A Source Book for Mediæval History Liturgical Press

It is a widely held belief that a climax vegetation of closed forest systems covered the lowlands of Central and Western Europe before man intervened in prehistoric times to develop agriculture. If this intervention had not taken place, the forest would still be there, and if left the grassland vegetation and fields now present would revert to a natural closed forest state, although with a reduced number of wild species. This book, which an updated and expanded version of the author's 1997 thesis (presented to the Wageningen University, Netherlands), challenges the traditional view, using examples from history, pollen analyses and studies

on the ecology of tree and shrub species such as oak and hazel. It tests the hypothesis that the climax vegetation is a closed canopy forest, against the alternative hypothesis that species composition and vegetational succession were governed by large herbivores, and that the Central and Western European lowlands were covered by a park-like landscape consisting of grasslands, scrub, solitary trees and groves bordered by a mantle and fringe vegetation. Comparative information from the eastern USA is also included throughout the book (this was not present in the thesis), because the forests there are commonly regarded as being analogous to the primeval vegetation in Europe. The book is arranged in 7 chapters: (1) General introduction and formulation of the problem; (2) Succession, the climax forest and the role of large herbivores; (3) Palynology, the forest as climax in prehistoric times and the effects of humans; (4) The use of the

wilderness from the Middle Ages up to 1900; (5) Spontaneous succession in forest reserves in the lowlands of Western and Central Europe - including examples from France, Germany, Austria, Slovenia, Sweden, Poland; (6) Establishment of trees and shrubs in relation to light and grazing; and (7) Final synthesis and conclusions. Twelve appendices are included giving further information, and there are 67 pages of references and a subject index.

Scholastic disputation, the formalized procedure of debate in the medieval university, is one of the hallmarks of intellectual life in premodern Europe. Modeled on Socratic and Aristotelian methods of argumentation, this rhetorical style was refined in the monasteries of the early Middle Ages and rose to prominence during the twelfth-century Renaissance. Strict rules governed disputation, and it became the preferred method of teaching within the university curriculum and beyond. In *The Medieval Culture of Disputation*, Alex J. Novikoff has written the first sustained and comprehensive study of the practice of scholastic disputation and of its formative influence in multiple spheres of cultural life. Using hundreds of published and unpublished sources as his guide, Novikoff traces the evolution of disputation from its ancient origins to its broader impact on the scholastic

culture and public sphere of the High Middle Ages. Many examples of medieval disputation are rooted in religious discourse and monastic pedagogy: Augustine's inner spiritual dialogues and Anselm of Bec's use of rational investigation in speculative theology laid the foundations for the medieval contemplative world. The polemical value of disputation was especially exploited in the context of competing Jewish and Christian interpretations of the Bible. Disputation became the hallmark of Christian intellectual attacks against Jews and Judaism, first as a literary genre and then in public debates such as the Talmud Trial of 1240 and the Barcelona Disputation of 1263. As disputation filtered into the public sphere, it also became a key element in iconography, liturgical drama, epistolary writing, debate poetry, musical counterpoint, and polemic. *The Medieval Culture of Disputation* places the practice and performance of disputation at the nexus of this broader literary and cultural context.

 "Don't thank me for your survival, thank your valiant Stern and Pemper, who stared death in the face constantly."—Oskar Schindler in a speech to his released Jewish workers in May 1945. Steven Spielberg's Oscar-winning film *Schindler's List* popularized the true story of a German businessman who manipulated his Nazi connections and spent his personal fortune to save some 1,200 Jewish prisoners from certain death during the Holocaust. But few know that those lists were made possible by a secret strategy designed by a young Polish Jew at the Płaszow concentration camp. Mietek Pemper's compelling and moving memoir tells the true story of how Schindler's list really came to

