Pharmacology Jaypee Brothers Medical Publishers  
This new edition is a complete guide to medical pharmacology for students. Beginning with an overview of pharmacological principles, the following sections cover drugs used to treat disorders in different systems of the body. The next chapters discuss antimicrobial drugs and chemotherapy, and the book

concludes with a section on miscellaneous drugs including immunosuppressant drugs, antiseptics, vitamins, and vaccines. The eighth edition has been fully revised to provide the latest advances in the field. New drugs and the latest treatment guidelines have been added. Most chapters conclude with an exercise in therapeutic decision making and topics are extensively referenced. The text is highly illustrated with figures, charts and tables, and includes comprehensive appendices covering problem directed study, prescribing in pregnancy, and drugs

in breastfeeding. Key points

The revision of the Indian medical curriculum in 2018 put an emphasis on learner-centered, integrated, and competency-based learning. This is meant to facilitate the acquisition of skills along with ethical and humanistic values. The revised curriculum for undergraduate medical education enables the Indian medical graduate to recognize "Health for All" as a national goal and fulfill their societal obligations. The curriculum in pharmacology is witnessing a sea change from emphasis on animal experiments and dispensing pharmacy-based curriculum to an "applied" approach, where the emphasis is on how the student prescribes rationally, taking into view the various facets of the medicine and the patient. All competencies as per the new curriculum of the National Medical Commission (NMC) have been covered. Textbook of Pharmacology will not only help the students have a better grasp of the subject but also lay a strong foundation for the integration of pharmacological aspects with clinical subjects. Key Features: Comprehensive review of the subject with conceptual and factual information in

accordance with the new CBME curriculum Easy-to-understand format with accompanying illustrations, flowcharts, and mind maps to help the student in easy reading, remembering recollecting, and reproducing the content in the exam Presentation of information in tabular format for easy recall Multiple Choice Questions with answers to help students in preparing for postgraduate entrance exams and assist them in tackling real-life situations

Pharmacology is a rapidly progressing area of biomedical research, with new developments surfacing at regular intervals, constantly revolutionizing drug therapy for disease states. The interaction

of this discipline with other biomedical sciences has opened up new vistas and opportunities in drug design and development. Basic and clinical concepts in the mechanism and use of drugs are carefully integrated into hypotheses, which are aimed at the maintenance of a critical balance between health and disease. Current Trends in Pharmacology is a comprehensive collection of topics highly significant in the current health scenario. The book comprises a combination of articles in clinical and experimental pharmacology and toxicology from the viewpoint of both basic and clinical scientists. It also details recent developments in the basic aspects of drug action in some very relevant disease states like hypertension, atherosclerosis, arrhythmia, stroke, tuberculosis, hospital acquired pneumonia, and cancer. It also highlights the applied issues relating to rational use of drugs. The contributing authors are leading experts in their respective fields and have presented the topics in a lucid and comprehensive manner
