## CABRERA CROSS

Examinations in Singapore Foundation Books

An account of the development of education in England from the closing years of the eighteenth century when an attempt was first made to provide an education for all children. The author looks in turn at the children being taught, the teachers who taught them, the methods they used, the curriculum, and the social and intellectual influences which affected them.

 This book explores how history teaching can support conflict reduction in deeply divided societies. Using Northern Ireland as its case study, the work contributes to how people think about the identity-based conflict that surrounds them and involves them. It also acts as a manual for those

who wish to undertake projects to change attitudes about history in post-conflict societies.

Before judging, you must know the facts and background of the accused and his alleged wrongdoing. This book takes the reader on a journey back in time, walking the path he lived. The journey transcends country and cultural boundaries and includes mixing with Saudi royalty in the 1950s, a new life in the US in the late 1960s and the UK from the 1970s. Senior career progression is impeded by invisible racial disharmony. Huge hills of fear and jealousy by others have to be

navigated to achieve success, wealth and an enviable lifestyle. A return to England marked the start of unexpected and unforeseen degradation and conflict, which finally came to an end in 2009; but, at what cost? Once you have walked this path with him, you may be in a position to "Judge me if you can."

Foundation Books

The first book to explore the development of Singapore's much-talked-about education and examination system, this volume juxtaposes examinations with its immediate context of education and wider context of politics, economy and society. The study covers three broad historical periods: Examinations in Singapore from 1891 to 1945; The Post-War Years from 1946 to the 1970s; and Charting Our Destiny from the 1980s to 2007. In the British period up to 1941, the local examinations were conducted by the vernacular schools, and external examinations by the University of Cambridge Local Examinations Syndicate. There was a lack of systematic effort to establish a uniform system of education and examinations. During the Japanese Occupation, examinations were conducted by the Japanese authorities and, unexpectedly, the Cambridge examinations continued in the Sime Road Camp. In the post-war period and particularly after Singapore was granted self-government, the establishment of a national education system was followed by the emergence of national examinations: the Primary School Leaving Examinations and the Singapore-Cambridge GCE N/O/A Levels for every school-going child in Singapore. Thereafter, the nature of national examinations evolved with the changing needs of education and the nation. At the turn of the century, with the Ministry of Education's decision to take greater control of examinations, the Singapore Examinations and Assessment Board was established, to oversee new developments in examinations. Unlike most literature on education where examinations are often mentioned as an outcome of educational goals and objectives, this book focuses on examinations per se. Examinations have gained a momentum of their own, and it is interesting to note the development of examinations against the backdrop of the broader history of Singapore and of education in Singapore. *Africa's Political Wastelands* explores and confirms the fact that because of irresponsible, corrupt, selfish, and unpatriotic kleptocrats parading as leaders, the ultimate breakdown of order has become the norm in African nations, especially those south of the Sahara. The result is the virtual annihilation of once thriving and proud nations along with the citizenry who are transformed into wretches, vagrants, and in the extreme, refugees. Doh uses Cameroon as an exemplary microcosm to make this point while still holding imperialist ambitions largely responsible for the status quo in Africa. Ultimately, in the hope of jumpstarting the process, he makes pertinent suggestions on turning the tide on the continent.
