YETI II starts with one horrific event that collides with a mind-numbing scenario, creating a paramount story of ultimate terror. Deep within the Alaskan wilderness, Lara Marshall awaits her husband and boy's return from hunting. When one of their horses shows up at the cabin, Lara panics. She rides out and

finds Roy and her son Phillip severely mauled by a bear. Her other boy, Eric - is missing. Unexpectedly, Travis Reed - ex Army Ranger who has come to Alaska to live in the wilderness, ventures upon her cabin. What he finds is a gruesome sight. Lara is out of her mind. After settling her down, she tells him everything; especially the condition of the bear. The animal had been torn to pieces. While Travis and Lara are out searching for Eric, Whitetail gets word of the terrifying event. Her gut instinct knows what happened. She must find Eric - quick.

After crossing the western mountain range where the bear attack occurred, Whitetail and Jim come upon a young woman named Judy, running from evil men. The men captured her boyfriend Mike. They were after the gold the two discovered while working at a mining camp. Judy warns Whitetail that the mining camp is full of vultures - anyone who goes there seems to disappear. Prepare yourself for a terrifying journey as the search for Eric turns into a poisonous web of evil when Whitetail finds herself riding into Ken Barkley's mining camp all alone.

"I come from Des Moines. Somebody had to." And, as soon as Bill Bryson was old enough, he left. Des Moines couldn't hold him, but it did lure him back. After ten years in England he returned to the land of his youth, and drove almost 14,000 miles in search of a mythical small town called Amalgam, the kind of smiling village where the movies from his youth were set. Instead he drove through a series of horrific burgs, which he renamed Smellville, Fartville, Coleslaw, Coma, and Doldrum. At best his search led him to Anywhere, USA, a lookalike strip of gas stations, motels and hamburger outlets populated by

obese and slow-witted hicks with a partiality for synthetic fibres. He discovered a continent that was doubly lost: lost to itself because he found it blighted by greed, pollution, mobile homes and television; lost to him because he had become a foreigner in his own country.

Concepts and Methods in Modern

Theoretical Chemistry: Electronic

Structure and Reactivity, the first book in

a two-volume set, focuses on the

structure and reactivity of systems and

phenomena. A new addition to the series

Atoms, Molecules, and Clusters, this

book offers chapters written by experts

in their fields. It enables readers to learn

how concepts from ab initio quantum

chemistry and density functional theory (DFT) can be used to describe, understand, and predict electronic structure and chemical reactivity. This book covers a wide range of subjects, including discussions on the following topics: DFT, particularly the functional and conceptual aspects Excited states, molecular electrostatic potentials, and intermolecular interactions General theoretical aspects and application to molecules Clusters and solids, electronic stress, and electron affinity difference The information theory and the virial theorem New periodic tables The role of the ionization potential Although most of the chapters are written at a level that is accessible to a senior graduate student, experienced researchers will also find interesting new insights in these experts'

perspectives. This comprehensive book provides an invaluable resource toward understanding the whole gamut of atoms, molecules, and clusters.

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

"In recent years religious leaders of mainline Christian and Jewish groups

have been calling on their adherents to play a larger role in the creation of a just social order. One of the most publicized of these was the declaration of the American Catholic bishops, Economic Justice For All. It remains to be seen whether believers raised in an era of affluence are deeply committed to the plight of the needy, and whether religion itself can mark out a path between social activism and conventional party politics." "John Courtney Murray (1904-1967) was a pioneer in the ongoing dialogue about the role of believers in public life. For all of his contributions, however, Murray spoke in a patrician manner to a social order that was stable and structured. How useful are his ideas in an age of multiculturalism, when the strongest pressure for justice comes from

grassroots organizations of the poor and marginalized?" "The Believer as Citizen proposes a fresh view of Murray's public philosophy in a way that makes it applicable to today's conditions."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

We live in a world that is increasingly vulnerable to climatic shocks - affecting agriculture and industry, government and international trade, not to mention human health and happiness. Serious anxieties have been aroused by respected scientists warning of dire perils that could result from upsets of the climatic regime. In this internationally acclaimed book, Emeritus Professor Hubert Lamb examines what we know about climate, how the past record of climate can be reconstructed, the causes of climatic variation, and its

impact on human affairs now and in the historical and prehistoric past. This 2nd Edition includes a new preface and postscript reviewing the wealth of literature to emerge in recent years, and discusses implications for a deeper understanding of the problems of future climatic fluctuations and forecasting.

The UNECE Recommendations on Harmonized Europe-Wide Technical Requirements for Inland Navigation Vessels (Resolution No. 61) establish a Pan-European regime of technical requirements for inland navigation vessels engaged in international transport of goods and passengers. They are a result of Governments efforts, aimed at unifying the divergent

regulations in force within different intergovernmental organizations and within individual UNECE member countries. The unified regulations contained therein have been brought in line with relevant European Union's legislation and are to facilitate the recognition of ship's certificates issued on their basis, thus avoiding the need for vessels engaged in international transport by inland waterway to undergo a double inspection. The Recommendations contain, in particular, strict regulations on limitation of air and water pollution by vessels and on abatement of noise produced by them as well as the internationally agreed standards for minimum manning requirements and working and rest hours of crews.
