The Unani Pharmacopoeia of India BRILL

Handbook of Analytical Quality by Design addresses the steps involved in analytical method development and validation in an effort to avoid quality crises in later stages. The QbD approach significantly enhances method performance and robustness which are crucial during inter-laboratory studies and also affect the analytical lifecycle of the developed method. Sections cover sample preparation problems and the usefulness of the QbD concept involving Quality Risk Management (QRM), Design of Experiments (DoE) and Multivariate (MVT) Statistical Approaches to solve by optimizing the developed method, along with validation for different techniques like HPLC, UPLC, UFLC, LC-MS and electrophoresis. This will be an ideal resource for graduate students and professionals working in the pharmaceutical industry, analytical chemistry, regulatory agencies, and those in related academic fields. Concise language for easy understanding of the novel and holistic concept Covers key aspects of analytical development and validation Provides a robust, flexible, operable range for an analytical method with greater excellence and regulatory compliance

Biomarkers as Targeted Herbal Drug Discovery Washington

Burns can cause life-threatening injury and the lengthy hospitalization and rehabilitations required in burn therapy lead to higher healthcare costs. The risk of infection has also been one of the important concerns of burn wound management. The purpose of the burn wound care management is speedy wound healing and epithelization to limit the infection. The topical application of therapeutic agents is quintessential for the longevity of patients having significant burns. In recent times, research on herbal medicine for burn wound management has been vastly increased because of their safer toxicological profiles in contrast to synthetic medicines. Despite the promising therapeutic potential of herbal medicines in this area, herbal medications have some limitations which include low pharmacological activity, solubility and stability. Nanotechnology-based smart drug delivery approaches which involve the use of small molecules as nanocarriers, however, can help to overcome these biopharmaceutical challenges. This book provides an overview of plant-mediated metallic nanoparticulate systems and nanophytomedicine based therapeutic treatment modalities for burn wound lesions. Nine chapters deliver updated information about nanomedicines for burn wound therapy. Contributions are written by experts in nanomedicine and phytomedicine and collectively cover the pathophysiology of wound lesions, current and future outlook of nanomedicine based treatments for burn wound lesions, the role of biocompatible nanomaterials in burn wound management, plant-mediated synthesis of metal nanoparticles for treating burn wound sepsis, phytomedicine based nanoformulations and the phyto-informatics models involved in the wound healing process which are used to select appropriate nanotherapeutic agents. This reference serves as an accessible source of information on the topic of nanomedicine for burn treatments for all healthcare professionals (medical doctors, nurses, students trainees) and researchers in allied fields (pharmacology, phytomedicine) who are interested in this area of medicine.

Nanotechnology Driven Herbal Medicine for Burns: From Concept to Application Springer
 This new volume, *Nanomedicine for the Treatment of Disease: From Concept to Application*, looks at the application of nanomedicines with a particular focus on their use in the treatment of diseases. The chapters in this volume, contributed by eminent scientists, researchers, and nanotechnologists from across the globe, highlight key advancements, challenges, and opportunities in the area of application of nanomedicines for disease treatment. They explore the design and development of therapeutic nanocarriers for targeting drugs for satiating the demands of disease treatment process. The volume explores the use nanomedicines for the diagnosis and treatment of a multitude various diseases and health conditions, including respiratory diseases, neurological disorders, genetic

diseases, pulmonary fungal infections, neuroAIDS, cardiovascular disorders, gastric and colonic diseases, skin disorders, cancer, brain tumors, leishmaniasis and other visceral diseases, hypertension, and ocular diseases.

Safety Concerns for Herbal Drugs Bentham Science Publishers

A useful book on the Graeco-Arab medical system of 'Unani' based on the balance of the humours in the body. Also has an informative chapter on home remedies.

Nanotechnology Based Approaches for Tuberculosis Treatment Academic Press

With the growing use of new technologies and artificial intelligence (AI) applications, intelligent systems can be used to manage large amounts of existing data in healthcare domains. Having more intelligent methods for accessing data allows medical professionals to more efficiently identify the best medical practices and more concrete solutions for diagnosing and treating a multitude of rare diseases. *Intelligent Systems for Healthcare Management and Delivery* provides relevant and advanced methodological, technological, and scientific approaches related to the application of sophisticated exploitation of AI, as well as providing insight into the technologies and intelligent applications that have received growing attention in recent years such as medical imaging, EMR systems, and drug development assistance. This publication fosters a scientific debate for new healthcare intelligent systems and sophisticated approaches for enhanced healthcare services and is ideally designed for medical professionals, hospital staff, rehabilitation specialists, medical educators, and researchers.

