HALLIE SHANNON

Abu Dhabi's Vision 2030 Oxford Business Group

Explains that current global economic power is steadily shifting away from the United States to foreign countries and private investors in ways that the U.S. government cannot control and the average American knows nothing about. Reprint.

The Report: Abu Dhabi 2016 The Report: Abu Dhabi 2010

United Arab Emirates - Yearbooks.

Forbes Simon and Schuster

Today is a new metropolitan age and for the first time ever more people live in cities than they do anywhere else. As cities strengthen their international and cultural influence, the global world is acted out most articulately in the world's urban hubs - through its diverse cultures, broad networks and innovative styles of governance. Looking at the city through its internal dynamics, the book examines how governance and cultural policy play out in a national and international framework.

Making a truly global contribution to the literature, editors Isar and Anheier bring together a truly international and highly-respected collection of scholars. In doing so, they skilfully steer debates beyond the city as an economic powerhouse, to cover issues that fully comprehend a city's cultural dynamics and its impact on policy including alternative economies, creativity, migration, diversity, sustainability, education and urban planning. Innovative in its approach and content, this book is ideal for students, scholars and researchers interested in sociology, urban studies, cultural studies, and public policy.

Cultures and Globalization Springer Nature

Although the emirate's economic growth can be primarily attributed to its vast hydrocarbons resources, it has also made progress diversifying into new sectors such as manufacturing, tourism, aerospace, defence, finance and logistics. In addition to its economic investments, Abu Dhabi has also made major contributions to social welfare as well as infrastructure, which has been identified as the bedrock for future growth. The government has played a key role in the expansion of the security, aerospace and defence industry over the past decade in an effort to strengthen the UAE's defence capabilities and as a means of boosting economic diversification. Despite challenges such

as a high level of regional competition, most local defence and aviation firms expect to see continued expansion for years to come. The evidence suggests that the emirate has succeeded in nurturing new economic sectors and is on track to meet its goals. The oil and gas sector accounted for 56.5% of Abu Dhabi's GDP at current prices in 2012, followed by construction (9.6%), manufacturing (5.9%) and real estate (4.4%).

[The Asia Investor](#) Springer

Emerging Asia was the fairytale story to emerge from the economic horror that engulfed much of the world in 2008 and 2009. Even at the height of the crisis key emerging Asian economies made headlines for extraordinary macro growth numbers. But the question frequently asked is whether emerging Asian nations, especially China, will be able to sustain their pace of growth. In this timely book, Asian expert Aaron Chaze asks whether the booming Asian economies have what it takes to move away from an export-led, external-trade dominated economy and truly embrace a free-market philosophy. The Asia Investor provides a solid framework for analyzing investment opportunities across the region and picking potential winners. Asia is buoyed by several trends that drive these opportunities and it is the analysis of these trends that forms the core of this book.

The Political Economy of the Gulf Sovereign Wealth Funds Trident Press Ltd

This book analyses the emergence of the Indian Ocean as security complex and a strategic space of central importance and also looks at its prospective future. As well as US-China rivalry, the India-China rivalry is now the defining factor in the Indian Ocean--irrespective of the strategic asymmetry. This new situation has opened a space for middle-powers, old and new, to intervene. The authors argue that this situation may turn into an additional source of instability and that the creation of an inclusive and comprehensive regional security architecture, as well as the strengthening of regional multilateralism, should be the priority of all stakeholders in the coming decade. Frederic Grare is Senior Policy Fellow at the European Council on Foreign Affairs (ECFR) and a non-resident senior fellow at the Carnegie Endowment for International Peace. Jean-Loup Samaan is Senior Research Fellow at the Middle East Institute of the National University of Singapore and Associate Researcher with the French Institute of International Relations. .

The Income Approach to Property Valuation BRILL

This publication sets out to shine a spotlight on the sustainability agenda, examining topics including the blue economy, hydrocarbons, green energy, transformative technology, and more. It features interviews with dozens of public- and private-sector leaders and is a key handbook for anyone looking to invest in the UAE.

