many
immigrant
children, this
text portrays

the immigrant experience of uprooting, culture shock, and adjustment to a new world, and then describes cultural, academic, and psychological interventions that facilitate learning as immigrant students make the transition to a new language and culture. Particularly relevant for courses dealing with multicultural and bilingual education, foundations of education, and literacy curriculum

and instruction, this text is essential reading for all teachers who will -- or currently do -- work in today's school environment. *The Immigrant Child* UNESCO Publishing
SPEAK OUT ABOUT IMMIGRATION: Learn about some incredible kids who had the courage to speak out about the rights of immigrants and what you can do to join them!
SOCIAL STUDIES READER FOR CHILDREN:

Immigrants around the world move to new places seeking peace and opportunity. How can we support them? We can speak out! This book provides an introduction to immigration and highlights youth advocates around the world.
INCLUDES: This 24-page book for grades 1 to 4 includes a glossary, after-reading questions, and an extension activity.
BENEFITS: As they learn about kids

who had the courage to speak out and make a positive difference, readers will be inspired to speak out, too! Each book includes a list of 10 ways for the reader to get involved in these important issues and help change the world.

WHY ROURKE: Since 1980, we've been committed to bringing out the best non-fiction books to help you bring out the best in your young learners. Our

carefully crafted topics encourage all students who are "learning to read" and "reading to learn"!

My Name is Not Refugee

Karger Medical and Scientific Publishers

Immigrant children and youth are the fastest-growing segment of the U.S. population, and so their prospects bear heavily on the well-being of the country.

Children of Immigrants represents some of the

very best and most extensive research efforts to date on the circumstances, health, and development of children in immigrant families and the delivery of health and social services to these children and their families.

This book presents new, detailed analyses of more than a dozen existing datasets that constitute a large share of the national system for monitoring the health and well-being of

the U.S. population. Prior to these new analyses, few of these datasets had been used to assess the circumstances of children in immigrant families. The analyses enormously expand the available knowledge about the physical and mental health status and risk behaviors, educational experiences and outcomes, and socioeconomic and demographic circumstances of first- and second-

generation immigrant children, compared with children with U.S.-born parents. *I'm New Here* Discovery Library Includes a reading group guide (p. [311-324]). *Immigrant Children in Transcultural Spaces* Bloomsbury Publishing Explores the impact of immigration in a global context All over the world families migrate, and with them so do their children. Probing the

question of what being an immigrant' means, this publication brings together theory and empirical findings to highlight the impact of immigration on child development in a global context. Discussed is the impact of these processes on children and adolescents in a variety of different countries and social contexts to determine both universal and culturally specific

aspects of the experience of immigration as it becomes a pervasive reality of the modern world. This publication is appropriate for anyone who is interested in the process of migration/immigration and how it affects human development. Both students and scholars as well as real-world practitioners and policy makers in education, psychology, sociology, anthropology, ethnic and cultural

studies, immigration studies, government and public policy will find this book a valuable source of information about the present and the way in which the next generation develops in response to the immigrant experience. *Mental Health Practice with Immigrant and Refugee Youth* National Academies Press Whether fleeing the ravages of war or coming in search of opportunities,

the story of immigration remains the principal narrative of our times. As our neighborhoods grow more diverse, a splendid variety of cultures, values and traditions become an important part of our classrooms and schools. In *Kids Like Me*, 26 personal narratives celebrate the experience of young people making a new home in a strange community-finding

common ground as they make new friends, learn English, share their cultural identities, their challenges, successes and dreams. Kids Like Me provides a youthful perspective on the important themes of crossing cultures, immigration and citizenship and learning to appreciate differences. These stories are intended to foster intercultural awareness and sensitivity

and encourage individual and community action to assist newcomers in their adjustment. While written to help youth understand their classmates and friends, Kids Like Me also includes discussion questions, self-directed activities and research ideas for teachers and other mentors that can be used in classrooms, youth clubs and community settings. Richly

illustrated with photos and maps of each home country, the text presents countless opportunities to explore and understand different cultures and new friends. Young people who have come from all over the world share their stories and invite their new neighbors to see that in so many ways these kids are just like me. Living in Two Worlds Russell Sage Foundation
In many school districts in

America, the majority of students in preschools are children of recent immigrants. For both immigrant families and educators, the changing composition of preschool classes presents new and sometimes divisive questions about educational instruction, cultural norms and academic priorities. Drawing from an innovative study of preschools across the nation,

Children Crossing Borders provides the first systematic comparison of the beliefs and perspectives of immigrant parents and the preschool teachers to whom they entrust their children. Children Crossing Borders presents valuable evidence from the U.S. portion of a landmark five-country study on the intersection of early education and immigration.