World List of Universities / Liste Mondiale des Universités Walter de Gruyter GmbH & Co KG

The International Conference on ICT for Digital, Smart, and Sustainable Development (ICIDSSD'20) aims to provide an annual platform for the researchers, academicians, and professionals from across the world. ICIDSSD'20, held at Jamia Hamdard, New Delhi, India, is the second international conference of this series of conferences to be held annually. The conference majorly focuses on the recent developments in the areas relating to Information and Communication Technologies and contributing to Sustainable Development. ICIDSSD'20 has attracted research papers pertaining to an array of exciting research areas. The selected papers cover a wide range of topics including but not limited to Sustainable Development, Green Computing, Smart City, Artificial Intelligence, Big Data, Machine Learning, Cloud Computing, IoT, ANN, Cyber Security, and Data Science. Papers have primarily been judged on originality, presentation, relevance, and quality of work. Papers that clearly demonstrate results have been preferred. We thank our esteemed authors for having shown confidence in us and entrusting us with the publication of their research papers. The success of the conference would not have been possible without the submission of their quality research works. We thank the members of the International Scientific Advisory Committee, Technical Program Committee and members of all the other committees for their advice, guidance, and efforts. Also, we are grateful to our technical partners and sponsors, viz. HNF, EAI, ISTE, AICTE, IIC, CSI, IETE, Department of Higher Education, MHRD and DST for sponsorship and assistance.

The *Western Herbal Tradition* is a comprehensive exploration of 27 plants that are central to the herbalist's repertoire. This fully illustrated colour guide offers analysis of these herbs through the examination of historical texts and discussion of current applications and research. Your practice of phytotherapy will be transformed as the herbal knowledge from these sources is illuminated and assessed. Each chapter offers clear information on identification, uses and recipes, as well as recommendations on safety, prescribing, dosage and full academic references. The *Western Herbal Tradition* reveals a deep understanding of the true essence of what each plant can offer, as well as a fascinating insight into the unique history of contemporary herbal practice. This book is a valuable resource for everyone interested in herbal medicine and its history.

Chemoinformatics and Bioinformatics in the Pharmaceutical Sciences CRC Press

Nanotechnology Based Approaches for Tuberculosis Treatment discusses multiple nanotechnology-

based approaches that may help overcome persisting limitations of conventional and traditional treatments. The book summarizes the types of nano drugs, their synthesis, formulation, characterization and applications, along with the most important administration routes. It also explores recent advances and achievements regarding therapeutic efficacy and provides possible future applications in this field. It will be a useful resource for investigators, pharmaceutical researchers, innovators and scientists working on technology advancements in the areas of targeted therapies, nano scale imaging systems, and diagnostic modalities in tuberculosis. Addresses the gap between nanomedicine late discovery and early development of tuberculosis therapeutics Explores tuberculosis nanomedicine standardization and characterization with newly developed treatment, diagnostic and treatment monitoring modalities Covers the field thoroughly, from the pathogenesis of tuberculosis and multi-drug resistant mycobacterium tuberculosis, to treatment approaches using nanotechnology and different nanocarriers

