The Indian adaptation of the 9th edition of this book on social psychology provides broad insights into the culture, traditions and contexts of Indian society while explaining the various concepts of social behavior. The strength of this adapted edition is to actively engage the students by including real-life examples in Indian context along with the empirical Indian researches which are comparable with the vast in-depth scientific study of the various social psychological concepts. Features 1. The book includes Indian case studies, data and researches so as to bring clarity about the causes, consequences and control of different social problems in the Indian scenario 2. To facilitate better learning and understanding, the book contains review questions, 'Try It!' exercises and knowledge testing through multiple-choice questions 3. These are retained in the adaptation with a few modifications in the Indian context. Last but not the least, this adaptation book is a dynamic introduction to the science, relevance and applications of social psychology in the Indian context 4.

Psychology: Core Concepts, 7/e provides rich coverage of the foundational topics taught for introductory psychology. Each major section of every chapter is organized around a single concept, called a Core Concept. The Core Concepts allow readers to draw connections across the chapter and see the big picture of psychology. Learning is then reinforced through focused application and critical thinking activities. The 7th edition features an enhanced critical thinking emphasis, with new chapter-opening "Problems" and new end-of-chapter critical thinking applications that promote active learning. MyPsychLab is an integral part of the Zimbardo / Johnson / McCann Hamilton program. Engaging activities and assessments provide a teaching and learning system that helps students think critically. With MyPsychLab, students can watch videos on psychological research and applications, participate in virtual classic experiments, and develop critical thinking skills through writing. A web based program designed to be used by undergraduate students in child and lifespan development courses. This interactive simulation offers students the opportunity to act as a parent and raise a virtual child. By making decisions about specific scenarios, students raise their child from birth to age 17 and see how their own decisions and parenting actions affect their child over time. At each age, students are given feedback about the various milestones their child has attained. As in real life, certain unplanned events may randomly be presented for students. Key stages of the child's development will include personalized feedback. *** Available stand-alone (use this ISBN) or within OneKey for Feldman's Child Development 4e; Kail's Children and Their Development, 4e; or Craig/Dunn's Understanding Human Development. Your students will be able to integrate their course work with their practical experiences of raising a child.

Helping students become scientifically literate. Psychological Science: Modeling Scientific Literacy helps students view psychology as a practical, modern science—and gives them the tools to better understand their world. Organized around a scientific literacy model, the text's content and features encourage scientific inquiry, prompting students to ask a series of scientific-minded questions about each topic. All aspects of the book—the topics covered, learning objectives, quizzes, even the modular format—have been developed to enable students to categorize the overwhelming amount of information they encounter, and to ignite their interest in psychological science. To ensure that scientific literacy is at the core, content and features are organized around a scientific literacy model asking students: o What do we know about this? o How can science help to explain this? o Can we critically evaluate the evidence? o Why is this relevant? Teaching & Learning Experience Personalize Learning - The new MyPsychLab delivers proven results in helping students succeed, provides engaging experiences that personalize learning, and comes from a trusted partner with educational expertise and a deep commitment to helping students and instructors achieve their goals. Oltmanns and Emery bring both the science and the personal aspects of abnormal psychology to life

with a focus on evidence-based practice and emerging research. By emphasizing that abnormal psychology is not about them, it's about all of us. Using extensive case studies, they present the most cutting edge information on abnormal psychology by covering methods and treatment in context. Organized around the way students learn, this ground breaking text integrates the biological, psychological, and social perspectives in one concurrent story. With a focus on critical thinking, Oltmanns and Emery prepare students for the DSM-V and beyond by addressing key issues and concepts that will remain, even as diagnostic criteria change.
