## JAZMYN BLACK

Design & Applied Arts Index Copyright Office, Library of Congress  
The story of Catholicism and Protestantism in China, Japan, and Korea has been told in great detail. The existing literature is especially rich in documenting church and missionary activities as well as how varied regions and cultures have translated Christian ideas and practices. Less evident, however, are studies that contextualize Christianity within the larger economic, political, social, and cultural developments in each of the three countries and its diasporas. The contributors to *Encountering Modernity* address such concerns and collectively provide insights into Christianity's role in the development of East Asia and as it took shape among East Asians in the United States. The work brings together studies of Christianity in China, Taiwan, Korea, and Japan and its diasporas to expand the field through new angles of vision and interpretation. Its mode of analysis not only results in a deeper understanding of Christianity, but also produces more informed and nuanced histories of East Asian countries that take seriously the structures and sensibilities of religion—broadly understood and within a national and transnational context. It critically investigates how Protestant Christianity was negotiated and interpreted by individuals in Korea, China (with a brief look at Taiwan), and Japan starting in the nineteenth century as all three countries became incorporated into the global economy and the international nation-state system anchored by the West. People in East Asia from various walks of life studied and, in some cases, embraced principles of Christianity as a way to frame and make meaningful the economic, political, and social changes they experienced because of modernity. *Encountering Modernity* makes a significant contribution by moving beyond issues of missiology and church history to ask how Christianity represented an encounter with modernity that set into motion tremendous changes throughout East Asia and in transnational diasporic communities in the United States.

Authoritative and readable, this excellent text, illustrated by a unique pictorial record of period architecture, surveys and examines how and why the architecture of pleasure related to the stylistic and ideological concerns of modernism in 1930s Britain. Responding to the current interest in modernism and packed with a substantial archive of high quality photographs and other documentation, it relates the professional, entrepreneurial and institutional infrastructures affecting the pleasure industry's architectural development and appearance in 1930s. A broad range of building through which the general public first experienced Modernism are covered, including: commercial – holiday camps, cinemas and greyhound racing stadia municipal and governmental projects – zoos, seaside pavilions, concert halls, and imperial and international exhibitions. Arguing that the responses to modernism through the architecture of pleasure were conditioned by wider debates about the role of design in relation to high and mass culture, this book is an ideal resource for all those interested in architectural history and design in Britain between the wars.

China is building a New Silk Road that runs through the heartland of the Muslim world, promising it will create integrated economies and stronger ties across Eurasia and Africa. Robert R. Bianchi argues that while China has the financial and technical resources to accomplish its infrastructure goals, it is woefully unprepared to deal with the social and political demands of its partner countries' citizens. *China and the Islamic World* explores how China's leaders and citizens are learning-through their relationships with Pakistan, Turkey, Indonesia, Iran, Nigeria and Egypt-that they have to respect and adjust to the aspirations of ordinary people throughout the Islamic world, not just cater to the narrow band of government and business elites. Bianchi demonstrates that turbulent countries along the New Silk Road are likely to transform Chinese society at least as much as China changes them. This realization will be deeply unsettling for China's authoritarian rulers, who desperately want to monopolize power domestically. The party and state bosses have responded to challenges with a contradictory blend of flexibility abroad and rigidity at home, compromising with popular demands in one country after another while refusing to negotiate many of the same issues with their own citizens. This book shows how China faces a growing struggle to maintain their double-sided statecraft as it becomes apparent that the New Silk Road is not a one way street.

An engaging and original account of 1921, a pivotal year for Churchill that had a lasting impact on his political and personal legacy. After the tragic consequences of his involvement in the catastrophic Dardanelles Campaign of World War I, Churchill's political career seemed over. He was widely regarded as little more than a bombastic and unpredictable buccaneer until, in

1921, an unexpected inheritance heralded a series of events that laid the foundations for his future success. Renowned Churchill scholar David Stafford delves into the statesman's life in 1921, the year in which his political career revived. From his political negotiations in the Anglo-Irish treaty that created the Irish Free State to his tumultuous relationship with his "wild cousin" Clare Sheridan, sculptor of Lenin and subject of an MI5 investigation, this broad account explores the nuances of Churchill's private and public lives. This is an engaging portrait of this overlooked yet pivotal year in the great man's life.

