GCSE Engineering Heinemann
Now in its eighth edition, Higher Engineering Mathematics has helped thousands of students succeed in their exams. Theory is kept to a minimum, with the emphasis firmly placed on problem-solving skills, making this a thoroughly practical introduction to the advanced engineering mathematics that students need to master. The extensive and thorough topic coverage makes this an ideal text for upper-level vocational courses and for undergraduate degree courses. It is also supported by a fully updated companion website with resources for both students and lecturers. It has full solutions to all 2,000 further questions contained in the 277 practice exercises.

A Review by HMI. A&C Black
This full colour student resource has been specifically written for the new GCSE in Engineering and is suitable for all awarding body specifications.

Now in its eighth edition, Bird's Basic Engineering Mathematics has helped thousands of students to succeed in their exams. Mathematical theories are explained in a straightforward manner, supported by practical engineering examples and applications to ensure that readers can relate theory to

practice. Some 1,000 engineering situations/problems have been 'flagged-up' to help demonstrate that engineering cannot be fully understood without a good knowledge of mathematics. The extensive and thorough coverage makes this a great text for introductory level engineering courses - such as for aeronautical, construction, electrical, electronic, mechanical, manufacturing engineering and vehicle technology - including for BTEC First, National and Diploma syllabuses, City & Guilds Technician Certificate and Diploma syllabuses, and even for GCSE revision. Its companion website provides extra materials for students and lecturers, including full solutions for all 1,700 further questions, lists of essential formulae, multiple choice tests, and illustrations, as well as full solutions to revision tests for course instructors.

BTEC First Engineering Routledge
All the mandatory units of the 2010 BTEC Level 3 Engineering specification, plus selected popular optional units Clear, full colour layout and numerous activities, worked examples and questions with answers, make it easy for students to learn and revise for their exams Content you can trust - written by two lecturers with over 50 years combined experience of designing and delivering engineering qualifications Free student website with interactive quizzes, downloads and additional material to support learning The third edition of this bestselling textbook ensures that all the mandatory units of 2010 BTEC Level 3 Engineering

specification are fully covered in a way that encourages students to explore engineering for themselves, developing the expertise and knowledge required at this level. Key points and definitions highlight the most important concepts and hundreds of activities and worked examples help put theory in context. Questions throughout the text, with answers provided, allow students to test their knowledge as they go, while end of unit review questions are ideal for exam revision and set course work. For lecturers a Tutor Support DVD-ROM is available to help with the delivery of the programme: BTEC National Engineering Tutor Support Material, ISBN 978-0-08-096683-0. Units covered: Unit 1 - Health and Safety in the Workplace, Unit 2 - Communications for Engineering Technicians, Unit 3 - Engineering Project, Unit 4 - Mathematics for Engineering technicians, Unit 5 - Mechanical Principles and Applications, Unit 6 - Electrical and Electronic Principles, Unit 7 - Business Operations in Engineering, Unit 8 - Engineering Design. A free student website, including answers to all activities, is available at <http://www.key2study.com/btecnat> and features: Interactive quizzes with automatic marking and feedback A free comprehensive 2D CAD package for downloading A variety of spreadsheet tools for solving common engineering problems Useful engineering data summaries Extensive Visio symbol libraries for engineering drawing/CAD Drawing templates and sample drawings in industry-standard format Additional material to support learning activities and assignments Book chapter: Arithmetic and Trigonometric Fundamentals 'Test your Knowledge' and 'End of Unit Review' questions *BTEC National NIII - Mathematics for*

BTEC National for IT Practitioners: Business Units has been written specifically to cover the business pathway of the BTEC National specifications. This book caters for one of the most popular pathways in the BTEC National specifications, bringing together all the key specialist units for students who have chosen the business route, including the core units specific to this pathway that aren't covered in the core unit book. When used alongside its companions for the core units and systems support pathways, this series delivers the most accessible and usable student textbooks available for the BTEC National. Units covered: Unit 1 - Exploring Business Activity Unit 4 - IT Project Unit 2 - Investigating Business Resources Unit 34 - E Commerce Unit 3 - Introduction to Marketing Unit 35 - Impact of the Use of IT on Business Systems Unit 4 - IT Project Unit 34 - E Commerce Unit 35 - Impact of the Use of IT on Business Systems Written by an experienced tutor, each unit is illustrated with assessment activities, end-of-chapter questions, case studies and practical exercises. The result is a clear, straightforward textbook that encourages independent study and acts as a reference to various topics within the qualification.

