AN INSTANT NEW YORK TIMES BESTSELLER! "Poised and chilling." —Wall Street Journal "No-one does suburban paranoia like Shari Lapena—this slowly unfurling nightmare will have you biting your nails until the end." —Ruth Ware Another thrilling domestic suspense novel from the New York Times bestselling author of *The Couple Next Door* and *Not a Happy Family* Maybe you don't know your neighbors as well as you thought you did . . . "This is a very difficult letter to write. I hope you will not hate us too much. . . My son broke into your home recently while you were out." In a quiet, leafy suburb in upstate New York, a teenager has been sneaking into houses—and into the owners' computers as well—learning their secrets, and maybe sharing some of them, too. Who is he, and what might he have uncovered? After two anonymous letters are received, whispers start to circulate, and suspicion mounts. And when a woman down the street is found murdered, the tension reaches the breaking point. Who killed her? Who knows more than they're telling? And how far will all these very nice people go to protect their own secrets? In this neighborhood, it's not just the husbands and wives who play games. Here, everyone in the family has something to hide . . . You never really know what people are capable of.

**The Amazing Book of Star Wars** Simon and Schuster

"In their previous landmark volumes . . . Harris and Emberley established themselves as the purveyors of reader-friendly, straightforward information on human sexuality for readers as young as seven. Here they successfully tackle the big questions . . . for even younger kids." - The Horn Book (starred review) Young children are curious about almost everything, especially their bodies. And young children are not afraid to ask questions. What makes me a girl? What makes me a boy? Why are some parts of girls' and boys' bodies the same and why are some parts different? How was I made? Where do babies come from? Is it true that a stork brings babies to mommies and daddies? IT'S NOT THE STORK! helps answer these endless and perfectly normal questions that preschool, kindergarten, and early elementary school children ask about how they began. Through lively, comfortable language and sensitive, engaging artwork, Robie H. Harris and Michael Emberley address readers in a reassuring way, mindful of a child's healthy desire for straightforward information. Two irresistible cartoon characters, a curious bird and a squeamish bee, provide comic relief and give voice to the full range of emotions and reactions children may experience while learning about their amazing bodies. Vetted and approved by science, health, and child development experts, the information is up-to-date, age-appropriate, and scientifically accurate, and always aimed at helping kids feel proud, knowledgeable, and comfortable about their own bodies, about how they were born, and about the family they are part of.

**It's So Amazing!** Clb

From the trusted team of Robie H. Harris and Michael Emberley, a classic resource for younger children receives its most ambitiously updated edition yet. How does a baby begin and how is it born? How did I begin? Why are some parts of kids' bodies different from some parts of other kids' bodies?

Most younger kids have questions about reproduction, babies, love, sex, and gender, too. Some also have concerns. For over twenty years, It's So Amazing! has provided children age seven and up with the honest answers they're looking for through age-appropriate, reassuring words and accurate, up-to-date, inclusive art. Throughout the book, two cartoon characters, Bird and Bee, are the voices of kids. They talk together to help children feel that they are not the only ones wondering how we all began. Rigorously vetted by experts and featuring updated and new facts on pregnancy, birth, adoption, bodies, sexuality, gender identity, OK touches, not OK touches, straight and LGBTQ+ families and people, and many other topics, this comprehensive resource for kids, parents, librarians, teachers, booksellers, and healthcare providers is the book that can help younger kids and their families talk together and find answers to their many questions.

So Close to Amazing is a collection of hilarious and heartfelt reflections on getting it almost right - and how, instead of giving up, we can choose to simply embrace our real selves right where we are. It's a story of transparency and honesty and recognizing that perfection is completely overemphasized and overrated. It's about grace and learning from mistakes and rejoicing in every victory, no matter how small. Because when you find joy in the "you" God created you to be, you'll discover the amazing that was there all along.

**Someone We Know** DK Children

#1 NEW YORK TIMES BESTSELLER • PULITZER PRIZE FINALIST • This inspiring, exquisitely observed memoir finds hope and beauty in the face of insurmountable odds as an idealistic young neurosurgeon attempts to answer the question What makes a life worth living? NAMED ONE OF PASTE'S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • People • NPR • The Washington Post • Slate • Harper's Bazaar • Time Out New York • Publishers Weekly • BookPage Finalist for the PEN Center USA Literary Award in Creative Nonfiction and the Books for a Better Life Award in Inspirational Memoir At the age of thirty-six, on the verge of completing a decade's worth of training as a neurosurgeon, Paul Kalanithi was diagnosed with stage IV lung cancer. One day he was a doctor treating the dying, and the next he was a patient struggling to live. And just like that, the future he and his wife had imagined evaporated. When Breath Becomes Air chronicles Kalanithi's transformation from a naïve medical student "possessed," as he wrote, "by the question of what, given that all organisms die, makes a virtuous and meaningful life" into a neurosurgeon at Stanford working in the brain, the most critical place for human identity, and finally into a patient and new father confronting his own mortality. What makes life worth living in the face of death? What do you do when the future, no longer a ladder toward your goals in life, flattens out into a perpetual present? What does it mean to have a child, to nurture a new life as another fades away? These are some of the questions Kalanithi wrestles with in this profoundly moving, exquisitely observed memoir. Paul Kalanithi died in March 2015, while working on this book, yet his words live on as a guide and a gift to us all. "I began to realize that coming face to face with my own mortality, in a sense, had changed nothing and everything," he wrote. "Seven words from Samuel Beckett began to repeat in my head: 'I can't go on. I'll go on.'" When Breath Becomes Air is an unforgettable, life-affirming reflection on the challenge of facing death and on the relationship between doctor and patient, from a brilliant writer who became both.

Maddie Fynn is a shy high school junior cursed with an eerie intuitive ability that's out of her control—one that entangles her in a homicide investigation For as long as she can remember, Maddie has seen a series of unique digits hovering above the foreheads of each person she encounters. Her earliest memories are marked by these numbers, but it takes her father's premature death for Maddie and her family to realize that these mysterious digits are actually deathdates, and just like birthdays, everyone has one. Forced by her alcoholic mother to use her ability to make extra money, Maddie identifies the quickly approaching deathdate of one client's young son, but because her ability only allows her to see the when and not the how, she's unable to offer any more insight. When the boy goes missing on that exact date, law enforcement turns to Maddie. Soon, Maddie is entangled in a homicide investigation, and more young people disappear and are later found murdered. A suspect for the investigation, a target for the murderer, and attracting the attentions of a mysterious young admirer who may be connected to it all, Maddie's whole existence is about to be turned upside down. Can she right things before it's too late?
