Welcome to the world of
Hedgemond the Hunter, a
brave and stubborn little
hedgehog. Down in the
wild woods he proudly

tends his beloved house,
but there are some
animals who just can't
understand what the fuss
is about! Find out just how
Hedgemond proves to the
grumpy bear and the
greedy boar that there
truly is no place like
home. Hedgehog's House
is a story about caring for
your natural habitat. Set
in the unspoilt

environment of the forest, we find the wild creatures arguing about what home means: is it simply a place we should take for granted, or is it something to be cherished and protected? Despite the persuasions of charming Miss Fox and the jeers of the angry wolf, Hedgemond steadfastly proves that his home is his castle, reminding us all that we each need to care for the places we live.

Education on the Edge of Possibility Cambridge University Press
Produced for the Council of Europe project " Learning and teaching about the history of Europe in the 20th century", this book concentrates on the how rather than the what of teaching. Besides a study of selected themes and topics, it covers the teaching of sensitive issues, the reading of visual archives, analysing

history on television and the Internet and assessing new technologies. Some of these new sources have not been made part of standard teacher training, yet they have a powerful role in the way young people perceive the past. The author is a Senior Research Fellow at Leirsinn Research Centre, University of Highlands and Islands Millennium Institute.

This book collects recent research on posing and

solving mathematical problems. Rather than treating these two crucial aspects of school mathematics as separate areas of study, the authors approach them as a unit where both areas are measured on equal grounds in relation to each other. The contributors are from a vast variety of countries and with a wide range of experience; it includes the work from many of the leading researchers in the area and an important number of young researchers. The book is

divided in three parts, one directed to new research perspectives and the other two directed to teachers and students, respectively.

Whether he's teaching his pet pig to dance, being chased by a mad cow or wrestling a robber, Emil's adventures never stop.

Hens, dogs, little sisters - and adults - all flee his path. But Emil doesn't mean to be bad, it's just that trouble - and fun - follow him wherever he goes. A collection of utterly engaging tales from one of the world's best-loved children's authors.

Croatian Tales of Long Ago Random House
Having grown up in his parents' gastropub, Jamie Oliver has always had a special place in his heart for British cooking. And in recent years there's been an exciting revolution in

the British food world in general. English chefs, producers, and artisans are retracing old recipes, rediscovering quality ingredients, and focusing on simplicity and quality. Jamie celebrates the best of the old and new (including classic British immigrant food) in his first cookbook focused on England. Here are over 130 great, easy-to-prepare recipes, ranging from salads—Heavenly Salmon and Epic Roast Chicken; to puddings—Rhubarb and Rice Pudding and Citrus

Cheesecake Pots; to Sunday lunch—Guinness Lamb Shanks and Roast Quail Skewers; and, of course, the crumbliest scones. America has already fallen for the new British gastropub cooking, with popular restaurants by chefs such as April Bloomfield of The Spotted Pig and the John Dory. Now Jamie shows how to make the same delicious food at home. This is definitely not your grandmother's mushy peas!

It Takes a Candidate serves as the first systematic, nationwide

empirical account of the manner in which gender affects political ambition. Based on data from the Citizen Political Ambition Study, a national survey conducted on almost 3,800 'potential candidates', we find that women, even in the highest tiers of professional accomplishment, are substantially less likely than men to demonstrate ambition to seek elected office. Women are less likely than men to be recruited to run for office. They are less likely than

men to think they are 'qualified' to run for office. And they are less likely than men to express a willingness to run for office in the future. This gender gap in political ambition persists across generations. Despite cultural evolution and society's changing attitudes toward women in politics, running for public office remains a much less attractive and feasible endeavor for women than men. *Dunavska strategija* Springer From the great Croatian

writer: a masterly work of literature—hilarious, unforgiving, and utterly reasonable. Until the age of fifty-two, the protagonist of *On the Edge of Reason* suffered a monotonous existence as a highly respected lawyer. He owned a carriage and wore a top hat. He lived the life of “an orderly good-for-nothing among a whole crowd of neat, gray good-for-nothings.” But, one evening, surrounded by ladies and gentlemen at a party, he hears the Director-General tell a lively anecdote of how he

shot four men like dogs for trespassing on his property. In response, our hero blurts out an honest thought. From this moment, all hell breaks loose. Written in 1938, *On the Edge of Reason* reveals the fundamental chasm between conformity and individuality. As folly piles upon folly, hypocrisy upon hypocrisy, reason itself begins to give way, and the edge between reality and unreality disappears. *Research-based Teacher Education in Finland* Association for
