The New Politics of the Textbook
Prentice Hall

This book focuses on assigned reading in
middle grade science courses and the 14
actions proficient readers take before,
during, and after reading to comprehend
assigned course texts including textbook
chapters, book chapters, passages, and
articles.--Vanessa Dodo Seriki, associate
professor of science education, and
coordinator of graduate programs in
mathematics and science education,
Morgan State University

In an era when corporate and political
leaders are using their power to control
every aspect of the schooling process in
North America, there has been
surprisingly little research on the impact
of textbook content on students. The

contributors of this volume and its partner (The New Politics of the Textbook: Problematizing the Portrayal of Marginalized Groups in Textbooks) guide educators, school administrators, academics, and other concerned citizens to unpack the political, social, and cultural influences inherent in the textbooks of core content areas such as math, science, English, and social science. They urge readers to reconsider the role textbooks play in the creation of students' political, social, and moral development and in perpetuating asymmetrical social and economic relationships, where social actors are bestowed unearned privileges and entitlements based upon their race, gender, sexuality, class, religion and linguistic background. Finally, they suggest ways to resist the hegemony of those texts through critical analyses, critical questioning, and critical pedagogies.