The Report: Abu Dhabi 2015 Routledge

Subdued oil prices prompted a trimmed federal budget for 2016 as the UAE, like other countries in the region, tightened its belt in response to falling hydrocarbons revenues. However, a sustained focus on economic diversification and targeted investment in Abu Dhabi's key non-oil sectors in recent years means the emirate is well positioned to weather the storm. Looking forward, plans for future development are mapped out in Abu Dhabi Economic Vision 2030, a comprehensive economic policy document that aims to reduce dependence on oil and gas, thereby creating a more sustainable knowledge-based economy for the emirate and its inhabitants. Aided by hydrocarbons reserves that are among the world's largest and substantial financial resources, Abu Dhabi has built up a strong foundation to become a regional leader and an increasingly important global player in a wide variety of sectors, including oil and gas, financial services, health care, aviation and renewable energy.

The Evolving Arab City Routledge

A classic textbook that has guided generations of students through the intricacies of property valuation, *The Income Approach to Property Valuation* remains a keen favourite amongst students and teachers alike. This new edition has been thoroughly revised and updated to meet the increasingly international perspectives of modern Real Estate students. The links between theory and practice are clearly demonstrated throughout, with a range of new international case studies and practice-based examples. *The Income Approach to Property Valuation* teaches readers: how to analyse market rents and sales prices to derive market evidence to support an opinion of market value; the investment method of valuation and how it is applied in practice; how specific legal factors can impact on market value when they interfere with market forces; what the market and the profession may consider to be the 'right' methodology in today's market place; and how to use spreadsheets in valuation. This extensively revised new edition is perfect both for students on Real Estate courses worldwide and for professional candidates working towards their final assessment of professional competence (APC) for the Royal Institution of Chartered Surveyors, needing to demonstrate a valuation competence at levels 2 and 3.

perspectives, innovative projects and creative ideas that are emerging from markets and brands across the globe.

MEED. John Wiley & Sons

An international approach to the study and teaching of real estate is increasingly important in today's global market. With chapters covering numerous countries and every continent, *International Approaches to Real Estate Development* introduces real estate development theory and practice to students and professionals in the comparative international context. The book provides readers with a global compendium written by an international team of experts and includes key features such as: Chapters covering: the United States; United Kingdom; Netherlands; Hungary; United Arab Emirates; Bahrain and Qatar; Ghana; Chile; India; China; Hong Kong; and Australia An introduction providing theory and concepts for comparative analysis Discussion and debate surrounding international real estate development in its approach, characteristics, geography, implementation and outcomes A concluding chapter which brings together comparative analyses of the different real estate development case study findings Reflections on the global financial crisis and the new real estate development landscape Further reading and glossary The wide range of case studies and the mix of textbook theory with research mean this book is an essential purchase for undergraduate and postgraduate students of real estate, property development, urban studies, planning and urban economics.

The Business Year: Abu Dhabi 2020 Brands Today

The downhill slide in the global price of crude oil, which started mid-2014, had major repercussions across the Middle East for net oil exporters, as well as importers closely connected to the oil-producing countries from the Gulf. Following the Arab uprisings of 2010 and 2011, the oil price decline represented a second major shock for the region in the early twenty-first century – one that has continued to impose constraints, but also provided opportunities. Offering the first comprehensive analysis of the Middle Eastern political economy in response to the 2014 oil price decline, this book connects oil market dynamics with an understanding of socio-political changes. Inspired by rentierism, the contributors present original studies on Bahrain, Egypt, Jordan, Kuwait, Lebanon, Oman, Qatar, Saudi Arabia, and the United Arab Emirates. The studies reveal a large diversity of country-specific policy adjustment strategies: from the migrant workers in the Arab Gulf, who lost out in the post-2014 period but were incapable of repelling burdensome adjustment policies, to Egypt, Jordan, and Lebanon, who have never been able to fulfil the expectation that they could benefit from the 2014 oil price decline. With timely contributions on the COVID-19-induced oil price crash in 2020, this collection signifies that rentierism still prevails with regard to both empirical dynamics in the Middle East and academic discussions on its political economy.

