African Youth Cultures

in a Globalized World

Springer Nature

Many people in the

Niger Delta may not

have heard of the term

“environmental

injustice” before, but it

is just a new word for an old problem. Environmental justice is based on the principle that all people have a right to be protected from environmental pollution and to live in and enjoy a clean and healthy environment. In the Niger Delta environmental injustice is experienced mostly from the activities of the oil industries which have degraded the land, contaminated the water and polluted the air without proper compensation. Gas leakage is killing many people and continues to have a negative impact on the lives of the people living around the area. The aim of this book is to raise awareness of the issues affecting the Niger Delta region, and to encourage

involvement in the cause.

ExxonMobil and American Power Oxford Business Group

This volume provides an interdisciplinary analysis on the political role of corporations in society by using the analytical device of corporate citizenship. It questions what ideas on corporate citizenship may say about the ongoing publicization of the corporation and the implications of these developments for the public domain and welfare state.

Nature Under Siege

Lulu.com

All over the world, there is growing concern about the ramifications of globalization, late-modernity and general global social and economic restructuring

on the lives and futures of young people. Bringing together a wide body of research to reflect on youth responses to social change in Africa, this volume shows that while young people in the region face extraordinary social challenges in their everyday lives, they also continue to devise unique ways to reinvent their difficult circumstances and prosper in the midst of seismic global and local social changes. Contributors from Africa and around the world cover a wide range of topics on African youth cultures, exploring the lives of young people not necessarily as victims, but as active social players in the face of a shifting, late-modernist civilization. With

empirical cases and varied theoretical approaches, the book offers a timely scholarly contribution to debates around globalization and its implications and impacts for Africa's youth.

The Izon of the Niger Delta is a global history of the Izon, Ijo, or Ijaw people from their homelands in the Niger Delta, through Nigeria, the West and Central African coastlands, and in the Africa diaspora into Europe, the America's and the Caribbean. It is a preliminary study which raises questions and opens ground for further research. The book provides chapters that take an overview of issues on the environment of the Niger Delta, an analysis of the Ijo population, the language, culture, resources, history and linkage to the rest of Nigeria and the world. In effect these chapters provide a synopsis of the Ijo in the past and their situation in the

present.

Private Empire

Cambridge Scholars Publishing

Examines the range of environmental campaigns that are occurring across the planet. This title showcases a selection of case studies on grassroots initiatives and activism in areas such as green economic alternatives, regional activism in defence of communities, alternative or utopian communities, green politics and ecotourism.

A Adonis & Abbey Publishers Ltd
Corporate Security Responsibility? focuses on the role of private business in zones of conflict. The book contributes to closing the gap between research on Global

Governance and Peace and Conflict Studies. It applies a systematic research design to the study of corporate governance contributions to peace and security across a number of cases.

As the single most populous nation in Africa, Nigeria recently overtook South Africa as the largest economy on the continent.

Natural resources, oil and gas in particular, comprise the country's single largest revenue-earner but the 170m person economy also

has seen significant activity in recent years into the industrial, financial, telecoms and – as of 2013 – power sectors. Hydrocarbons reserves have traditionally attracted the vast majority of domestic and foreign investment in Nigeria. Oil production capacity has remained at roughly 2.5m barrels per day (bpd) since the start of 2000, although output fell to 2.2m bpd on average in 2012. Still, the country has long operated below its true potential and government efforts in recent years have sought to increase local value addition, by boosting refining capacity and minimising theft and bunkering. The country's banking sector has been through a significant

shake-up as well, resulting in a far healthier and more robust financial industry, while reforms in the telecoms and agricultural sectors have strengthened medium-term prospects.

Islam in the Niger Delta 1890-2017 Walter de Gruyter GmbH & Co KG
The Economics of Youth Restiveness in the Niger Delta outlines the important issue of restiveness, which has led to kidnapping, hostage taking, and other crimes perpetuated in the region that have resulted in a monumental loss of revenue for Nigeria. This economics text book is certainly not boring! The Niger Delta Region of Nigeria has recently come under intense and careful

scrutiny and discussion internationally. The region's rich natural resource endowments, including oil and gas, have played a large part of the discussions about the region and its sustainable environment. The text explores the general background of Nigeria's oil and gas resource infrastructure as well as the effects these are having on the Nigerian economy. The book discusses in detail the resources of the region, including renewable and non-renewable ones. The root causes of youth restiveness are also discussed. Judging from a practical view of events that led to restiveness in the region, the book's analyses submits that there were some benefits deriving from

restiveness: The closing of income inequality gap in the region and improvements in socio-economic statistics are of significant importance to note.

The first book to present the environmental teachings of this beloved pope—the newly canonized St. John Paul—and the hopeful words of Pope Francis, thoughtfully synthesized into a complete spiritual and practical vision for the future. "The ecological crisis is a moral crisis." So said Pope John Paul II, an unexpected and fierce advocate for ecological responsibility throughout his papacy.

