**10 metre air pistol shooting basics** Air Pistol Shooting  
TechniqueIt is beyond any doubt that the technique of pulling the

trigger during sighting is the most sensitive and most important part in successful pistol shooting. Theoretically, the technique is very simple, but in reality there are difficulties. Therefore, correct explanation and correct training are of essential importance. Air pistol trigger mechanism is a mechanism with accelerator. It means that there are three stages. "First leg" until trigger stop,

trigger stop and “second leg”. The Fundamentals of Olympic Pistol Shooting - ISSF The basic principle of shooting with an air pistol is fairly simple, in that you need to hold the pistol in one hand, align the sights just below the aiming mark on the target and then when ready, hold the same aim and gently increase the pressure on the trigger to release the shot. With any reasonable amount of luck, you will hit the target. Tenrings Coaching for precision air pistol shooting ... Shooting Technique Proper pistol shooting technique lays the foundation for safety, accuracy, and speed when firing a gun. Sound technique is vital to a successful shooting experience. This subject can encompass a vast amount of style, theory, Proper Pistol Shooting Technique | Concealed Carry Society Blog - Basic Air Pistol Shooting Techniques.
