It is difficult to believe that our planet has been weaponized before our very eyes, but that is exactly what has happened. First, we were seduced by the convenience of a wireless world; then, atmospheric weather experimentation in the guise of carbons “climate change” converted the air we breathe into an antenna. Now, the geo-engineering we’ve been subjected to for two decades is being normalized as the “Star Wars” Space Fence rises around and within us. Is this the Space Age we were promised?

This comprehensive book provides practical guidance on the care of the critical patient in the emergency department. It focuses on the ED physician or provider working in a community hospital where, absent the consulting specialists found in a large academic center, the provider must evaluate and stabilize critically ill and injured patients alone. Structured in an easily accessible format, chapters present fundamental information in tables, bullet points, and flow diagrams. Emergency medicine scenarios covered across 38 chapters include acute respiratory failure, spinal cord injuries, seizures and status epilepticus, care of the newborn, and end-of-life care. Written by experts in the field, Emergency Department Critical Care is an essential resource for practicing emergency physicians and trainees, internists and family physicians, advance practice nurses, and physician's assistants who provide care in emergency departments and urgent care centers.

Consumerization - passengers toting their tablets, laptops, smartphones and e-readers on planes - has forced airlines to re-think. Should they continue to invest heavily into Inflight Entertainment (IFE) systems, or just concentrate on offering Wi-Fi and power in the cabin? The goal of this research was to define the IFE offer of the future. Four barriers that split the world into the three regions Europe, Asia and USA in terms of IFE development were identified: the cultural, the commercial, the technological and the legal barrier. This book focuses on Europe, which lags mostly behind with IFE out of these three regions. For example, as opposed to the US, no major European airline offers inflight Wi-Fi widely on its network, and in contrast to leading Middle Eastern airlines none offers inflight live TV or the usage of mobile phones without restriction, like on the ground. The target was to define IFE from a consumer perspective. To capture the latter the author evaluated consumer satisfaction methodologies and decided to go with the Kano approach, which categorizes alternatives of a product or service, in this case IFE, in must-be, attractive and indifferent elements. A representative online survey revealed movies and power to be must-be, TV and Wi-Fi to be attractive and the rest, e-books, music, games and duty free onboard, to be indifferent elements of IFE. The majority of people indicated that they would pay for movies and Wi-Fi but not for power supply, TV or other content. Differently said, content-wise

passengers only insisted in the supply of movies, for the rest they expected the airline to provide Internet and power so they themselves could get the content. Further, sub-groups were analysed - people within the sample with mutual characteristics like gender, travel frequency or ownership of smart devices. So was music on a plane a must for women and owners of iPhones were more willing to pay for apps than others. Overall, country of residence, travel purpose (leisure or business) and flight duration (long vs. short haul) were the greatest dividers re IFE requirements.

Truthout's Progressive Pick of the Week Ralph Nader's 10 Books to Provoke Conversation in 2014 Every year since 1976, Project Censored, our nation's oldest news-monitoring group--a university-wide project at Sonoma State University founded by Carl Jensen, directed for many years by Peter Phillips, and now under the leadership of Mickey Huff--has produced a Top-25 list of underreported news stories and a book, Censored, dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. Seven Stories Press has been publishing this yearbook since 1994, featuring the top stories listed democratically in order of importance according to an international panel of judges. Beyond the Top-25 stories, additional chapters delve further into timely media topics: The Censored News and Media Analysis section provides annual updates on Junk Food News and News Abuse, Censored Deja Vu, signs of hope in the alternative and news media, and the state of media bias and alternative coverage around the world. In the Truth Emergency section, scholars and journalists take a critical look at the US/NATO military-industrial-media empire. And in the Project Censored International section, the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world. A perennial favorite of booksellers, teachers, and readers everywhere, Censored is one of the strongest lifesigns of our current collective desire to get the news we citizens need--despite what Big Media tells us.
