*A Guide for Using The Giver in the Classroom* Guilford Publications  
This book provides a chronological introduction to the sciences of astronomy and cosmology based on the reading and analysis of significant selections from classic texts, such as Ptolemy's *The Almagest*, Kepler's *Epitome of Copernican Astronomy*, Shapley's *Galaxies* and Lemaître's *The Primeval Atom*. Each chapter begins with a short introduction followed by a reading selection. Carefully crafted study questions draw out key points in the text and focus the reader's attention on the author's methods, analysis, and conclusions. Numerical and observational exercises at the end of each chapter test the reader's ability to understand and apply key concepts from the text. *The Heavens and the Earth* is the first of four volumes in *A Student's Guide Through the Great Physics Texts*. This book grew out of a four-semester undergraduate physics curriculum designed to encourage a critical and circumspect approach to natural science, while at the same time preparing students for advanced coursework in physics. This book is particularly suitable as a college-level textbook for students of the natural sciences, history or philosophy. It also serves as a textbook for advanced high-school students, or as a thematically-organized source-book for scholars and motivated lay-readers. In studying the classic scientific texts

included herein, the reader will be drawn toward a lifetime of contemplation.

The guide is user-friendly and practical to support the teaching process of the novel as literary work in the classroom. The guide has been broken down into sections of two to three chapters. These are merely a reading guide as you will set your own pace in class. Each section has a plot summary and some guidelines on words that may need explanation, figures of speech, themes and character development. Each chapter has questions picking up some of the important points in the chapter. These do not require a written response but can be used to facilitate discussion. Each section also has a speaking or writing activity. Choose the ones that most suit your class. Students should not be expected to complete all of these tasks. At the end of the guide, there are answers to the chapter questions. You will also find two contextual questions with answers and two longer questions.
