domain is twofold. Firstly, they need to ensure that the firm has adequate finances and that they are using the right sources of funds that have the minimum costs.

Investment Analysis and Portfolio Management

The difference between corporate finance and financial management is that corporate finance focuses primarily on the long-term capital

structure and financing mix of the firm, while financial management has the responsibility of controlling the day-to-day operations of the business.

Cash Management Definition

Forty years after the introduction of the BCG growth-share matrix, some version of corporate portfolio management (CPM) is employed by most large multibusiness companies. But little is known about the current

practices of CPM. Which processes have companies adopted, and which executives in a company tend to be the main participants?

Active Bond Portfolio Management - Corporate Finance Institute

A good value creation strategy depends on a clear portfolio strategy and active portfolio management. These require the company to: define the value creation roles of the

different businesses in the corporate portfolio, differentiate capital allocation across the corporate portfolio, and shape and reshape the business portfolio over time through M&A and divestiture.
