This book will introduce you to a wealth of information on emergency preparation, and will provide your family or organization with important strategies, insights, tips, guidelines, and lists on how to prepare for a disaster. Survival planning is nothing more than realizing a disaster could happen that would put everyone in a survival situation and, with that in mind, taking steps to increase your chances of survival. Although helping others is certainly meaningful, worthwhile, and in some cases, necessary, the main emphasis of all household or organization team members should be to purchase, gather, and store resources

and supplies for your own team members. Everyone must be encouraged and expected to provide for themselves. We have been encouraged through religious, education, scientific, and government media to prepare for these future events.

"Technicians of the Sacred presents 'primitive' and ancient poetries as the incantations they are, loaded with power and very full of the magic that invests all good poetry. The treatment is fascinating...the commentaries are a gold mine of responses to the material

by a strong poet (the editor), and his selection of analogous writings from a broad range of contemporary poets."—David P. McAllester
