Winner of the National Communication Association's International and Intercultural Communication Division's 2014 Outstanding Authored Book of the Year award This book engages the

notion of cosmopolitanism as it applies to intercultural communication, which itself is undergoing a turn in its focus from post-positivistic research towards critical/interpretive and postcolonial perspectives, particularly as globalization informs more of the current and future research in the area. It emphasizes the postcolonial perspective in order to raise critical consciousness about the complexities of intercultural communication in a globalizing world, situating cosmopolitanism—the notion of global citizenship—as a multilayered lens for research. Cosmopolitanism as a theoretical repertoire provides nuanced descriptions of what it means to be and communicate as a global citizen, how to critically study interconnectedness within and across cultures, and how to embrace differences without glossing over them. Moving intercultural communication studies towards the global in complex and nuanced ways, this book highlights crucial links between globalization, transnationalism, postcolonialism, cosmopolitanism, social injustice and intercultural communication, and will help in the creation of classroom spaces devoted to exploring these links. It also engages the links between theory and praxis in order to move towards intercultural communication pedagogy and research that simultaneously celebrates and interrogates issues of cultural difference with the aim of creating continuity rather than chasms. In sum, this book orients intercultural communication scholarship firmly towards the critical and postcolonial, while still allowing the incorporation of traditional intercultural communication concepts, thereby preparing students, scholars, educators and interculturalists to communicate ethically in a world that is

simultaneously global and local.

*Intercultural Communication for Global Business* Routledge

From language classrooms to outdoor markets, the workplace is fundamental to socialisation. It is not only a site of employment where money is made and institutional roles are enacted through various forms of discourse; it is also a location where people engage in social actions and practices. The workplace is an interesting research site because of advances in communication technology, cheaper and greater options for travel, and global migration and immigration. Work now requires people to travel over great geographical distances, communicate with cultural ‘others’ located in different time zones, relocate to different regions or countries, and conduct business in online settings. The workplace is thus changing and evolving, creating new and emerging communicative contexts. This volume provides a greater understanding of workplace cultures, particularly the ways in which working in highly interconnected and multicultural societies shape language and intercultural communication. The chapters focus on critical approaches to theory and practice, in particular how practice is used to shape theory. They also question the validity and universality of existing models. Some of the predominant models in intercultural communication have been criticised for being Eurocentric or Anglocentric, and this volume proposes alternative frameworks for analysing intercultural communication in the workplace. This book was originally published as a special issue of *Language and Intercultural Communication*.

Communication SAGE Publishing India

Competence in communicating across cultures is a prerequisite for success in today's fast-changing global community. In *Intercultural Communication*, Patel, Li and Sooknanan draw on their deep intercultural experience to show us how to build successful communication bridges across diverse cultures. The book explores various theoretical positions on global communication ethics and norms by providing an overview of the contemporary socio-cultural situation and seeking ways in which common ground may be found between these different positions. The authors raise points of critical reflection on intercultural events and issues in various areas of communication including health, work, environment and education. The book also covers a range of issues, from the interactions of various cultures to the expansion of social organizations and the growing global infrastructure. By integrating 'glocal' perspectives in intercultural communication, the book addresses the long-term strategy of developing a global community without sacrificing indigenous local values.

Globalizing Intercultural Communication

Peter Lang Limited, International Academic Publishers

Books on intercultural communication are rarely written with an intercultural readership in mind. In contrast, this multinational team of authors has put together an introduction to communicating across cultures that uses examples and case studies from around the world. The book further covers essential new topics, including international conflict, social networking, migration, and the effects technology and mass media play in the globalization of communication. Written to be

Each chapter brings to life the links between theory and practice and between the global and the local, introducing key theories and their practical applications. Along the way, you will be supported with first-rate learning resources, including:

- theory corners with concise, boxed-out digests of key theoretical concepts
- case illustrations putting the main points of each chapter into context