Rather than seeing environmental concerns as "earthly" or "political," he showed that they are in fact at the heart of the covenant between human beings and their Creator. In dozens of addresses, sermons, and encyclicals, Pope John Paul II made specific recommendations on twelve interconnected ecological issues, including climate change, ocean destruction, water scarcity, poverty, the role of women, and war. He showed that each could become a source of spiritual, social, and economic transformation. Following St. Francis integrates Pope John Paul II's vision with that of St. Francis of Assisi, patron saint of ecology, and the

galvanizing words of Pope Francis. Accessible and illuminating, it speaks to hearts and minds, to nonreligious readers as well as devoted Catholics, incorporating Scripture, current science, and inspiring stories of solutions and restoration. Marybeth Lorbiecki unifies and champions the late, beloved pope's view that all life issues are related and that all forms of life deserve care. And if we work with God and each other to protect them, we can "renew the face of the earth" (Psalm 104:30). From the Hardcover edition. *Government Inertia and Conflict in the Niger Delta* Penguin Advances in Ecopolitics includes a range of publications which

each discuss a significant element in the environmental theory which now represent an important aspect of sustainable living. This series has now got a new title: *Advances in Sustainability and Environmental Justice. Editorial Objectives* This series provides a series of insights into real alternatives to the current economic malaise, with an examination of key themes such as transition towns, sustainable utopias, co-operative farming, sustainability and activism, ecofeminism, green protectionism, intentional communities, environmental justice, environmental movements, green philosophies, politics and green economics.

Topicality The series provides a series of environmental alternatives which require our fullest consideration in light of the ongoing economic downturn which has accompanied the latest incarnation of unsustainable practices. It provides a forum for debate about a positive set of sustainable alternatives which set out an understanding that 'another world is possible'. Key Benefits This book series is essential reading for all academics, researchers and practitioners who are involved in the areas of environmentalism, and it: Acts as a forum for debate and enables the publication of papers which establish understanding of environmentalism and

sustainability Provides a unique opportunity for the exchange of peer reviewed knowledge on the widest extent of environmental and ecological issues Allows for the establishment of working networks of environmental academics from across the globe Key Audiences This series particularly encourages academics, researchers and practitioners from Europe, North America, and from developing nations to share their experience, knowledge and practices with an international audience. Contributors from across the globe that focus on issues and research which will affect and inform ecopolitical studies are welcome to submit

work for consideration in the series. Coverage The series encourages well-written articles with the focus on interdisciplinary, international and comparative standpoints on contemporary management issues. Coverage includes, but is not restricted to: Ecological politics Sustainable development Environmental philosophy Green party politics Environmental economics Environmental movements Ecofeminism Sustainable living practices Routledge Understanding Organizational Leadership through Ubuntu offers a creative, innovative and holistic approach

to understanding organizational leadership using the principles embodied in the African philosophy of personhood known as ubuntu - or the essence of being human. Using African proverbs, folktales and indigenous concepts, the book discusses the organizational principles of ubuntu and the leadership lessons that modern organizations can learn from these principles. The principles include sharing and collective ownership of opportunities, responsibilities and challenges, the importance of people and relationships over things, participatory leadership and decision making, loyalty, reconciliation, experiential learning and knowledge

management By using humorous ways that touch people's heart to communicate organizational and personal management and improvement strategies, the book demystifies organizational language while at the same time enhancing its power. It also contributes to the much-needed cross-cultural dialogue among organizations and societies.

Road Map to

Performance African Books Collective

This edited volume explores and dissects Africa's economic growth and sustainable development using an optimal conceptual model of the progressive continent's development up to and until 2030. Africa is studied not against the

background of developed (OECD) and leading developing (e.g. BRICS) countries, but as a separate economy and as a self-sufficient region which follows its own priorities, and implements its own unique opportunities and vectors of growth and development. This volume addresses the contemporary and topical issues of inclusive growth, digital modernisation, and sustainable development, recommending policy outcomes for the future.

Nigeria Investment and Business Guide Volume 1 Strategic and Practical Information
Springer

The Boko Haram insurgency in Nigeria should be seen as both a phenomenon and as

an activity. As a phenomenon it should be seen as expressions of injustice and de-development in Nigeria and as an activity it should be seen as expressions of violence and destruction to satisfy orgiastic aspirations, especially in some northern parts of Nigeria. Again, as a phenomenon, the coverage of Boko Haram is the entire Nigeria while as an activity it has turned northern Nigeria into one boiling cauldron with fear being personalized while insecurity lurks in the streets. With Boko Haram, the sword of Damocles now hangs on every head, especially in the northern region. This deadly scenario provokes soul-searching questions:

Why is Nigeria constantly enmeshed in deadly conflicts? What conditions fertilize social violence in our societies? What were the warning signals or accumulation of combustible materials that were ignored? What conditions could engender peace and security in a plural society like ours? Are the violence entrepreneurs engaging Nigeria in conversation or are they determined to crack its history? Is Nigeria sitting on a keg of gunpowder? Are Nigerian youths dissatisfied with the political economy of Nigeria? Is the aggression of the Boko Haram a product of frustration, religious messianism or terrorism? How can the

swords of Damocles in Nigeria be turned into ploughshares? And how can the phenomenon of Boko Haram in Nigeria and its activities in some parts of Northern Nigeria be stopped? These are some of the questions which the book tries to provide answers for.