What role do Chinese popular associations play in the expansion of civil society and democratization? Under Mao few associations were permitted to exist, while today over 200,000 associations are officially recognized. Are they important foundations of civil society, or vehicles for state corporatism and control? In this book leading China specialists examine an interesting range of associations, from business associations to trade unions, to urban homeowners associations, women's groups against domestic violence, and rural NGOs that develop anti-poverty programs. The contributors find different important trends underway in different parts of China's economy and society. Their findings are nuanced, insightful - and often not what might be expected.

This book provides an expansive view of celebrity's intimate dimensions. In the process, it offers a timely reassessment of how notions of private and public were negotiated by writers, readers, actors and audiences in the early to mid-eighteenth century. The essays assembled here explore the lives of a wide range of figures: actors and actresses, but also politicians, churchmen, authors and rogues; some who courted celebrity openly and others who seemed to achieve it almost inadvertently. At a time when the topic of celebrity's origins is attracting unprecedented scholarly attention, this collection is an important, pioneering resource.

What impact did Bolshevik rule have on Emma Goldmans's perception of the Russian Revolutions of 1917 and why did she change her mind, going from defending the Russian Revolution to becoming a crusader against Bolshevism? The Russian Revolution changed the world and determined the history of the 20th century as the French Revolution had determined the history of the 19th century. Left-wing intellectuals around the world greeted the February Revolution with enthusiasm as their hope for a new world and social order and the end of capitalism seemed close.

However, the joy did not last long as the ideals of February 1917 were replaced by the realities of October 1917 and Lenin crushed the revolution during the following Civil War. Emma Goldman, a famous Russian-born American anarchist was one of the intellectuals, whose admiration for the revolution turned into frustration about its corruption. Emma Goldman and the Russian Revolution discusses her evolving perception of the revolution between 1917 and the early 1920s. The analysis of such an intellectual transformation process, provides a case study of intellectual and revolutionary history alike, adding a closer reading to the research about the famous American anarchist, Emma Goldman, her transnational life and her role as a revolutionary intellectual.

**From Admiration to Frustration** Oxford University Press

The definitive social history of London in the Blitz, which transformed life in the capital beyond recognition. For Londoners the six long years of the Second World War were a time of almost constant anxiety, disruption, deprivation and sacrifice. The Blitz began in earnest in September 1940 and from then on, for prolonged periods, London was under sustained aerial bombardment by night and by day. Throughout the war, the capital was the nation's front line; by its end, 30,000 Londoners had lost their lives. Yet if the bombing defined the era for those who lived through it, the months of terror were outnumbered by those spent knitting together the fabric of daily life at work, in the home, on the allotment, in the cinema or theatre and, not least, standing in those interminable queues for daily necessities that were such a feature of London's war. Much has been written about 'the Myth of the Blitz' but in this riveting social history, Jerry White has unearthed what actually happened during those tempestuous years, getting close up to the daily lives of ordinary people, telling the story through their own voices. At the end of it all, the Battle of London was won not on the playing fields of Eton but in the playgrounds of a thousand council elementary schools across the capital.

If resort life is what you crave, the long ramble in the Charlevoix region of Quebec offered by Philippe Dubé's book provides the desired change of scene. Using many photographs and illustrations of the elegant resort homes of the area, the people

who built and inhabited them, and the tourists who flocked there during the summer, Dubé captures both the untamed beauty and the unique history of this remote resort region. From the introduction: Charlevoix sits on the north shore of the St Lawrence River in a fertile valley first colonized by the merchansys of Québec. Its early development under the French Régime was sporadic, but in due course the commercial climate improved. In 1762 Messrs John Nairne and Malcolm Fraser, officers of the Regiment of Fraser Highlanders, began work on their respective

properties of Murray Bay and Mount Murray, granted by Governor James Murray. In their time the area was already renowned for its scenery and picturesque way of life, and visitors would come from countirs far off as Scotland to stay for several months. Ever since, Charlevoix has fascinated travellers and charmed summer vacationers searching for peace and quiet. The locals, for their part, have welcomed outsiders. For over two centuries, then, Charlevoix has been a meeting place for the rural culture of the French and the urban culture that is by tradition predominantly Anglo-Saxon.
