This is the theory that there is only so much information that humans can be aware of. Therefore, when making decisions, we base them on a limited choice. They are rational given the limited choice and awareness of alternatives, but they rarely maximise total utility because people don't want to take the time to fully consider all options. Bounded rationality is the idea that we make decisions that are rational, but within the limits of the information available to us and our mental capabilities. Economists who think of us as 'boundedly rational' don't see us as an 'economic superman', or homo economicus that spends his life optimizing the happiness created by every decision. What is 'bounded rationality'? — Economy This is a survey of bounded rationality, an area of theoretical macroeconomics which is receiving increased attention. The book is written by a leading macroeconomist who outlines the issues involved, describes some of the analytic tools that are being used, and shows how they can be applied in a range of models. Bounded Rationality in Macroeconomics: The Arne Ryde ... In Bounded Rationality in Macroeconomics, Thomas Sargent seeks to inform the reader about bounded rationality and, more importantly, to persuade

him that bounded rationality is a valuable approach to macroeconomic problems. The bounded rationality approach, Sargent argues, makes agents in macroeconomic models behave more like econometricians.