The volume shows that immigrant parents and early childhood educators often have differing notions of what should happen in preschool. Most immigrant parents want preschool teachers to teach English, prepare their children academically, and help them adjust to life in the United States. Many said it was unrealistic to expect a preschool to play a major role in helping

children retain their cultural and religious values. The authors examine the different ways that language and cultural differences prevent immigrant parents and school administrators from working together to achieve educational goals. For their part, many early education teachers who work with immigrant children find themselves caught between two core beliefs:

on one hand, the desire to be culturally sensitive and responsive to parents, and on the other hand adhering to their core professional codes of best practice. While immigrant parents generally prefer traditional methods of academic instruction, many teachers use play-based curricula that give children opportunities to be creative and construct their own knowledge. Worryingly,

most preschool teachers say they have received little to no training in working with immigrant children who are still learning English. For most young children of recent immigrants, preschools are the first and most profound context in which they confront the conflicts between their home culture and the United States. Policymakers and educators, however, are

still struggling with how best to serve these children and their parents. Children Crossing Borders provides valuable research on these questions, and on the ways schools can effectively and sensitively incorporate new immigrants into the social fabric. Issues and Challenges of Immigration in Early Childhood in the USA Harvard University Press A clear

explanation of what immigration is, and the reasons people immigrate. How do we convey to kids what immigration really means? How do we explain all the difficult decisions people make when they choose to leave their home country to start over somewhere new? This book will help! This book shows kids aged 5-9 breaking down the many complexities of

immigration, while reminding us all that no matter where we come from, we are all human and should be treated equally. A Kids Book About Immigration features: - A large and bold, yet minimalist font design that allows kids freedom to imagine themselves in the words on the pages. - A friendly, approachable, yet empowering, kid-appropriate tone throughout. -

An incredible and diverse group of authors in the series who are experts or have first-hand experience of the topic. Tackling important discourse together! The A Kids Book About series are best used when read together. Helping to kickstart important, challenging, and empowering conversations for kids and their grownups through beautiful and thought-

provoking pages. The series supports an incredible and diverse group of authors, who are either experts in their field, or have first-hand experience on the topic. A Kids Co. is a new kind of media company enabling kids to explore big topics in a new and engaging way. With a growing series of books, podcasts and blogs, made to empower. The child of Italian parents growing up at the turn of the century in New York City and the child of Mexican parents growing up today in Los Angeles likely share much in common. To suffer the loss of a familiar

place, to feel like an outsider in a new one, to be torn between the cultural values of those old and new places, to know discrimination, to grow up in poverty: this has long and often been the lot of immigrant children. Growing Up American is a testament to the struggles, the defeats, and the accomplishments of these children - be they Italian or Mexican, German or Irish, West

Indian or Asian - on their way to becoming adults.

Generations of Exclusion

Routledge

Grounded in both theory and practice, with implications for both, this book is about children's perspectives on the borders that society erects, and their actual, symbolic, ideational and metaphorical movement across those borders. Based on extensive ethnographic data on children of

immigrants (mostly from Mexico, Central America and the Philippines) as they interact with undergraduate students from diverse linguistic, cultural and racial/ethnic backgrounds in the context of an urban play-based after-school program, it probes how children navigate a multilingual space that involves playing with language and literacy in a variety of forms.

Immigrant Children in Transcultural Spaces speaks to critical social issues and debates about education, immigration, multilingualism and multiculturalism in an historical moment in which borders are being built up, torn down, debated and recreated, in both real and symbolic terms; raises questions about the values that drive educational practice and decision-making; and

suggests alternatives to the status quo. At its heart, it is a book about how love can serve as a driving force to connect people with each other across all kinds of borders, and to motivate children to engage powerfully with learning and life. *Areli Is a Dreamer* Penguin Children spend more time at school than anywhere else except home; thus, schools can have a

major effect on children's health by providing a healthy physical environment, serving meals and snacks built around sound nutritional guidelines, and teaching about health, as well as modeling and promoting healthy behaviors. School health services programs involve not only school nurses and focus not only on nursing practice, standards, and performance

issues; they also include services and classes to teach students the information and skills they need to become health-literate, to maintain and improve their health, to prevent disease, and to reduce risky behaviors impacting health. School nurses, teachers, administrators, health coordinators, guidance counselors and social workers all join with parents in

