical and theoretical overview of this area, in which modern forms of "meaning" in architecture and literature are related to the discourses of being, dwelling, and homelessness. <i>The Language of Post- modern Architecture</i> Birkhäuser "The first</p>

investigation of the role of how modernist objects were marketed by affirming buyers' racial and gender identities"--  
Work Without the Worker  
Phaidon Press  
After critiquing—and infuriating—the art world with *The Painted Word*, award-winning author Tom Wolfe shared his less than favorable thoughts about modern architecture in *From Bauhaus to Our Haus*. In this examination

of the strange saga of twentieth century architecture, Wolfe takes such European architects as Ludwig Mies van der Rohe, Le Corbusier, and Bauhaus art school founder Walter Gropius to task for their glass and steel box designed buildings that have influenced—and infected—America's cities. *Freedom and the Cage*  
Phaidon Press  
Revolutionary essays on design,

aesthetics and materialism - from one of the great masters of modern architecture Adolf Loos, the great Viennese pioneer of modern architecture, was a hater of the fake, the fussy and the lavishly decorated, and a lover of stripped down, clean simplicity. He was also a writer of effervescent, caustic wit, as shown in this selection of essays on all aspects of design and aesthetics,

from cities to glassware, furniture to footwear, architectural training to why 'the lack of ornament is a sign of intellectual power'.

Routledge  
A practicing architect discusses the theoretical background of modern architecture

**Ornament and Crime**

Penn State Press  
An

unprecedented homage to modernist architecture from the 1920s up to the present day  
Ornament Is Crime is a celebration and a thought-provoking reappraisal of modernist architecture.

The book proposes that modernism need no longer be confined by traditional definitions, and can be seen in both the iconic works of the modernist canon by Le Corbusier, Mies van der Rohe, and

Walter Gropius, as well as in the work of some of the best contemporary architects of the twenty-first century. This book is a visual manifesto and a celebration of the most important architectural movement in modern history.

*A Fifty Year Retrospective (1967-2017)*

MIT Press  
In the 20th century, modern architecture thrived in Cuba and a wealth of buildings was realized prior

to the  
revolution  
1959 and in  
its wake. The  
designs  
comprise  
luxurious  
nightclubs and  
stylish hotels,  
sports  
facilities,  
elegant  
private homes  
and  
apartment  
complexes.  
Drawing on  
the  
vernacular,  
their  
architects  
defined a way  
to be modern  
and Cuban at  
the same time  
- creating an  
architecture  
oscillating  
between  
tradition and  
avantgarde.  
Audacious

concrete  
shells, curving  
ramps,  
elegant brises-  
soleils and a  
fluidity of  
interior and  
exterior  
spaces are  
characteristic  
of an airy,  
often colorful  
architecture  
well-suited to  
life in the  
tropics. New  
photographs  
and drawings  
were specially  
prepared for  
this  
publication. A  
biographical  
survey  
portraits the  
40 most  
important  
Cuban  
architects of  
the era.  
*Le Corbusier  
and the Tragic*

University  
Press  
The utopian  
design and  
organization  
of  
Brasília—the  
modernist  
new capital of  
Brazil—were  
meant to  
transform  
Brazilian  
society. In this  
sophisticated,  
pioneering  
study of  
Brasília from  
its inception in  
1957 to the  
present,  
James Holston  
analyzes this  
attempt to  
change  
society by  
building a new

kind of city and the ways in which the paradoxes of constructing an imagined future subvert its utopian premises. Integrating anthropology with methods of analysis from architecture, urban studies, social history, and critical theory, Holston presents a critique of modernism based on a powerfully innovative ethnography of the city.

An Anthropological Critique of Brasilia

University of Michigan Press  
 In Making Dystopia, distinguished architectural historian James Stevens Curl tells the story of the advent of architectural Modernism in the aftermath of the First World War, its protagonists, and its astonishing, almost global acceptance after 1945. He argues forcefully that the triumph of architectural Modernism in the second half of the twentieth century led to

massive destruction, the creation of alien urban landscapes, and a huge waste of resources. Moreover, the coming of Modernism was not an inevitable, seamless evolution, as many have insisted, but a massive, unparalleled disruption that demanded a clean slate and the elimination of all ornament, decoration, and choice. Tracing the effects of the Modernist revolution in architecture to

the present, Stevens Curl argues that, with each passing year, so-called 'iconic' architecture by supposed 'star' architects has become more and more bizarre, unsettling, and expensive, ignoring established contexts and proving to be stratospherically remote from the aspirations and needs of humanity. In the elite world of contemporary architecture, form

increasingly follows finance, and in a society in which the 'haves' have more and more, and the 'have-nots' are ever more marginalized, he warns that contemporary architecture continues to stack up huge potential problems for the future, as housing costs spiral out of control, resources are squandered on architectural bling, and society fractures. This courageous, passionate, deeply

researched, and profoundly argued book should be read by everyone concerned with what is around us. Its combative critique of the entire Modernist architectural project and its apologists will be highly controversial to many. But it contains salutary warnings that we ignore at our peril. And it asks awkward questions to which answers are long overdue.

photography

transport

readers into

an era of

unparalleled

style,

glamour, and

optimism.

Radical

Architecture

of the Future

University of

Texas Press

An accessible analysis of the

new forms of

work whose

seismic

changes will

increasingly

determine the

future of

capitalism

Automation

and the

decline in

industrial

employment

have lead to

rising fears of a workless future. But what happens when your work itself is the thing that will make your job obsolete? In the past few years, online crowdworking platforms - like Amazon's Mechanical Turk and Clickworker - have become an increasingly important source of work, particularly for those in the Global South. Here, small tasks are assigned to people online, and are often

used to train algorithms to spot patterns, patterns through machine learning those same algorithms will then be able to spot more effectively than humans. Used for everything from the mechanics of self-driving cars to Google image search, this is an increasingly powerful part of the digital economy. But what happens to work when it makes itself obsolete. In this stimulating work that

blends political economy, studies of contemporary work, and speculations on the future of capitalism, Phil Jones looks at what this often murky and hidden form of labour looks like, and what it says about the state of global capitalism. *Architecture and Modern Literature* Penguin UK In the world of architectural conservation, there is little tolerance for reconstructing or even protecting

historic facades when everything behind is modern, and even less for reconstructing a building that has been completely destroyed. These offenses are considered lies against history. In this thoughtful, revealing work, conservation expert Wim Denslagen traces this predilection for honesty to the legacy of Functionalism, a Romantic-era movement that denounced the building of

pseudo-architecture in favor of a new, rational form of building. With detailed analyses of headline-making restoration projects from Bruges to Berlin, Denslagen shows that the adoption of these romantic values by conservationists gave rise to a new wave of modern additions and transformations.

**The Architecture of Independence : Ghana,**

**Senegal, Côte D'Ivoire, Kenya, Zambia**

University of Chicago Press  
The first history of the Congrès Internationaux d'Architecture Moderne traces the development and promotion of its influential concept of the "Functional City." *The Modernist City* Rizzoli International Publications  
Traces the modern architect's career, and examines his view of truth and the

human condition as evidenced in his architectural designs, paintings, and writings.
