Understanding Bernan  
Press

Bringing together one  
of the most important  
bodies of research into  
people's working  
practices, this volume

outlines the specific character of the ethnomethodological approach to work, providing an introduction to the key conceptual resources ethnomethodology has drawn upon in its studies, and a set of substantive chapters that examine how people work from a foundational perspective. With contributions from leading experts in the field, including Graham Button, John Hughes and Wes Sharrock, *Ethnomethodology at Work* explores the contribution that ethnomethodological studies continue to make to our understanding of the ways in which people actually accomplish work from day to day. As such, it will appeal not only to those

working in the areas of ethnomethodology and conversation analysis, but also to those with interests in the sociology of work and organisations.

Routledge Handbook of Physical Education Pedagogies Blurb Places, Towns and Townships is an excellent resource for anyone in need of data for all of the nation's cities, towns, townships, villages, and census-designated places in one convenient source. It compiles essential

information about places in the United States and the people who live in them such as: • population • housing • income • education • employment • crime • and much more! In addition to the tables, Places, Towns and Townships includes text that describes key findings, figures that call attention to noteworthy trends in data, and rankings of the largest cities by various demographics. Compiled from multiple government sources, the data in this unique reference volume represents the most current and accurate information available. This data will not be updated for several years, making Places, Towns and Townships an invaluable resource in the years to come.

Some interesting facts found in the 2016 edition of Places, Towns and Townships include:

- While about 18 percent of the population lived in the nation's 75 largest cities, 37 percent lived in places that were not incorporated as cities in 2014.
- There were 34 incorporated cities and one town with more than 500,000 people in 2014. These 34 cities and towns represented only 23 states.
- Among the 75 largest cities, Seattle, Boston, and San Francisco all have more than 72 percent of their residents in the 18-to-64 age group.
- During the years 2010 through 2014, 13.1 percent of the residents of the United States were born in foreign countries. In 43 cities—mostly medium-

sized cities and CDPs—more than half of the people are foreign-born. Many of these cities are in Florida.

- In the five-year period from 2010 through 2014, 63.9 percent of Americans age 16 and older were in the civilian labor force, and 9.2 percent of the labor force participants were unemployed.
- Nationally, Health Care and Social Assistance is the industrial sector with the most employees—16.6 percent of the total—followed by Retail Trade with 13.2 percent. Places, Towns and Townships makes a valuable addition to the County and City Extra Series.

In schools serving high concentrations of

bilingual learners, it can be especially challenging for teachers to maintain commitments to equity-minded instruction while meeting the demands of new educational policies, including national standards. This book details how one school integrated equity pedagogy into a standards-based curriculum and produced exemplary levels of achievement. As the authors illustrate, however, the school's dual commitment to bilingual education and standards-based reform engendered numerous complex tensions. Specifically, the authors describe teachers' attempts to balance demands for rigor and content coverage within their

high-performing school and with their diverse student population. They identify specific tensions that emerged around the following issues: the degree of academic struggle that is generative for student learning and the point at which such struggle becomes counterproductive the holding of high expectations for all learners and the provision of differentiated, student-centered learning experiences the CCSS emphasis on engaging students around more complex text and the contested determination of what constitutes complexity in text and in teaching the influence of high-stakes accountability on school norms and practices, including

teachers' interpretations and enactment of new national standards the performance pressures placed on teachers in today's educational policy context "This book offers welcome guidance on dialogical teaching to socially committed teachers and teacher educators." —Linda Valli, University of Maryland A must-read for those interested in transformative teacher learning." —Kris D.