The Report: Abu Dhabi 2009 The Business Year

Hydrocarbons revenues still form the bulk of Abu Dhabi's GDP and while falling prices are a concern, the emirate has been moving steadily towards its economic diversification targets in line with Abu Dhabi Economic Vision 2030. The past 10 years has seen the non-oil sector expand strongly on the back of business-friendly government policies, as a result of which non-oil sector growth now outpaces that of the oil sector. Outside of hydrocarbons, construction and manufacturing represent the biggest GDP contributors in the emirate, with the construction sector poised to enter a period of renewed expansion and manufacturing identified as a key area for future growth, leveraging the emirate's natural resources, growing downstream capabilities and strategic location. Elsewhere Abu Dhabi's financial sector continues to assert itself and the expected 2015 launch of Abu Dhabi Global Market, the UAE's second financial free zone, is expected to boost activity in the sector. Meanwhile visitor numbers to Abu Dhabi continue to rise, with around 3.5m arrivals in 2014, up 25% on the previous year. This growth is expected to

continue as major infrastructure upgrades continue apace. These include the expansion of Abu Dhabi International Airport and the development of the 1200-km wide Etihad rail project.

Retail Market Study 2015 Oxford Business Group

Imagine a situation where a gang is organising a bank heist, each person in the gang is in charge of a different aspect of the heist. From the planning to the implementation all has been contributed by every member. On the day of the heist, all goes wrong! Two of the gang members shoot a security guard, one of the gang member takes a woman hostage, another member steals more money than was agreed by the members and the last member commits an act of physical abuse. . Saudi Real Estate Companion World Scientific

Using four Gulf sovereign wealth funds as case studies – Iran, Kuwait, Saudi Arabia and the UAE - this book examines and analyses the history, governance and structure, and investment strategies of the above mentioned funds, in the context of on-going debates about their transparency. The book discusses how most Gulf sovereign wealth funds were established under colonial rule, and have operated in the global financial system for many decades. With the increase of oil revenues, it goes on to look at how the funds have broadened their asset classes and their institutional development. Debate over the transparency of sovereign wealth funds has highlighted various global practices. Recently, organisational measures have been introduced for calculating possible risks from non-commercial investment incentives of funds, whose politically-driven investment strategies are viewed as potentially a major threat to the national security of their host countries. Highlighting a number of incidents that triggered the transparency debate, the book scrutinises the reaction of some of the Gulf sovereign wealth funds to these recent regulatory codes and strategies. It is a useful contribution to Development, Political Economy and Middle East Studies.

United Arab Emirates Oxford Business Group

The Retail Market Study 2015 of The Location Group is the one and only study of its kind worldwide. The focus of the Retail Bible are the 150 of the most notable international cities of the fashion and retail world and more than 3'000 store openings on 1,670 pages. Over 1,300 retailers, 800 shopping streets and 500 shopping centers were analyzed. The study reached more than 250,000 readers worldwide so far.

The Report: Abu Dhabi 2007 International Monetary Fund

The book discusses the Sukūk market, its developments, and the legal, Shari'ah, risks, and rating issues facing Sukūk. Securitisation as the best way forward for Sukūk structuring is emphasized and issues such as Sukūk listing, Sukūk index and Sukūk fund are highlighted.

The Report: Abu Dhabi 2010 Oxford Business Group

This new collection reveals the contrasts and similarities between older, traditional Arab cities and the newer oil-stimulated cities of the Gulf in their search for development and a place in the world order.

The Indian Ocean as a New Political and Security Region Oxford Business Group

This book explores the process of policymaking and implementation in the finance, energy and security sectors in the United Arab Emirates. It looks at the role of informal advisory networks in a nascent private sector, federal politics, and historical ties in foreign relations.

Oil and the political economy in the Middle East Routledge

This comprehensive book uses a rich array of case studies from cities in Asia, Latin America, Africa, Southern Europe, and beyond to highlight the intensifying global struggle over urban space and underline gentrification as a growing and important battleground in the contemporary world.