safeguarding and promoting the health and well-being of school-aged children as a basic foundation for academic success. The Encyclopedia of School Health offers quick access to health and wellness information most relevant to children in America's K-12 school setting. You'll find valuable guidance on developmental stages, acute and chronic illnesses, special education, nutrition, crisis

response, prevention, and more. Overlooked & Underserved Penguin Foreword by Joan W. Moore When boxes of original files from a 1965 survey of Mexican Americans were discovered behind a dusty bookshelf at UCLA, sociologists Edward Telles and Vilma Ortiz recognized a unique opportunity to examine how the Mexican American experience has evolved

over the past four decades. Telles and Ortiz located and re-interviewed most of the original respondents and many of their children. Then, they combined the findings of both studies to construct a thirty-five year analysis of Mexican American integration into American society. Generations of Exclusion is the result of this extraordinary project. Generations of Exclusion measures

Mexican American integration across a wide number of dimensions: education, English and Spanish language use, socioeconomic status, intermarriage, residential segregation, ethnic identity, and political participation. The study contains some encouraging findings, but many more that are troubling. Linguistically, Mexican Americans assimilate into mainstream America quite

well—by the second generation, nearly all Mexican Americans achieve English proficiency. In many domains, however, the Mexican American story doesn't fit with traditional models of assimilation. The majority of fourth generation Mexican Americans continue to live in Hispanic neighborhoods, marry other Hispanics, and think of themselves as

Mexican. And while Mexican Americans make financial strides from the first to the second generation, economic progress halts at the second generation, and poverty rates remain high for later generations. Similarly, educational attainment peaks among second generation children of immigrants, but declines for the third and fourth generations. Telles and Ortiz identify institutional barriers as a

major source of Mexican American disadvantage. Chronic underfunding in school systems predominately serving Mexican Americans severely restrains progress. Persistent discrimination, punitive immigration policies, and reliance on cheap Mexican labor in the southwestern states all make integration more difficult. The authors call for providing

Mexican American children with the educational opportunities that European immigrants in previous generations enjoyed. The Mexican American trajectory is distinct—but so is the extent to which this group has been excluded from the American mainstream. Most immigration literature today focuses either on the immediate impact of immigration or what is

happening to the children of newcomers to this country. Generations of Exclusion shows what has happened to Mexican Americans over four decades. In opening this window onto the past and linking it to recent outcomes, Telles and Ortiz provide a troubling glimpse of what other new immigrant groups may experience in the future. *Welcome to the New World* Dragonfly Books

An inspiring and deeply personal coming of age memoir from one of Silicon Valley's youngest entrepreneurs—a second-generation Latino immigrant who taught himself how to code as a thirteen-year-old and went on to claim his share of the American dream. As his parents watched their restaurant business collapse in the wake of the Great Recession, Michael Sayman was

googling “how to code.” Within a year, he had launched an iPhone app that was raking in thousands of dollars a month, enough to keep his family afloat—and in America. Entirely self-taught, Sayman headed from high school straight into the professional world, and by the time he was seventeen, he was Facebook’s youngest employe ever,

building new features that wowed its founder Mark Zuckerberg and are now being used by more than half a billion people every day. Sayman pushed Facebook to build its own version of Snapchat’s Stories and, as a result, engagement on the platform soared across all demographics. Millions of Gen Z and Millennials flocked to Facebook, and as teen engagement rose

dramatically on Instagram and WhatsApp, Snapchat’s parent company suffered a billion-dollar loss in value. Three years later, Sayman jumped ship for Google. App Kid is the galvanizing story of a young Latino, not yet old enough to drink, who excelled in the cutthroat world of Silicon Valley and went on to become an inspiration to thousands of kids everywhere by following

his own surprising, extraordinary path. In this candid and uplifting memoir, Sayman shares the highs and lows, the successes and failures, of his remarkable journey. His book is essential and affirming reading for anyone marching to the beat of their own drum.

Reflective Network Therapy In The Preschool Classroom
Potomac Books, Inc.

Based on new research, this book offers insights into the reality of immigration and its sociocultural impact with a focus on the experience of young children and their families coming to the USA. Wilma Robles-Melendez and Wayne Driscoll discuss immigration realities and their social and educational implications and review the current literature on studies and reports about

immigration. They also provide insights and experiences of young immigrant children and their families with a focus on the USA and offer recommendations for early childhood practice for programs serving young immigrant children. The key subjects addressed include socially just practices, developmentally based programs, services for young children and families with

diverse and cultural backgrounds. Immigration in the USA is discussed here as part of the global crisis in immigration and the lessons learned will be vital for educators, researchers and policy makers around the world.