As an alternative form of medicine, Unani has found favour in India. These Unani practitioners can practice as qualified doctors in India, as the government approve their practice. Unani medicine is very close to Ayurveda. Both are based on theory of the presence of the elements (in Unani, they are considered to be fire, water, earth and air) in the human body. According to followers of Unani medicine, these elements are present in different fluids and their balance leads to health and their imbalance leads to illness. Government have exclusive department of Indian system of medicine inclusive of Unani under Health ministry and several states have department and institutions to ensure the proper regulation and development of Unani medicine in India. Herb gardens, nursery of medicinal plants, experimental and field scale cultivation are the major initiatives taken for the improvement of medicine. Skin disease, liver disorder, sexual disturbances, pulmonary, sinus and communicable diseases are the major effective treatment achieved areas for Unani. Tremendous progress has been registered in the development of modern medicine. Yet, medicinal plants continue to be an important source of drugs throughout the world. Unani medicine is one of them, plant as a source of drugs of much more important for the developing countries. This book majorly deals with the, habitat, description, procedure and time of collection, chemical constituents, method of processing, therapeutic uses of medicinal plants. This book also constitutes the list of institutes of Unani medicines, list of college of Unani medicines in India, world importers of natural medicine. This publication is one of its kinds which clearly indicate the usefulness of Unani medicine, shows how the plant secrets, preserve the natural secrets/ hormones/ juices which ultimately uses in Unani system of medicine. This book is most informative and useful for students, Research scholars and scientist. We hope this book will achieve the long standing demand of herbal chemists. TAGS Handbook on Unani Medicines with Formulae, Processes, Uses and Analysis Unani Medicine in India, Process of Arabic & Yunani Medicine, Unani tibb, Arabian medicine, Islamic medicine, Animal Origin Drugs Used in Unani Medicine, Formulae of Unani Medicine Products, Medicinal Plants of Yunani Medicines, Ayurveda Medicines, Siddha Medicine, Medicinal Plants from Siddha System of Medicine, Medicinal Plants Used in Ayurveda, Yunani and Siddha, Medicine and Medicinal Plants Ayurveda, Aatrilal (Ammi Majus), Formulae of Azaraq (Strychnos Nux-Vomica), Baqla (Vicia Faba), Process of Bazulbanj (Hyoscyamus), Formulae of Chobchini (Smilax China), Formulae of Dudhi, Dudhi Khurd (Euphorbia Thymifolia), Process of Fifi Siyah (Piper Nigrum), Gaozaban (Borago Officinalis), Habbun Neel (Ipomoea Nil), Formulae of Halela Siyah (Terminalia Chebula), Formulae of Heel Khurd (Elettaria Cardamomum), Formulae of Inderjeo Talkh (Holarrhena Antidysenterica), Process of Ispand (Peganum Harmala), Process of Karanj (Pongamia Pinnata), Process of Karnab (Brassica Oleracea), Formulae of Khella (Ammi Visnaga), Mako (Solanum Nigrum), Formulae of Mundi (Sphaeranthus Indicus), Narjeel Daryae (Lodoicea Maldivica), Process of Panwad (Cassia Tora), Formulae of Sambhalu (Vitex Negundo), Turbud (Operculina Turpethum), Cupri Sulphas, Process of Potassii Nitras, Process of Sodii Carbonas Impure, Formulae of Zincum, Zinci Oxidum, Formulae of Animal Flesh, Process of Mel, Urine, Snake Venom, Process of Ostrea Edulis, Process of M. New Look to Phytomedicine: Advancements in Herbal Products as Novel Drug Leads is a compilation of in-depth information on the phytopharmaceuticals used in modern medicine for the cure and management of difficult-to-treat and challenging diseases. Readers will find cutting-edge knowledge on the use of plant products with scientific validation, along with updates on advanced herbal medicine in pharmacokinetics and drug delivery. This authoritative book is a comprehensive collection of research based, scientific validations of bioactivities of plant products, such as anti-infective, anti-diabetic, anti-cancer, immune-modulatory and metabolic disorders presented by experts from across the globe. Step-by-step information is presented on chemistry, bioactivity and the functional aspects of biologically active compounds. In addition, the pharmacognosy of plant products with mechanistic descriptions of their actions, including pathogenicity is updated with information on the use of nanotechnology and molecular tools in relation to herbal drug research. Compiles up-to-date information on the chemotherapeutics used in the treatment of infective and metabolic disorders Presents advancements in the discovery of new drugs from plants using molecular and nanotechnology tools Examines detailed information on the use of herbs agents in cancer, HIV and other ailments, including diabetes, malaria and neurological disorders

Chemoinformatics and Bioinformatics in the Pharmaceutical Sciences brings together two very important fields in pharmaceutical sciences that have been mostly seen as diverging from each other: chemoinformatics and bioinformatics. As developing drugs is an expensive and lengthy process, technology can improve the cost, efficiency and speed at which new drugs can be

discovered and tested. This book presents some of the growing advancements of technology in the field of drug development and how the computational approaches explained here can reduce the financial and experimental burden of the drug discovery process. This book will be useful to pharmaceutical science researchers and students who need basic knowledge of computational techniques relevant to their projects. Bioscientists, bioinformaticians, computational scientists, and other stakeholders from industry and academia will also find this book helpful. Provides practical information on how to choose and use appropriate computational tools Presents the wide, intersecting fields of chemo-bio-informatics in an easily-accessible format Explores the fundamentals of the emerging field of chemoinformatics and bioinformatics

Biomedical Serials, 1950-1960 Chicago : [s.n.]

The utilization of herbal medicine to treat endocrine and metabolic disorders has garnered much attention within the past few decades. Specifically, the popularity of using dietary supplements for the management of chronic disorders has drastically increased, with a wide variety of these products available over the counter. They represent an attractive adjuvant to traditional therapy for their lower toxicity and their easy accessibility. The identification of such dietary compounds has prompted researchers to explore the vast array of their beneficial effects. However, despite their widespread use, there is still limited data on the safety and efficacy of the products currently on the market. Current research on the side effects and safe usage of herbal medicines is necessary for providing optimal care and counseling for patients. *Treating Endocrine and Metabolic Disorders With Herbal Medicines* is a comprehensive reference book focused on spreading awareness on the safety, potential harmful effects, and rational use of herbal medicines. The chapters within explore and provide insight on the effectiveness, versatility, and side effects of various herbal medicines across a range of different diseases and conditions. While highlighting herbal medicine in areas such as diabetes, cancer, infertility, and endocrine disorders, this publication is ideally intended for clinical practitioners, pharmaceutical scientists, doctors, practitioners, stakeholders, researchers, academicians, and students interested in enhancing their knowledge and awareness in the field of complementary medicine.