Global Ecological Politics IITA

Expressions such as “Environmental terrorism” or “eco-anarchy” may sum up the state of the Niger Delta region of Nigeria, in a bid to explain the indiscriminate cutting of pristine forests, terminal scare of wildlife and extinction of biodiversity, loss of soil fertility and fecundity of rivers, acidified atmosphere, corroded roofs, disease, conflicts,

militarization, extra-judicial killing, inflation and collapse of traditional economy, poverty, prostitution, rape, death.... But embedded in the clatter of this semantic analysis are the realities of an abused environment, where uncertainty looms in daylight and grief rules the night; for well over five decades that the region has come under intense ravaging by the oil industry, the effect is evident in the physical, biological and socio-economic environments. Against the background of rich but fragile ecosystems where nature experiments with its components at will; and the picture of a consciously raped ecology, this book examines the lingering environmental crises in

Nigeria's oil-rich region. With appropriate use of case studies based on practical field experience, and explicit discourse on remedial measures, the book is fashioned to meet the interest of all classes of persons including students of environmental management, policy makers and stakeholders in the Niger Delta environment.

The News Author
House

Fidelis Allen situates violent conflict in the Niger Delta in the context of failure by government to effectively implement relevant oil-related environmental policies intended to achieve sustainable development, arguing that oil and

environment-related conflicts in the region are reflections of this failure. This failure is premised on the notion that the goal of sustainable development, as clearly outlined in Nigeria's National Environmental Policy and implied in various other policies, can be pursued through the activities of government, individuals and business organisations that are capable of engendering economic and social progress for communities that depend on the environment for their survival. In fact, available evidence shows that government and oil company activities (or failures to act) actually contribute to the despoliation of the environment in the

Niger Delta. Despite existing environmental legislations and guidelines, unsafe waste disposal, flaring of gas and oil spillage remain key features of oil industry operations in the Niger Delta. Not surprisingly, the book highlights a lack of synergy between government and oil company activities, and the attainment of sustainable development as a key goal of the environmental policy of the government. In other words, the activities of the government and oil companies do not sufficiently promote sustainable development. The net consequence is reflected in the frustrations of local justice and environmental

movement groups about the political processes which deter (rather than enable) their agitation for improvements in local living conditions and development in the Niger Delta. Over time, those frustrations begin to manifest at different levels, including aggressive and violent behaviours against oil companies and government security agencies for their contributory roles. *The Izon of the Niger Delta* Gale, Cengage Learning
As the earth's carrying capacity continues to be stressed, the question of renewable energies is no longer whether, but when and by whom. Climate change and peak oil have hit the mainstream. Kolya Abramsky's collection

maps the world's energy sector and shows how addressing these challenges necessitates an analysis of our economic priorities. Solutions must include massive shifts in our use of technologies and, most importantly, a democratization of the economic landscape based on broad new coalitions. With four distinct sections—Oil Makes the World Go 'Round; From Petrol to Renewable Energies; Struggle Over Choice of Energy Sources and Technologies; and Possible Futures—and over fifty essays from approximately twenty countries, there's nothing like Sparking a Worldwide Energy Revolution to address our global energy crisis. The different

chapters bring together a wealth of organizational and analytical experience from across the different branches of the energy sector, both conventional and renewable. Contributors include the following organizations and individuals: China Labour Bulletin (Hong Kong/China), Energy Watch Group (Germany), Focus on the Global South (Thailand), Integrated Sustainable Energy and Ecological Development (India), Public Services International Research Unit (United Kingdom), World Information Service on Energy (Netherlands), Preben Maegaard, and Hermann Scheer. Kolya Abramsky is a former secretariat of the

World Wind Energy Institute, based in Denmark, a pioneering country in renewable energy. He is currently a research fellow at the Institute for Advanced Studies on Science, Technology and Society in Austria, and is pursuing a PhD in sociology at State University of New York, Binghamton.

Effective Leadership and Good Governance by the P.D.P. Emerald Group Publishing
Corporate Disasters: What Went Wrong and Why profiles the biggest corporate mistakes or misdeeds throughout history -- covering the people, the times, the decisions made. This volume covers Health, Safety and Environment in Peril. Each essay puts the business and its

operators in the context of its own time, explaining the market, social, and technology forces at play, and each explores the key make-or-break decisions that led to disaster.

The series Studies on Modern Orient provides an overview of religious, political and social phenomena in modern and contemporary Muslim societies. The volumes do not only take into account Near and Middle Eastern countries, but also explore Islam and Muslim culture in other regions of the world, for example, in Europe and the US. The series Studies on Modern Orient was founded in 2010 by Klaus Schwarz Verlag.
