The Power of Education Pearson Higher Ed

From Homeric poems to contemporary works, this book traces the words that express the various notions of freedom in Classical Greek, Latin, and medieval and modern European idioms.

Examining writers from Plato and Aristotle to Nietzsche and Foucault, this theoretical mapping shows old and new boundaries of the horizon of freedom.

This book is designed primarily for use in beginning and intermediate Latin classes at the undergraduate level (semesters 1-4 of college Latin). This Latin reader will present passages of 3-10 lines taken from Classical authors (including Caesar, Catullus, Cicero, Martial, Ovid, Vergil, etc.) and inscriptions. The selections will consist of lively unadapted passages suitable for elementary and intermediate level Latin students. These passages will be annotated in such a way

that instructors can use them in a wide variety of classroom settings. The selections will be arranged to emphasize certain points of grammar and syntax (case use: Nominative, Genitive, Dative, Accusative, and Ablative; Pronouns; Ablative Absolutes; Relative Clauses; Indirect Statement; Subordinate Clauses; Subjunctive Verbs; and Conditionals). The arrangement of topics and the length of the passages is intended to provide the highest degree of flexibility in the classroom: a single selection could provide additional practice in syntax and translation during the first or last few minutes of a class session; a series of selections could provide the foundation of a class meeting; selections could be used for practice and/or testing in translating at sight; or the entire reader could be used as the foundation of a comprehensive review and transition into intermediate and advanced Latin. In essence, this reader will expose students of Latin to extended passages of unadapted Latin from a wide variety of important authors at the earliest stage in language instruction. This early exposure to Classical authors will enable students to transition more easily from beginning and intermediate Latin textbooks to authentic Latin prose and poetry. Originally published in 1905, this book argues that the educational outlook was rather misty and depressing both at home and abroad. That science should be a staple of education, that the teaching of Latin, of modern languages, of mathematics, must be reformed, that nature and handicrafts should be pressed into service for the training of the eye and hand, that boys and girls must learn to write English and therefore must know something of history and literature; and, on the other hand, that education must be made more technical and utilitarian - these, and such as these, are the cries of expedience with which we take the field. But we have no unifying principle, no definite aim; in fact, no philosophy of education.

Virgil, Aeneid, 4.1-299 Wayne State University Press

Examining a wide array of ancient writings, Brent Nongbri dispels the commonly held idea that there is such a thing as ancient religion. Nongbri shows how misleading it is to speak as though religion was a concept native to pre-modern cultures.

Learn to Read Latin Harper Collins

A Companion to Isidore of Seville presents nineteen chapters from leading international scholars

on Isidore of Seville (d. 636), the most prominent bishop of the Visigothic kingdom in Hispania in the seventh century and one of the most prolific authors of early medieval western Europe. Introductory studies establish the political, religious and familial contexts in which Isidore operated, his key works are then analysed in detail, as are some of the main themes that run throughout his corpus. Isidore's influence extended across the entire Middle Ages and into the early modern period in fields such as church governance and pastoral care, theology, grammar, science, history-writing, and linguistics – all topics that are explored in the volume. Contributors: Graham Barrett, Winston Black, José Carracedo Fraga, Santiago Castellanos, Pedro Castillo Maldonado, Jacques Elfassi, Andrew Fear, Amy Fuller, Raúl González Salinero, Jeremy Lawrance, Céline Martin, Thomas O'Loughlin, Martin J. Ryan, Sinéad O'Sullivan, Mark Lewis Tizzoni, Purificación Ubric Rabaneda, Faith Wallis, Immo Warntjes, and Jamie Wood. See inside the book.

The Rights of War and Peace Bloomsbury Publishing

This book contains over fifty passages of Latin from 200 BC to AD 900, each with translation and linguistic commentary. It is not intended as an elementary reader (though suitable for university courses), but as an illustrative history of Latin covering more than a millennium, with almost every century represented. Conventional histories cite constructions out of context, whereas this work gives a sense of the period, genre, stylistic aims and idiosyncrasies of specific passages. 'Informal' texts, particularly if they portray talk, reflect linguistic variety and change better than texts adhering to classicising norms. Some of the texts are recent discoveries or little known. Writing tablets are well represented, as are literary and technical texts down to the early medieval period, when striking changes appear. The commentaries identify innovations, discontinuities and phenomena of long duration. Readers will learn much about the diversity and development of Latin.

The Conferences of John Cassian Yale University Press

Plainchant is the oldest substantial body of music that has been preserved in any shape or form. It was first written down in Western Europe in the eighth to ninth centuries. Many thousands of chants have been sung at different times or places in a multitude of forms and styles, responding to the differing needs of the church through the ages. This book provides a clear and concise introduction, designed both for those to whom the subject is new and those who require a reference work for advanced study. It begins with an explanation of the liturgies that plainchant was designed to serve. It describes all the chief genres of chant, different types of liturgical book, and plainchant notations. After an exposition of early medieval theoretical writing on plainchant, Hiley provides a historical survey that traces the constantly changing nature of the repertory. He also discusses important musicians and centers of composition. Copiously illustrated with over 200 musical examples, this book highlights the diversity of practice and richness of the chant repertory in the Middle Ages. It will be an indispensable introduction and reference source on this important music for many years to come.