Nanomedicine for the Treatment of Disease Singing Dragon

Recent major shifts in global health care management policy have been instrumental in renewing interest in herbal medicine. However, literature on the development of products from herbs is often scattered and narrow in scope. *Herbal Bioactives and Food Fortification: Extraction and Formulation* provides information on all aspects of the extraction of biological actives from plants and the development of dietary supplements and fortified food using herbal extracts. The book begins with a brief survey of the use of herbs in different civilizations and traces the evolution of herbal medicine, including the emergence of nutraceuticals from the discipline of ethnopharmacology and the Alma Ata Declaration of 1978. It moves on to describe various aspects of the extraction process, including selection of plant species, quality control of raw materials, the comminution of herbs, and the selection of solvents. It also describes the optimization of extraction in relation to response surface methodology before describing uses of herbal extracts in food supplements and fortified foods. With special attention paid to stability analysis and the masking of tastes, the book gives an overview of the formulation of various types of tablets, capsules, and syrups using herbal extracts. It also describes the benefits of foods fortified with herbal extracts such as soups, yogurt, sauces, mayonnaise, pickles, chutneys, jams, jellies, marmalades, cheese, margarine, sausages, bread, and biscuits, as well as some beverages. *Herbal Bioactives and Food Fortification* covers the fundamental steps in herbal extraction and processing in a single volume. It explains how to choose, optimize, analyze, and use extracts for fortification, making it an excellent source for nutraceutical researchers and practitioners in science and industry.

National Formulary of Unani Medicine Inner Traditions / Bear & Co

Are herbal drugs totally devoid of adverse effects when used alone, as herbal formulations, or in concurrent use with modern medicines? *Safety Concerns for Herbal Drugs* examines that question and others like it to give you the information you need to judge for yourself the balance between the risks and benefits associated with the therapeutic use of medicinal plants. It stands out from other books by directing your attention to the aspects of safety and toxicity. The authors venture into the relatively unexplored (or deliberately hidden) side of the picture. They present a survey of approximately 1500 medicinal plants and herbal products, 59 global (from 27 countries) and 75 Indian examples of toxic and adverse effects and drug interactions. Additionally, they present the current status of regulatory laws and their enforcement in 73 countries to support their contention that such laws and enforcement are inadequate, and that herbal drugs are unscientifically being promoted as totally safe. To give you the full picture, the authors go on to examine such issues as danger from large-scale misuse and abuse, self-prescription, substitution, adulteration, concurrent use with modern medicines, hazardous but avoidable drug interactions, risk groups, and present status of drug regulations.

New Look to Phytomedicine CRC Press

Regulatory Affairs in the Pharmaceutical Industry is a comprehensive reference that compiles all the information available pertaining to regulatory procedures currently followed by the pharmaceutical industry. Designed to impart advanced knowledge and skills required to learn the various concepts of regulatory affairs, the content covers new drugs, generic drugs and their development, regulatory filings in different countries, different phases of clinical trials, and the submission of regulatory documents like IND (Investigational New Drug), NDA (New Drug Application) and ANDA (Abbreviated New Drug Application). Chapters cover documentation in the pharmaceutical industry, generic drug development, code of Federal Regulation (CFR), the ANDA regulatory approval process, the process and documentation for US registration of foreign drugs, the regulation of combination products and medical devices, the CTD and ECTD formats, and much more. Updated reference on drug approval processes in key global markets Provides comprehensive coverage of concepts and regulatory affairs Presents a concise compilation of the regulatory requirements of different countries Introduces the fundamentals of manufacturing controls and their regulatory importance

Unani IGI Global

This comprehensive guide to healing synthesizes the principles and practices of Hippocratic, Chinese, Ayurvedic, and Persian medicine, and includes the first English translation of one of the handbooks of Avicenna, whose writings have been classics in herbal and dietetic medicine for more than 1,000 years. Based on the philosophy that "food is the best medicine," Avicenna's canon provides simple and effective diagnostic techniques and therapies for maintaining health and strengthening the immune system. Includes a botanical guide for the 100 most-used healing herbs and recommended treatments for 400 conditions, including diet and nutrition, herbology, and aromatherapy.