Kids in the Middle Simon and Schuster Complicating the common view that immigrant incorporation is a top-down process, determined largely by

parents, Vikki Katz explores how children actively broker connections that enable their families to become woven into the fabric of American life. Children's immersion in the U.S. school system and contact with mainstream popular culture enables them more quickly to become fluent in English and familiar with the conventions of everyday life in the United States. These

skills become an important factor in how families interact with their local environments. *Kids in the Middle* explores children's contributions to the family strategies that improve communication between their parents and U.S. schools, healthcare facilities, and social services, from the perspectives of children, parents, and the English-speaking service providers that

interact with these families via children's assistance. Katz also considers how children's brokering affects their developmental trajectories. While their help is critical to addressing short-term family needs, children's responsibilities can constrain their access to educational resources and have consequences for their long-term goals. Kids in the Middle explores the complicated interweaving

of family responsibility and individual attainment in these immigrant families. Through a unique interdisciplinary approach that combines elements of sociology and communication approaches, Katz investigates not only how immigrant children connect their families with local institutional networks, but also how they engage different media forms to bridge gaps between their

homes and mainstream American culture. Drawing from extensive firsthand research, Katz takes us inside an urban community in Southern California and the experiences of a specific community of Latino immigrant families there. In addition to documenting the often-overlooked contributions that children of immigrants make to their families' community encounters,

the book provides a critical set of recommendations for how service providers and local institutions might better assist these children in fulfilling their family responsibilities. The story told in *Kids in the Middle* reveals an essential part of the immigrant experience that transcends both geographic and ethnic boundaries. *What Educators Need to Know*

about Immigration Law
Metropolitan Books
This book provides a framework to guide mental health providers who work with refugees and immigrants. Nearly 70 million people today are refugees or forcibly-displaced migrants. More than half of them are children suffering from the effects of dislocation and violence. The authors describe the unique needs and

challenges of serving these populations, and offer concrete steps for providing evidence-based, culturally-responsive care. Using the socioecological model, the authors conceptualize the developing child as living within concentric circles that include family, school, neighborhood, and society, embedded within a cultural context. Mental health providers

identify and provide targeted support to combat disruptions within any or all of these ecological layers. Chapters examine the complex ways in which culture impacts the refugee experience, barriers to engagement in mental health practice and strategies for overcoming them, assessment, collaborative and integrated mental health interventions, and efforts to

increase resilience in children, families, and communities. The book is an essential guide for mental health providers, and all who seek to help children in need. *Kids Speak Out About Immigration* University Press of America "The book is the direct response to the types of questions that educators have asked to author over the years with regards to definitions of certain legal

terms as well as what types of resources are available for refugees and immigrants in the community. It is scenario-based, in that it grounds the law and policy explained within its pages in the types of real-life events educators could encounter in the course of their teaching, and it provides practical information that educators can use to both advocate for the refugees and

immigrants with whom they work and direct them toward needed services"--

All the Way to America: The Story of a Big Italian Family and a Little Shovel

Lulu.com
 Reflective Network Therapy describes a remarkably effective school-based treatment method that harnesses small social networks for the good of seriously emotionally disturbed preschoolers or those with

autism spectrum disorders. The book provides an in-depth explanation of the method — including the work of parents, peers, teachers, and mental health therapists.

The RNT method has a substantial evidence base, with about the same number of treated children and a larger number of comparison and control cases as the published IQ results of the most widely used school based

method. It has been used in many real life environments and is well-tested for feasibility, replicability, IQ effects, and children's global mental health results. The RNT method does not separate the child from peers by pairing him with an aide but is peer, teacher and parent inclusive. The cost-benefits and human benefits are extraordinary. *The New Kids* Amer Psychological Assn
 "This

immigration story is universal.” —School Library Journal, Starred Dan Yaccarino’s great-grandfather arrived at Ellis Island with a small shovel and his parents’ good advice: “Work hard, but remember to enjoy life, and never forget your family.” With simple text and warm, colorful illustrations, Yaccarino recounts how the little

shovel was passed down through four generations of this Italian-American family—along with the good advice. It’s a story that will have kids asking their parents and grandparents: Where did we come from? How did our family make the journey all the way to America? “A shovel is just a shovel, but in Dan Yaccarino’s hands it becomes a way to dig

deep into the past and honor all those who helped make us who we are.” —Eric Rohmann, winner of the Caldecott Medal for My Friend Rabbit “All the Way to America is a charmer. Yaccarino’s heartwarming story rings clearly with truth, good cheer, and love.” —Tomie dePaola, winner of a Caldecott Honor Award for Strega Nona
