compact, friendly in price, and still realized with the same commitment to impeccable production. *Logo Modernism* Logo Modernism Examine the distillation of modernism in graphic design with this vast collection of approximately 6,000 logos from 1940-1980. Ranging from media outfits to retail giants, airlines to art galleries, these clean, clear visual concepts may be seen as the

visual birth of corporate identity. The History of Graphic Design, 1960-Today In an innovative and invigorating exploration of the complex relations between women and the modern, Rita Felski challenges conventional male-centered theories of modernity. She also calls into question those feminist perspectives that have either demonized the modern as inherently patriarchal, or

else assumed a simple opposition between men's and women's experiences of the modern world. Combining cultural history with cultural theory, and focusing on the fin de siècle, Felski examines the gendered meanings of such notions as nostalgia, consumption, feminine writing, the popular sublime, evolution, revolution, and perversion. Her approach is comparative and interdisciplinary, covering a wide variety of texts from the English, French, and German traditions: sociological theory, realist and naturalist novels, decadent literature, political essays and speeches, sexological discourse, and sentimental popular fiction. Male and female writers from Simmel, Zola, Sacher-Masoch, and Rachilde to Marie Corelli, Wilde, and Olive Schreiner come under Felski's scrutiny as she exposes the varied and often contradictory connections between femininity and modernity. Seen through the lens of Felski's discerning eye, the last fin de siècle provides illuminating parallels with our own. And Felski's keen analysis of the matrix of modernism offers needed insight into the sense of cultural crisis brought on by

postmodernism.

"Rabaté's

strength is that he does not treat modernism as a monolith. The study's originality is in its close examination of several 'key' themes in several 'key' texts, almost all of which he reads autobiographically. . . . It is the pattern of these themes as well as the psychoanalytic method that holds these essays together. The result is a fresh look not at modernism as a whole, but at some central

themes and images of the modernists."-- S. E. Gontarski, Crosscurrents Series Editor Jean-Michel Rabaté, the eminent French Joycean, combines psychoanalytical and philosophical concepts in rereading the history of modernity to give a more precise meaning to the term "modernism." Rabaté focuses throughout on a single theme, the ghostly nature of modernity.

In writing a history of the concept of modernity with the awareness that the radically new has often been subject to the effects of the return of the repressed, Rabaté analyzes the notion of loss in various fields: in Freudian aesthetics of color, in literary history, and in philosophy. The postmodernist fascination with a lost object allows a reconsideratio

n of the boundaries of such terms as "modernism" and "postmodernism." The conclusion ties together all these motifs, from Joyce to Barthes, together and shows their theoretical basis in Marx's criticism of ideology and in Freud's consideration of mourning. From the analysis of "color" as an unthinkable object of discourse to an aesthetics of the unrepresentable, Rabaté points to the

possibility of an "ethics of mourning," which would seem capable of overcoming the dead end of history whose ending condemns it to eternal repetition. This work will appeal to a wide community of scholars. Its strong French and continental emphasis has application in literary studies, particularly English, French, and comparative studies. An analysis of the invasion of our personal lives by logo-promoting, powerful corporations combines muckraking journalism with contemporary memoir to discuss current consumer culture *The Gender of Modernity* Taschen America Llc 'The next time you are tempted to design a logo, take a look at this book. Chances are, it has already been done. By raising the bar, this

wonderful resource will make better designers of all of us.' – Michael Bierut of Pentagram Design, on the first edition of Logo This bestselling logo bible has provided graphic designers with an indispensable reference source for over a decade, and over 300 new logos have been added to this fully revised and updated edition. All the logos are grouped into categories such as

crosses, stars, crowns, animals, and people, and are shown in black and white to emphasize the visual form of the logos. This offers designers a ready resource to draw upon in the research phase of identity projects. Logos are also indexed alphabetically by name of designer, and by industrial sector for ease of use. This book argues that literary modernists engaged creatively with modernity's expanding forms of collective experience and

performative identities; their work clarifies how popular subjectivity evolves from a nineteenth-century liberal citizenry to the contemporary sense of a range of political multitudes struggling with conditions of oppression. *The History of Graphic Design. 40th Ed.* Taschen America Llc This book contains essays on race relations in America since 1965.

punctum books In this splendidly illustrated book, graphic designer R. Roger Remington and art historian Barbara Hodik profile the careers and contributions of nine men who shaped American graphic design from the 1930s to the 1950s: Mehemed Fehmy Agha, Alexey Brodovitch, Charles

Coiner, William Golden, Lester Beall, Will Burtin, Alvin Lustig, Ladislav Sutnar, and Bradbury Thompson. The book explores each designer's milieu, education, personal philosophy of design, body of work, client relations, and problem-solving approaches. The more than 200 illustrations, 55 in color, are drawn from almost every medium of graphic expression,

including posters, advertisements, magazines, book jackets, business graphics, and signage. Both authors teach at Rochester Institute of Technology. R. Roger Remington is professor of graphic design and Barbara J. Hodik is professor of art history.