pass. Pemper was born in 1920 into a lively and cultivated Jewish family for whom everything changed in 1939 when the Germans invaded Poland. Evicted from their home, they were forced into the Krakow ghetto and, later, into the nearby camp of Płaszow where Pemper's knowledge of the German language was put to use by the sadistic camp commandant Amon Goth. Forced to work as Goth's personal stenographer from March 1943 to September 1944—an exceptional job for a Jewish prisoner—Pemper soon realized that he could use his position as the commandant's private secretary to familiarize himself with the inner workings of the Nazi bureaucracy and exploit the system to his fellow detainees' advantage. Once he gained access to classified documents, Pemper was able to pass on secret information for Schindler to compile his famous lists. After the war, Pemper was the key witness of the prosecution in the 1946 trial against Goth and several other SS officers. *The Road to Rescue* stands as a historically authentic testimony of one man's unparalleled courage, wit, defiance, and bittersweet victory over the Nazi regime.

The cult of the Virgin is central to the thinking of the Middle Ages. Her standing as intercessor and mediator stems from her role as Dei Genetrix - Mother of God. Since the subject cannot be understood from textual evidence alone the book is fully illustrated.

Monasticism, in all of its variations, was a feature of almost every landscape in the medieval West. So ubiquitous were religious women and men throughout the Middle Ages that all medievalists encounter monasticism in their intellectual worlds. While there is enormous interest in medieval monasticism among Anglophone scholars, language is often a barrier to accessing some of the most important and groundbreaking research emerging from Europe. The Cambridge History of Medieval Monasticism in the Latin West offers a comprehensive treatment of medieval monasticism, from Late Antiquity to the end of the Middle Ages. The essays, specially commissioned for this volume and written by an international team of scholars, with contributors from Australia, Belgium, Canada, England, France, Germany, Italy, the Netherlands, Spain, Switzerland, and the United States, cover a range of topics and themes and represent the most up-to-date discoveries on this topic.

The WWDR 2014 on Water and Energy is now an annual and thematic report with a focus on different strategic water issues each year. It is shorter in the order of 100 pages with a standardized structure and data and case studies annexes related to the theme. The WWDR 2014 will be launched during the main World Water Day celebrations in Tokyo, Japan on 21 March 2014. Water and energy are closely interconnected and highly interdependent. Trade-offs need to be managed to limit negative impacts and foster opportunities for synergy. Water and energy have crucial impacts on poverty alleviation both directly, as a number of the Millennium Development Goals depend on

major improvements in access to water, sanitation, power and energy sources, and indirectly, as water and energy can be binding constraints on economic growth the ultimate hope for widespread poverty reduction. Late Medieval and Renaissance art was surprisingly pushy; its architecture demanded that people move through it in prescribed patterns, its sculptures played elaborate games alternating between concealment and revelation, while its paintings charged viewers with imaginatively moving through them. Viewers wanted to interact with artwork in emotional and/or performative ways. This inventive and personal interface between viewers and artists sometimes conflicted with the Church's prescribed devotional models, and in some cases it complemented them. Artists and patrons responded to the desire for both spontaneous and sanctioned interactions by creating original ways to amplify devotional experiences. The authors included here study the provocation and the reactions associated with medieval and Renaissance art and architecture. These essays trace the impetus towards interactivity from the points of view of their creators and those who used them. The bearded and mature figure of Christ stands majestically raising his right hand, open palm facing the viewer. In his left he holds an unfurled scroll. Saints Peter and Paul appear on either side, Peter approaching to catch or protect the dangling bookroll. This image, the so-called *traditio legis*, first appeared in late fourth-century Rome in a variety of media, from the monumental to the miniature, including mosaic, catacomb painting, gold-glass and, the most numerous group, marble relief carving on

sarcophagi. This monograph engages in a close reading of the *traditio legis*, highlighting its novelty and complexity to early Christian viewers. The image is analyzed as a conflation of two distinct forms of representation, each constructed of unusual and potentially multivalent elements. Iconographical details like the hirsute Christ, his gesture, Peter's covered hands and the unorthodox positioning of the two saints are examined in isolation and as elements of the whole. The synthetic composition invited alternative and over-determined meanings.

