This collection of essays examines
English language learning in formal
education contexts from pre-school to

lower secondary level. Focused on an in-service teacher education project that aimed to enhance the teaching of English in a group of schools, it takes into account the perspectives of multiple stakeholders - heads of school, teachers, parents and children. Its novelty lies in the variety of themes it covers, such as the account of a vertical implementation of a Content and Language Integrated Learning (CLIL) project at three school levels, teachers' attitudes to using

picturebooks in L2 settings, cultural differences in the presentation of content in textbooks, and the role of the native language assistant. "English for Young Learners" makes a valid contribution to research on a matter of crucial importance in Italian education in the 21st century, the improvement of the teaching and learning of English. It will be of interest to student teachers, educators, practitioners and researchers.

This report aims to identify and analyze specific Nordic reading results and trends from 2000 to 2009. There is focus on weak readers and gender issues, and there are results from an analysis of two Danish national options; one covers tests

of basic reading skills, word decoding and vocabulary knowledge, while the other presents results from analysis of oversampling of students with immigrant background. The publication also gives an overview of the school systems in the Nordic countries with a timeline of politically induced changes from 1990 to 2010 – the years of the PISA assessments. An overview of such changes has never previously been provided. The documented changes are used to form possible explanations for trends in PISA reading results in the respective countries.

What the book does extremely well is to describe the way things are in terms

of the requirements of the Framework for Teaching English, the curriculum and the new specifications - and for this reason it is likely to be most useful to those contemplating English teaching in the maintained sector from outside - returnees, aspiring NQTs or those in the independent sector' - Times Educational Supplement 'Instead of taking us yet again on a tour through the four modalities of English, this book's tripartite structure takes a refreshingly different approach by offering thought-provoking argument grounded in classroom practicality' - Nick McGuinn, University of York Students' comments on Teaching Secondary English: 'The book is written in clear, digestible terms, offering many practical ideas for teaching the key skills and the wide

range of material encountered in the English classroom. .. It is the kind of book which can be dipped into, which is particularly useful for people who spend most of their time planning lessons!' `Teaching Secondary English is a must for student teachers and NQTs. It is a clear, comprehensive and practical guidebook dealing not solely with theory and pedagogy, but with the very real issues facing new teachers today' ` It is clear that Teaching Secondary English, unlike so many textbooks on the subject, is written by someone with recent classroom experience and this helps the reader to trust and respect the advice it purports. I certainly feel it is grounded in practicalities not "pie in the sky" theory that will not work in most `real' classrooms!' This book enables English

teachers to implement change and rise to new challenges, while remaining true to an ethically and socially just position which provides the rationale for their vocation. The author describes and evaluates recent changes to English teaching brought about by initiatives such as the Literacy Strategy, the new `A' levels and the requirement to focus on spiritual, moral, social and cultural development. Examples of innovative teaching and learning strategies are provided throughout. The author helps teachers to foster keen readers, writers and communicators. He shows how they can enable their students to acquire skills and knowledge, as well as to recognize the value of aesthetic experience, emotional literacy and spiritual and moral response to literature

in their own lives and in their communities. This book is essential reading for PGCE students as well as practising teachers and all those involved in English in education.

Summative assessment has been a contentious issue in educational circles for several decades, particularly high-stakes assessment events which arise at various junctures of the school cycle, especially those at the end of it. The French Baccaalaureat and English A-Levels and their numerous clones throughout the francophone and anglophone worlds are household names and represent milestone events in people's lives, as their outcomes are principal determinants of young people's future prospects. These examinations are external--they are devised, conducted and processed by agencies outside the schools, usually ministerial examination units. As such, they act as

'blind' arbiters of student achievement, providing the proverbial 'level playing field' which ensures the comparability of outcomes. In the pyramidal school structures of yesteryear, examinations acted as filters, regulating the progression of pupils to subsequent tiers of formal education. Exit points occurred from primary school level up, from where unsuccessful candidates could enter the labour force and/or embark on occupationally specific further education and training. With the modernisation of the labour market and an ever-higher social demand for access to higher levels of formal education, the filtering function of examinations at lower levels of schooling has been gradually eroded, while burgeoning numbers of students at the upper secondary level have brought

about reforms that include curricular diversification and sometimes radical overhauls of terminating assessment systems (including the modification and, in some instances, abandonment of external examinations). This edited volume brings together the experiences of twenty examination systems from around the world to show how these dynamic entities have adapted over time to the changing context of schooling. Following an introduction by Stephen P. Heyneman of World Bank repute, there are sixteen chapters presenting Country Case Studies, which have been written up under common subheadings, thereby highlighting the comparative nature of the work and facilitating cross-referencing. The subsequent four chapters elaborate on the theme of

'external examinations beyond national borders', including a contribution by the International Baccalaureate Organisation. A defining feature of the work is the attention it pays to what it calls the 'nuts and bolts' of external examinations, from question-setting to grading procedures. These are, it is argued, instrumental in nurturing and maintaining public confidence in external examinations. The book will be of immense value to people involved in educational policy studies, especially strategic educational planning, as well as those directly concerned with formal assessment. The work has been written to appeal to a wide audience of informed persons--it is accessible to teachers and interested laypeople, as well as to academics."

The author attempts to answer the question of why ESL classroom talk is the way it is. Basing her answer on a case study of a school in an ESL community, she argues that classroom talk may be linked in important ways to an operative sociocultural structure of ESL pedagogy over and above the classroom at the institutional level.

This volume gives readers insights on the use of technology in professional development programmes and content knowledge that can enrich teacher education. Every chapter of the book builds, through research, an analysis and discussion of CALL matters and professional development. The purpose

of the EuroCALL Teacher Education SIG's edited volume, supported by the Language Centre of the Cyprus University of Technology, is to respond to the needs of language educators, teacher trainers and training course designers through relevant research studies that provide technological, pedagogical, and content knowledge. The book concentrates on professional development in CALL, the use of technology in primary, secondary, and tertiary education, e-learning facilitators, the integration of personal learning environments, the use of MALL, the applications of virtual reality, materials design, the use of ICT in task-based language teaching, and the integration of social media networks in language education. Professional Development in

CALL: a selection of papers is a collection of newly-commissioned chapters which unifies theoretical understanding and practical experience. The EuroCALL Teacher Education SIG hopes that the present contribution will be viewed as a valuable addition to the literature and a worthy scholarly achievement.