Modernism and the Idea of the Crowd

Laurence King Publishing
In this groundbreaking book David Roberts sets out to demonstrate the centrality

of the total work of art to European modernism since the French Revolution. The total work of art is usually understood as the intention to reunite the arts into the one integrated whole, but it is also tied from the beginning to the desire to recover and renew the public function of art. The synthesis of the arts in the service of social and cultural regeneration was a particularly German

dream, which made Wagner and Nietzsche the other center of aesthetic modernism alongside Baudelaire and Mallarmé. The history and theory of the total work of art pose a whole series of questions not only to aesthetic modernism and its utopias but also to the whole epoch from the French Revolution to the totalitarian revolutions of the twentieth century. The total work of art indicates

the need to revisit key assumptions of modernism, such as the foregrounding of the autonomy and separation of the arts at the expense of the countertendencies to the reunion of the arts, and cuts across the neat equation of avant-gardism with progress and deconstructs the familiar left-right divide between revolution and reaction, the modern and the antimodern. Situated at

the interface between art, religion, and politics, the total work of art invites us to rethink the relationship between art and religion and art and politics in European modernism. In a major departure from the existing literature David Roberts argues for twin lineages of the total work, a French revolutionary and a German aesthetic, which interrelate across the whole epoch of European

modernism, culminating in the aesthetic and political radicalism of the avant-garde movements in response to the crisis of autonomous art and the accelerating political crisis of European societies from the 1890s forward.

More than a century after its beginnings, modernism still has the power to shock, alienate or challenge readers.

Modernist art and literature remain thought of as complex and difficult. This introduction explains in a readable, lively style how modernism emerged, how it is defined, and how it developed in different forms and genres. Pericles Lewis offers students a

survey of literature and art in England, Ireland and Europe at the beginning of the twentieth century. He also provides an overview of critical thought on modernism and its continuing influence on the arts today, reflecting the interests of current scholarship in the social and cultural contexts of modernism. The comparative perspective on Anglo-American and European modernism

shows how European movements have influenced the development of English-language modernism. Illustrated with works of art and featuring suggestions for further study, this is the ideal introduction to understanding and enjoying modernist literature and art.

The Total Work of Art in European Modernism

A new appreciation for the genius of architectural photographer Julius Shulman has opened the way for hundreds of abandoned masterworks to be rediscovered. The images burned in our memories, which to us represent the spirit of fifties and sixties design, were

those widely published in magazines and books; but what about those that were not?

The abandoned files of Julius Shulman show us another side of Modernism that has stayed quiet for many years. The exchange of visual information is crucial to the development, evolution, and promotion of architectural movements. If a building is not widely seen, its photograph rarely or never

published, it simply does not enter into architectural discourse. Many buildings photographed by Shulman suffered this fate, their images falling into oblivion. With this new book, Taschen brings them to light, paying homage to California Modernism in all its forms. It's like sneaking into a private history, into homes that have rarely been seen and hardly appreciated as of yet. Bringing

together nearly 300 forgotten masterpieces, Modernism Rediscovered breathes eternal life into these outstanding contributions to the modern architectural movement. *Raise, Race, Rays, Raze* Cambridge University Press First published in 1982, this book provides a descriptive and comparative study of some of the fundamental structural aspects of modernist poetic writing

in English, French and German in the first decades of the twentieth century. The work concerns itself primarily with basic structural elements and techniques and the assumptions that underlie and determine the modernist mode of poetic writing. Particular attention is paid to the theories developed by authors and to the essential 'principles of construction' that shape the structure of their poetry.

Considering the work of a number of modernist poets, Theo Hermans argues that the various widely divergent forms and manifestations of modernistic poetry writing can only be properly understood as part of one general trend. Stuff You Should Know Crosscurrents: Comparative Stu Five hundred of the most iconic graphic designs of all time, from the beginnings of mechanical reproduction

to the present The process of visual communication and problem-solving through the use of typography, space, image, and colour informs the way we connect across languages and cultures. Derived from the acclaimed Phaidon Archive of Graphic Design, this fascinating compendium celebrates the long, rich history of graphic design, from the first

sample of movable type and the Nuremberg Chronicle of the fifteenth century to the cutting-edge magazines, posters, and ephemera of today. Compiled and written by a global team of experts, this book is international in its scope and appeal. The Many Facades of Edith Sitwell Cambridge University Press This Companion offers the most comprehensive overview

available of modernist poetry, its forms, its major authors and its contexts. The first part explores the historical and cultural contexts and sexual politics of literary modernism and the avant garde. The chapters in the second part concentrate on individual authors and movements, while the concluding part offers a comprehensive overview of the early reception and subsequent

canonisation of modernist poetry. As well as insightful readings of canonical poets, the Companion features extended discussions of poets whose importance is now being increasingly recognised, such as Mina Loy, poets of the Harlem Renaissance, and postcolonial poets in the Caribbean, Africa and India. While modernist poets are often thought of as difficult, these essays will help

students to understand and enjoy their experimental, playful and fascinating responses to contemporary social and cultural change and their dialogue with the arts and with each other.
