From Knowing to Being

SAGE
Publications

This thoroughly expanded edition of Howard Rosenthal's Human Services Dictionary is an essential resource for counselors tackling licensing and certification exams such as the National Counselor Examination (NCE) and human service workers who wish to pass the Human Services Board Certified Practitioner's Examination (HS-BCPE). With over 650

new entries, including terminology related to new areas such as neuroscience, emerging psychotherapeutic strategies, and the new NCE domain areas, definitions are purposely worded to help test takers answer typical questions that commonly show up on exams. Key features include reader-friendly definitions with accompanying examples and extensive cross-referencing, as well as short biographies of important figures in the field, a short history of human services, summaries of popular research experiments, and specialized and slang terms specific to the human service profession. Finally, a useful and up-to-date

resource guide is included that delineates common statistical tests, psychoeducational instruments, and organizations. Written in a clear and accessible style, this resource is suitable for anyone in the helping professions, from beginning undergraduate students to seasoned professionals.

Effectively Managing and Leading Human Service Organizations
Elsevier

The eighth edition of best-selling AN INTRODUCTION TO HUMAN SERVICES offers a uniquely practical and comprehensive introduction to the human services profession. Drawing on the authors' extensive experience as

practitioners, educators, and researchers, the text defines human services, reviews the historical development of the field, provides a practical overview of the profession, and emphasizes the skills needed to succeed as a human services practitioner. The book provides a solid grounding in such fundamental concepts as serving the whole person, using an interdisciplinary approach, interacting with helper and client, preparing generalists, and empowering clients. Every chapter includes detailed case studies to highlight the practical applications of key concepts and prepare students to effectively address issues they are likely to encounter as helping

professionals.

The Building Cognitive Applications with IBM Watson Services series

is a seven-volume collection that introduces IBM® Watson™ cognitive computing services. The series includes an overview of specific IBM Watson® services with their associated architectures and simple code examples. Each volume describes how you can use and implement these services in your applications through practical use cases. The series includes the following volumes:

Volume 1 Getting Started, SG24-8387

Volume 2 Conversation, SG24-8394

Volume 3 Visual Recognition, SG24-8393

Volume 4 Natural Language Classifier, SG24-8391

Volume 5 Language Translator, SG24-8392

Volume 6 Speech to Text and Text to

Speech, SG24-8388

Volume 7 Natural Language Understanding, SG24-8398

Whether you are a beginner or an experienced developer, this collection provides the information you need to start your research on Watson services. If your goal is to become more familiar with Watson in relation to your current environment, or if you are evaluating cognitive computing, this collection can serve as a powerful learning tool. This IBM Redbooks® publication, Volume 1, introduces cognitive computing, its motivating factors, history, and basic concepts. This volume describes the industry landscape for cognitive computing and

introduces Watson, the cognitive computing offering from IBM. It also describes the nature of the question-answering (QA) challenge that is represented by the Jeopardy! quiz game and it provides a high-level overview of the QA system architecture (DeepQA), developed for Watson to play the game. This volume charts the evolution of the Watson Developer Cloud, from the initial DeepQA implementation. This book also introduces the concept of domain adaptation and the processes that must be followed to adapt the various Watson services to specific domains.