First published in 2010, *Engineering Mathematics* is a valuable contribution to the field of Further Education.

Routledge

A clearly written and easily accessible textbook that encourages independent study, covering all the core material required for the BTEC First Certificate and Diploma. Knowledge-check questions and activities are included throughout, along with review questions

and worked mathematical examples, all of which relate to real-world engineering contexts. Students will gain a valuable insight into various areas of engineering technology and related industries, providing a potential springboard to further training, qualifications, or suitable employment. For those students wishing to progress to BTEC National, this textbook covers all the vital material required as a prerequisite to NVQ Level 3. New in this edition:

- Updated in line with the 2010 changes to the BTEC First specifications
- Includes detailed information on assessment, featuring example questions and answers
- Layout and design changes provide extra clarity

Construction Mathematics Heinemann
A practical introduction to the engineering science and mathematics required for engineering study and practice. Science and Mathematics for Engineering is an introductory textbook that assumes no prior background in engineering. This new edition covers the fundamental scientific knowledge that all trainee engineers must acquire in order to pass their examinations and has been brought fully in line with the compulsory science and mathematics units in the new engineering course specifications. A new chapter covers present and future ways of generating electricity, an important topic. John Bird focuses upon engineering examples, enabling students to develop a sound understanding of engineering systems in terms of the basic laws and principles. This book includes over 580 worked examples, 1300 further problems, 425 multiple choice questions (with answers), and contains sections covering the

mathematics that students will require within their engineering studies, mechanical applications, electrical applications and engineering systems. This book is supported by a companion website of materials that can be found at www.routledge/cw/bird. This resource includes fully worked solutions of all the further problems for students to access, and the full solutions and marking schemes for the revision tests found within the book for instructor use. In addition, all 447 illustrations will be available for downloading by lecturers.

Aircraft Engineering Principles is the essential text for anyone studying for licensed A&P or Aircraft Maintenance Engineer status. The book is written to meet the requirements of JAR-66/ECAR-66, the Joint Aviation Requirement (to be replaced by European Civil Aviation Regulation) for all aircraft engineers within Europe, which is also being continuously harmonised with Federal Aviation Administration requirements in the USA. The book covers modules 1, 2, 3, 4 and 8 of JAR-66/ECAR-66 in full and to a depth appropriate for Aircraft Maintenance Certifying Technicians, and will also be a valuable reference for those taking ab initio programmes in JAR-147/ECAR-147 and FAR-147. In addition, the necessary mathematics, aerodynamics and electrical principles have been included to meet the requirements of introductory Aerospace Engineering courses. Numerous written and multiple choice questions are provided at the end of each chapter, to aid learning.

Construction Mathematics is an introductory level mathematics text, written specifically for students of construction and related disciplines. Learn by tackling exercises based on real-life construction maths. Examples include: costing calculations, labour costs, cost of materials and setting out of building components. Suitable for beginners and easy to follow throughout. Learn the essential basic theory along with the practical necessities. The second edition of this popular textbook is fully updated to match new curricula, and expanded to include even more learning exercises. End of chapter exercises cover a range of theoretical as well as practical problems commonly found in construction practice, and three detailed assignments based on practical tasks give students the opportunity to apply all the knowledge they have gained. Construction Mathematics addresses all the mathematical requirements of Level 2 construction NVQs from City & Guilds/CITB and Edexcel courses, including the BTEC First Diploma in Construction. Additional coverage of the core unit Mathematics in Construction and the Built Environment from BTEC National Construction, Civil Engineering and Building Services courses makes this an essential revision aid for students who do not have Level 2 mathematics experience before commencing their BTEC National studies. This is also the ideal primer for any reader who wishes to refresh their

mathematics knowledge before going into a construction HNC or BSc.