Augustine and Porphyry Scott Foresman & Company

Love and tragedy dominate book four of Virgil's most powerful work, building on the violent emotions invoked by the storms, battles, warring gods, and monster-plagued wanderings of the epic's opening. Destined to be the founder of Roman culture, Aeneas, nudged by the gods, decides to leave his beloved Dido, causing her suicide in pursuit of his historical destiny. A dark plot, in which erotic passion culminates in sex, and sex leads to tragedy and death in the human realm, unfolds within the larger horizon of a supernatural sphere, dominated by power-conscious divinities. Dido is Aeneas' most significant other, and in their encounter Virgil explores timeless themes of love and loyalty, fate and fortune, the justice of the gods, imperial ambition and its victims, and ethnic differences. This course book offers a portion of the original Latin text, study questions, a commentary, and interpretative essays. Designed to stretch and stimulate readers, Ingo Gildenhard's incisive commentary will be of particular interest to students of Latin at both A2 and undergraduate level. It extends beyond detailed linguistic analysis to encourage critical engagement with Virgil's poetry and discussion of the most recent scholarly thought.

Minimus Pupil's Book Aeterna Press

This book offers perspectives on the legal and intellectual developments of the twelfth century. Gratian's collection of Church law, the *Decretum*, was a key text in these developments. Compiled in around 1140, it remained a fundamental work throughout and beyond the Middle Ages. Until now, the many mysteries surrounding the creation of the *Decretum* have remained unsolved, thereby hampering exploration of the jurisprudential renaissance of the twelfth century. Professor Winroth has now discovered the original version of the *Decretum*, which has long lain unnoticed among medieval manuscripts, in a version about half as long as the final text. It is also different from the final version in many respects - for example, with regard to the use of of Roman law sources - enabling a reconsideration of the resurgence of law in the twelfth century.

An Anthology of Informal Latin, 200 BC-AD 900 Oxford University Press

The Institutes are a complete exposition of the elements of Roman law and are divided into four books—the first treating of persons and the differences of the status they may occupy in the eye of the law; the second of things, and the modes in which rights over them may be acquired, including the law relating to wills; the third of intestate succession and of obligations; the fourth of actions and their forms. For many centuries they had been the familiar textbook of all students of Roman law.

This book is about the power of education: the kind of education that simultaneously improves the quality of life both of individuals and the wider society. It explains why education must be viewed as a basic human right, as a value in and of itself, and reviews the evidence on how education builds the human resources that individuals and nations need to be productive, to continue to learn, to solve problems, to be creative, and to live together and with nature in peace and harmony. When nations ensure that such an education is accessible to all throughout their lives, education becomes the engine of sustainable development – economic, social, moral and cultural. The book is unique in that it covers the development of education at all levels in all countries of

the Asia-Pacific region and beyond, using the latest international data bases, while blending in analyses of both quantitative and qualitative research.

The Complete Works of Venerable Bede: Commentaries on the Scriptures Cambridge University Press

This handbook for teachers provides both practical, up-to-date guidance and a theoretical overview on a number of key topics in Latin teaching. Using a wealth of interviews, observations and pupil transcripts, Steven Hunt title utilizes case-study evidence of excellent practice in teaching and learning from a wide variety of institutions: from outreach programmes, community schools and academies in the UK, to New York Charter Schools, KIP schools and schools in Eastern Seaboard states in the USA. Offering practical advice on topics such as essay writing, teaching controversial topics including women, slavery, ethnicity and social hierarchy, making use of primary sources and using ICT to advance language skills, the book also engages with broader questions of approach and theory. These include a survey of the three main approaches to Latin teaching: grammar-translation, communicative and reading approaches; explanation of cognitive and social approaches to learning; and analysis of the differences between intrinsic and extrinsic motivation. Moreover, traditional arguments about the value and purpose of learning Latin at school level are re-examined in the light of current educational thinking and government policy-making. This book is invaluable for trainees, newly qualified teachers and more experienced practitioners looking for practical ideas and strategies to motivate and engage learners of Latin. A companion website www.startingtoteachlatin.org is under construction and will contain a range of resources and information for teachers.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. A Graphical Approach to Algebra and Trigonometry illustrates how the graph of a function can be used to support the solutions of equations and inequalities involving the function. Beginning with linear functions in Chapter 1, the text uses a four-part process to analyze each type of function, starting first with the graph of the function, then the equation, the associated inequality of that equation, and ending with applications. The text covers all of the topics typically caught in a college algebra course, but with an organization that fosters students' understanding of the interrelationships among graphs, equations, and inequalities. With the Fifth Edition, the text continues to evolve as it addresses the changing needs of today's students. Included are additional components to build skills, address critical thinking, solve applications, and apply technology to support traditional algebraic solutions, while maintaining its unique table of contents and functions-based approach. A Graphical Approach to Algebra and Trigonometry continues to incorporate an open design, with helpful features and careful explanations of topics.

The Revised Latin Primer Cambridge University Press

The circulation of books was the motor of classical civilization. However, books were both expensive and rare, and so libraries - private and public, royal and civic - played key roles in articulating intellectual life. This collection, written by an international team of scholars, presents a fundamental reassessment of how ancient libraries came into being, how they were organized and how they were used. Drawing on papyrology and archaeology, and on accounts written by those who read and wrote in them, it presents new research on reading cultures, on book collecting and on the origins of monumental library buildings. Many of the traditional stories told about ancient libraries are challenged. Few were really enormous, none were designed as research centres, and occasional conflagrations do not explain the loss of most ancient texts. But the central place of libraries in Greco-Roman culture emerges more clearly than ever.

De Bello Gallico, Book 4 Oxford University Press, USA