The Exposition of the Apocalypse by Tyconius of Carthage (fl. 380) was pivotal in the history of interpretation of the Book of Revelation. While expositors of the second and third centuries viewed the Apocalypse of John, or Book of Revelation, as mainly about the time of Antichrist and the end of the world, in the late fourth century Tyconius interpreted John's visions as figurative of the struggles facing the Church throughout the entire period

between the Incarnation and the Second Coming of Christ. Tyconius's "ecclesiastical" reading of the Apocalypse was highly regarded by early medieval commentators like Caesarius of Arles, Primasius of Hadrumetum, Bede, and Beatus of Liebana, who often quoted from Tyconius's Exposition in their own Apocalypse commentaries. Unfortunately no complete manuscript of the Exposition by Tyconius has survived. A number of recent scholars, however, believed that a large portion of his Exposition could be reconstructed from citations of it in the aforementioned early medieval writers; and this task was undertaken by Monsignor Roger Gryson. Gryson's edition, a reconstruction of the *Expositio Apocalypseos* of Tyconius, was published in 2011 in *Corpus Christianorum Series Latina*. The present translation of that reconstructed text, with introduction and notes, exhibits Tyconius's unique non-apocalyptic approach to the Book of Revelation. It also shows that throughout the Exposition Tyconius made use of interpretive rules that he had laid out in an earlier work on hermeneutics, the *Book of Rules*, strongly suggesting that Tyconius wrote his Exposition as a companion to his *Book of Rules*. Thus, the Exposition served as an exemplar of how those rules would apply to interpretation of even the most intriguing of biblical texts, the Apocalypse.

At the height of its power, the Roman Empire encompassed the entire Mediterranean basin, extending much beyond it from Britain to Mesopotamia, from the Rhine to the Black Sea. Rome prospered for centuries while successfully resisting attack, fending off everything from overnight robbery raids to full-scale

invasion attempts by entire nations on the move. How were troops able to defend the Empire's vast territories from constant attacks? And how did they do so at such moderate cost that their treasury could pay for an immensity of highways, aqueducts, amphitheaters, city baths, and magnificent temples? In *The Grand Strategy of the Roman Empire*, seasoned defense analyst Edward N. Luttwak reveals how the Romans were able to combine military strength, diplomacy, and fortifications to effectively respond to changing threats. Rome's secret was not ceaseless fighting, but comprehensive strategies that unified force, diplomacy, and an immense infrastructure of roads, forts, walls, and barriers. Initially relying on client states to buffer attacks, Rome moved to a permanent frontier defense around 117 CE. Finally, as barbarians began to penetrate the empire, Rome fielded large armies in a strategy of "defense-in-depth," allowing invaders to pierce Rome's borders. This updated edition has been extensively revised to incorporate recent scholarship and archeological findings. A new preface explores Roman imperial statecraft. This illuminating book remains essential to both ancient historians and students of modern strategy.

This book presents the most recent scholarship on the sixteenth-century convert Johannes Pfefferkorn and his context. Pfefferkorn is the most (in)famous of the converts from Judaism who wrote descriptions of Jewish ceremonial life and shaped both Christian ideas about Judaism and the course of anti-Jewish polemics in the early modern period. Rather than just rehearsing the better-known aspects of Pfefferkorn's life and the controversy with Johannes Reuchlin, this volume re-evaluates the motives behind

his activities and writings as well as his role and success in the context of Dominican anti-Jewish polemics and Imperial German politics. Furthermore, it discusses other converts, who similarly "revealed the secrets of the Jews", and contains detailed studies of the campaigns against the Talmud and other Jewish books as

well as the diffusion of Pfefferkorn's books and other anti-Jewish writings throughout early modern Europe. *Revealing the Secrets of the Jews* thus presents new perspectives on Jewish-Christian relations, the study of religion and Christian Hebraism, and the history of anthropology and ethnography.
